

HB 2303 -- SCHOOL BATHROOMS

SPONSOR: Brattin

This bill requires schools to designate bathrooms and changing rooms for the exclusive use of one sex. A student may not use a bathroom designated for the sex different than their own; however, a school district must allow a student to use a student bathroom or changing room designated for a different sex if no other students are present and an administrator or staff member of the school district accompanies the students into the student bathroom or changing room. School districts may designate single occupant facilities for use by both sexes.
