

HB 122 -- PHYSICIANS PROVIDING SPORTS MEDICINE SERVICES

SPONSOR: Frederick

This bill adds the rendering of treatment within the physician's scope of practice to provide sports medicine services to an athletic team outside of the state of Missouri, the definition of "practice of medicine across state lines" and does not require a physician located outside of Missouri to obtain a license when such physician travels into Missouri with an athletic team to provide sports medicine services to such teams so long as the services are within the physician's scope of practice.

This bill is the same as HB 2810 (2016).
