

HB 832 -- PUBLIC HIGHER EDUCATION INSTITUTIONS WEBSITE REQUIREMENTS

SPONSOR: Chipman

Beginning with the fall 2018 semester, this bill requires any public institution of higher education to publish on their public website or in writing, at the time of acceptance or prior to registration, the estimated cost for each degree program offered, including required fees or expenses not included in the tuition.

This bill also requires approved institutions, as defined in Section 173.1102, RSMo, to post on their website salary information for each degree program offered at such institution, using national occupational salary statistics compiled by the United States Department of Labor's Bureau of Labor Statistics.
