

HB 1641 -- WORKERS COMPENSATION

SPONSOR: Roden

Currently, the law provides that certain diseases of the respiratory and cardiovascular systems, including carcinoma, may be recognized as occupational diseases if a paid firefighter is exposed to certain substances. This bill includes volunteer firefighters in this definition of occupational disease.

The bill also provides for a rebuttable presumption that a paid or volunteer firefighter who contracts cancer has a compensable occupational disease under certain circumstances. The presumption arises if the firefighter was exposed to a known or probable carcinogen and has been assigned to at least five years of hazardous duty as a paid firefighter, or at least 10 years of hazardous duty as a volunteer firefighter.

This bill is similar to HB 482 (2017).
