

HB 1806 -- RELIEVER AIRPORT ASSESSMENTS

SPONSOR: Matthiesen

This bill changes the property tax assessment value of reliever airports to equal the value such land has for agricultural or horticultural use and exempts reliever airports from the allocation of classifications when the property has multiple uses. A reliever airport is defined as any land and improvements, exclusive of structures, on privately owned airports that qualify under the National Plan of Integrated Airports Systems that may receive federal airport improvement project funds through the Federal Aviation Administration.
