

HB 1837 -- MAINTENANCE MEDICATIONS

SPONSOR: Rhoads

Currently, the dispensing of maintenance medication based on refills authorized by a physician or prescriber are limited to a 90-day supply of the medication and the maintenance medication must have been previously prescribed to the patient for at least a three-month period. This bill increases the medication supply limit to 180 days and removes the requirement that the medication was previously prescribed to the patient for a three-month period.

This bill is the same as HCS 657 (2017).
