

HB 2686 -- WIRELESS COMMUNICATIONS DEVICES

SPONSOR: Rowland (29)

This bill repeals the provision that the state preempts the field of regulating the use of hand-held wireless communications devices in motor vehicles and that provisions of state statute in this field supersede any local law, ordinance, order, or regulation enacted by a county, municipality, or other political subdivision to regulate the use of hand-held electronic wireless communications devices by the operator of a motor vehicle.
