

HB 482 -- RECORDS OF THE PUBLIC SERVICE COMMISSION

SPONSOR: Kidd

This bill modifies which information provided to the Public Service Commission is considered an open record. Information provided to the commission by a corporation, person, or public utility will not be made available to public counsel if doing so would threaten public safety. Records related to infrastructure or cybersecurity may be released to the Director of the Missouri Information Analysis Center.

The bill also specifies that certain records submitted to the commission are exempt from the Missouri Open Records Law.
