

HB 941 -- AMBULANCE SERVICES

SPONSOR: Hansen

This bill allows the Department of Health and Senior Services to promulgate rules requiring network service agreements with health insurance carriers in their service areas, as they relate to air ambulance licenses.

The bill specifies that health carriers and managed care plans must pay benefits directly to ground ambulance services. Current law does not specify that the ambulance services must be ground ambulance services.

The bill prohibits an air ambulance provider from soliciting or selling a subscription agreement for their services or for the billing of their services.
