

HB 1232 -- FOOD LABELING

SPONSOR: Schroer

This bill specifies that no food container may be deemed to be made, formed, or filled in a manner as to be misleading, misbranded, or unfairly marketed if the container is filled to less than its capacity for certain reasons. This requirement does not apply if the dimensions of the product are visible through the packaging, the actual size is depicted on the container, a fill line is represented on the packaging, or the actual amount of the product in a measure weight is specified on the container.
