FISCAL ANALYSIS

ASSUMPTION

Officials at the **Department of Commerce and Insurance**, the **Department of Natural Resources**, the **Department of Agriculture**, the **Office of Administration**, the **State Emergency Management Agency**, the **Office of the Secretary of State**, the **Missouri Department of Transportation** and the **State Tax Commission** each assume no fiscal impact to their respective agencies from this proposal.

Officials at the **St. Louis County Board of Elections**, the **Jackson County Election Board**, the **Platte County Board of Elections** and the **Kansas City Election Board** each assume no fiscal impact to their respective entities from this proposal.

Oversight notes this proposal requires all counties which are located in whole or in part in a flood hazard area according to the Federal Emergency Management Agency (FEMA) to adopt or rescind by order or ordinance regulations to require compliance with FEMA standards necessary to comply with the National Flood Insurance Program and removes the requirement that the county must submit the proposal to voters. Oversight assumes that those counties could realize a savings on election costs by not submitting the issue to the voters. Therefore, Oversight will reflect a \$0 to unknown savings to counties for this proposal.

FISCAL IMPACT - Small Business

There could be a direct fiscal impact to small businesses that are located in a county that is in whole or in part in a flood hazard area according to FEMA as a result of this proposal.

FISCAL DESCRIPTION

Currently, the county commission in all counties which have not adopted county planning and zoning may adopt or rescind by order or ordinance regulations to require compliance with the Federal Emergency Management Agency (FEMA) standards necessary to comply with the National Flood Insurance Program. This bill requires all counties which are located in whole or in part in a flood hazard area according to FEMA to adopt or rescind by order or ordinance regulations to require compliance with FEMA standards necessary to comply with the National Flood Insurance Program and removes the requirement that the county must submit the proposal to voters.

The bill also specifies that any permit can not raise the flood elevation of the 100-year flood level more than one foot and requires that the lowest floor of an insurable structure shall be above the 100-year flood level and all structures must be adequately anchored to prevent movement of the structure, provided that any required National Flood Insurance Program permit issued for the purposes of commercial or industrial development may not raise the flood elevation of the 100-year flood level more than 1/10 of one foot.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
