

HB 2343 -- PUBLIC WATER SYSTEMS

SPONSOR: Morris (140)

This bill specifies that a business's water system is not a public water system, regardless of if it meets the definition, if the business does not serve water from the system for the purpose of drinking. If a facility does not fill out the Public Water System Inventory Questionnaire to determine if a facility's water system should be regulated as a public water system, the department may include the name of a facility on a public list indicating the facility failed to submit the questionnaire, but no additional penalty can apply.
