

HB 2755 -- PROTECTIONS AGAINST FERAL HOGS

SPONSOR: Pogue

This bill requires the Department of Conservation to construct a fence that meets the requirements as specified in the bill around all state land to protect adjacent property owners from damages caused by feral hogs. The department is required to maintain all fencing in a condition to prevent ingress or egress of feral hogs at all times and to construct secondary fencing to prevent direct contact with the public. No appropriated funding may be used to construct the fence and the department may not increase permit fees to provide money for the fencing.
