FISCAL ANALYSIS

ASSUMPTION

Officials from the **Attorney General's Office (AGO)** assume a need for three (3) FTE Consumer Service Operators (each at \$31,640 annually) and two (2) FTE Assistant Attorneys General I (each at \$50,470 annually) due to AGO's responsibilities arising from 407.1600.11.

The AGO assumes a cost of approximately \$375,000 annually from this proposal.

Oversight does not have information to the contrary; however Oversight is not certain of the amount of involvement for the AGO resulting from this proposal. Therefore, Oversight will reflect the estimates as provided by the AGO but assume the costs (need for 5 additional FTE) may be lower than AGO's estimate and reflect the costs as "up to".

Officials from the **Department of Commerce and Insurance**, the **Missouri Highway Patrol**, the **Office of Administration**, the **Office of the State Public Defender**, and the **Office of the State Courts Administrator** each assume the proposal would not fiscally impact their respective agencies.

FISCAL IMPACT – Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

FISCAL DESCRIPTION

Under this act, an internet service provider shall authenticate access to obscene websites and redirect an obscene website to a web page that provides the subscriber, as such term is defined in the act, the ability to enter an authentication in order to gain access to the obscene website. A mechanism to create an authentication shall be provided to subscribers that are 18 years of age or older. The authentication shall be required at each attempt to access an obscene website and shall be changed every 3 months.

An internet service provider shall provide information to the provider's subscribers that includes a brief description of the provisions of this act requiring an authentication to access obscene content, the procedure for creating, recovering, and updating the authentication method requiring

multi-factor authentication for the account holder, and the penalty for individuals who share the authentication with minors which results in the exposure of minors to pornographic material.

An internet service provider is not liable for any penalty under the act if the provider makes a good faith effort to apply a generally accepted and commercially reasonable method of authenticating obscene websites and such technology has the ability to discover and authenticate new obscene websites and fulfills the requirements of the act.

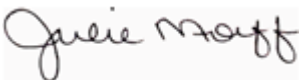

A subscriber that knowingly provides a minor with his or her authentication to access an obscene website shall be guilty of a Class A misdemeanor.

The Attorney General may seek injunctive and other equitable relief against an internet service provider that fails to comply with the provisions of this act.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
