

HB 892 -- RENEWABLE NATURAL GAS

SPONSOR: Black (137)

This bill requires the Public Service Commission to adopt a renewable natural gas program for gas corporations. The Commission must establish reporting requirements and a process for gas corporations to fully recover prudently incurred costs associated with a renewable natural gas program.

Any prudently incurred costs incurred by a gas corporation are recovered by means of an automatic adjustment clause. The costs will include costs to establish and maintain equipment and facilities deemed prudent at the time the initial investment was made.

An affiliate of a gas corporation can not be prohibited from making a capital investment in a biogas production project if the affiliate is not a public utility.

This bill is the same as SB 141 (2021).
