

# HB 1336 -- PERMIT REQUIREMENTS FOR BATTERY-CHARGED FENCES

SPONSOR: Riggs

This bill prohibits any city, county, town, village, or political subdivision from adopting or enforcing an ordinance, order, or regulation that requires a permit for the installation or use of a battery-charged fence in addition to an alarm system permit issued by the city, county, town, village, or political subdivision. Additionally, such political subdivisions can not adopt an ordinance or order that imposes installation requirements for such fences or alarm systems or prohibit the use of a battery-charged fence.

As used in this bill, a battery-charged fence is a fence that interfaces with an alarm system in a manner that enables the fence to cause the connected alarm system to transmit a signal to summon law enforcement in response to a burglary. The fence must be located on a property not designated for residential use, produce not more than 12 volts of direct current, as well as meet other specifications as provided in the bill.

This bill is similar to SB 470 (2021).
