Due to covid it would make sence for both customers and businesses for cottage food businesses to be able to both advertise/take orders online and also to be able to ship those orders to customers helping to reduce the spread of covid by lowering the person to person contact

i support internet sales but also need to be able to ship those orders to customers to help avoid the face to face contact spread of covid as most home bakers are currently suffering because people dont wanna come face to face for pickup or dont wanna have their package left outside for porch pickup and much prefer the online sales aspect that majority of businesses are currently focusing on and haveing the order shipped directly to their home to help avoid the possibility of the baker or their family coming into contact with someone who might be infected
