I am against this, as the Keystone Pipeline will NOT bring any benefit to Missouri, but will bring risks to our environment and natural resources when there is a break in the pipeline and it leaks. And there will be a break in the pipeline, because all these pipelines have failures at some point or another which cause substantial damage to the area.

I am Opposed to this Bill. We need to save our Environment and be considerate and thoughtful of what we are doing to our Lands. Federal and State Government needs to be responsible and do the right thing for Our Protected Quality of Life. We have enough Pipelines Cris-Crossing the United States and the State of Missouri.

I write in opposition to SCR 16. This project cuts across the Ogallala Aquifer and along the Missouri River, major sources of fresh water, and ALL PIPELINES LEAK, as this one ALREADY has. In addition, it is the filthiest and most deadly of all oil grades. This oil is NOT for American use or "oil independence" and does nothing to advance American interests. Please vote NO.

**Please do not let the keystone pipeline go through Missouri. Every pipeline swears they're safe and eco-friendly, until they're not.**

The Keystone pipeline runs through Tribal lands ... Tribal lands are governed by treaties . Tribal areas are their own sovereign areas . This violates applicable treaties and international law and could be considered a crime against humanity in the International Criminal Court . This could poison our water and destroy land we currently use making some parts of Missouri Uninhabitable . If you proceed with this and people get sick the State of Missouri could be liable for medical bills and other expenses resulting from Toxicity and Poisons as well as other things that can cause HARM and destruction to HUMAN LIFE.

The Sierra Club Missouri Chapter opposes SCR 16. This Keystone XL pipeline is part of an effort by the oil industry to export millions of barrels per day of tar sands from Alberta through the United States to international markets. Extracting tar sands is one of the most destructive projects on earth. Reliance on tar sands oil hinders our ability to avoid climate disaster. The US faces a clear choice: promote the oil industry's interests by green-lighting the most carbon-intensive, destructive oil on the planet, or demonstrate a bold commitment to addressing climate disruption and promoting clean energy solutions by saying no to Keystone XL. President Joe Biden made the right choice. Claims of job creation for the project have been greatly overblown as if the project was completed there would only be an estimated 35 permanent full time jobs associated with the pipeline. Investments in renewable energy and energy efficiency can and do produce many more good paying, permanent jobs than the Keystone XL pipeline could ever produce. Claims about the pipeline being needed for domestic energy security are also inaccurate. If it were built, the main purpose of the Keystone XL pipeline would be to facilitate the shipment of dirty tar sands based petroleum from one foreign country (Canada) to multiple overseas foreign countries via ports in the Gulf of Mexico. The pipeline proposal threatens the water, land and health of thousands of Americans if there were a spill while the oil flowed from one foreign country to other foreign countries. We don't need this - we should support our President for making the correct choice on this issue.
