**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

April 20, 2022 Representative Bill Kidd Utilities Committee Missouri House of Representatives 201 W Capitol Ave., Rm. 402 Jefferson City, MO 65101 Dear Chairman Kidd and Members of the Committee, Missouri Coalition for the Environment is a statewide, advocacy nonprofit organization that works to empower Missourians to protect their environment and health. Senate Bill No. 745 would hurt the renewable energy industry in Missouri, which would hurt not only Missouri's economy, but also Missouri's people and environment. Therefore, we respectfully ask you to oppose SB 745. This bill would deter individuals and companies from participating in net metering programs because their costs could potentially sky rocket. Utility companies should not be allowed to increase costs to net metering participants as they are helping utilities rely less on nonrenewable energy sources. Net metering is good for the participant, our environment, and for all Missourians, as it provides us with more electricity. Net metering allows participants to have their solar panels connected to the utility's power grid, and surplus electricity that is generated transfers onto the grid. Net metering programs allow Missourians to play an active role in our energy production by providing energy from their homes or businesses via solar panels. This bill would allow utilities to significantly increase costs for homeowners and businesses that participate in net metering programs, programs that have helped Missouri grow the solar industry, thereby creating jobs and augmenting Missouri's economy. This bill also supports coal over renewable energy by creating discounts for the use of coal by new large energy customers that allow costs to be transferred from the large customers to others. This is not only unfair to the customers who pick up the cost, but also harmful to human and environmental health, given the harmful effects of the coal industry on air and water quality. Despite the marginal benefits of the sales tax exemption for the purchase of specific solar energy systems that is also included in this bill, the overall effect of this entire bill would be to hurt the renewable energy industry in Missouri. Renewable energy is an important resource we should continue to support in Missouri, given the resources we predominantly currently rely on for energy in the state are nonrenewable. Renewable energy helps Missouri be more resilient and self-sufficient. Furthermore, solar energy benefits all Missourians by improving air and water quality via a reduction in harmful outputs from coal-based energy sources and carbon emissions that contribute to climate change. Once again, the Missouri Coalition for the Environment asks you to vote "no" on SB 745 in order to support the renewable energy industry in Missouri, thereby protecting Missouri's economy, people and environment. Thank you for your time. Sincerely, Melissa Vatterott, JDPolicy Director Missouri Coalition for the Environment mvatterott@moenvironment.org (314) 727-0600, ext. 111
