FISCAL ANALYSIS

ASSUMPTION

Officials from the **Missouri Highway Patrol, Missouri Office of Prosecution Services and Department of Corrections** each assume the proposal will have no fiscal impact on their respective organizations. **Oversight** does not have any information to the contrary. Therefore, Oversight will reflect a zero impact in the fiscal note for these agencies.

In response to a previous version, officials from the **Missouri Department of Agriculture and Attorney General's Office** each assumed the proposal would have no fiscal impact on their respective organizations. **Oversight** does not have any information to the contrary. Therefore, Oversight will reflect a zero impact in the fiscal note for these agencies.

In response to a previous version, officials from the **Office of the State Public Defender (SPD)** assumed the proposed legislation creates a new offense under Section 579.018 which could result in additional cases eligible for SPD representation. The number of additional cases is unknown, and as a result the fiscal impact is unknown. However, if the offenses, which are classified as misdemeanors, were class D misdemeanors, jail time would not be a possible sentence and the offense therefore would not be eligible for SPD representation.

Oversight notes in FY 2022, the SPD was appropriated moneys for 53 additional FTE. Oversight assumes this proposal will create a minimal number of new cases and that the SPD can absorb the additional caseload required by this proposal with current staff and resources. Therefore, Oversight will reflect no fiscal impact to the SPD for fiscal note purposes. However, if multiple bills pass which require additional staffing and duties, the SPD may request funding through the appropriation process.

In response to a previous version, officials from the **Office of the State Courts Administrator (OSCA)** assumed there may be some impact but there is no way to quantify that currently. Any significant changes will be reflected in future budget requests.

Oversight assumes OSCA is provided with core funding to handle a certain amount of activity each year. Oversight assumes OSCA could absorb the costs related to this proposal. If multiple bills pass which require additional staffing and duties at substantial costs, OSCA could request funding through the appropriation process.

Officials from the **St. Louis County Police Department** assume if passed, this bill would allow for animal control officers or law enforcement officers to apply for animal confiscation warrants, however service of the actual warrant would require the response of a police officer. While the Police Department currently assists the health department with these cases, the animal control officers would no longer be able to solely function without Police involvement.

The proposed bill also removes the ability to post search warrant materials on the property. The bill would require that a resident of the property be served with the appropriate materials. In some cases this may make executing the search warrant impossible.

The proposed bill would change the usual disposition hearing following an animal confiscation from thirty days to fifteen days. There are serious implications of moving the hearing to fifteen days rather than thirty.

For example, many tests completed by the veterinarian and lab will not be completed within ten days. If the tests are completed in the rushed time frame, the case may be found in favor of the pet owner and the police would have wasted time and man power.

The increase in man hours, paperwork, and overtime are difficult to estimate. The police officers process, if involved in an animal confiscation case would be as follows:

The officer would have to compile evidence and apply for a warrant (in some situations). After approval, the officer would then have to respond to the location where the animal is being maintained with the health department and animal control to serve the warrant. If the owner of the animal is not on-scene, the officer must locate a resident of the property and serve them in person, which may be impossible. After completing all necessary reports and having them approved, the officer would have to respond to a disposition hearing within ten days. During this process, the officer involved would no longer be able to respond to other calls and additional officers would have to complete the work the missing officer would generally complete, generating overtime costs.

The current process followed to confiscate animals takes an average of 24-40 hours to complete from start to finish. If the process were changed as the bill proposes, there could be an increase of hours worked which could amount to a significant, but unknown cost.

Oversight assumes any confiscated animal care costs, should the animal owner be acquitted, has an inability to pay before the initial disposition hearing, or upon conviction, would be incurred by veterinarians, local government dog pounds, animal shelters, animal rescue facilities, or another third party with existing animal care facilities approved by the court.

Officials from the **Newton County Health Department** and **Branson Police Department** each assume the proposal will have no fiscal impact on their respective organizations. **Oversight** does not have any information to the contrary. Therefore, Oversight will reflect a zero impact in the fiscal note for these agencies.

In response to a previous version, officials from the **Phelps County Sheriff, St. Joseph Police Department** and **Kansas City Police Department** each assumed the proposal would have no fiscal impact on their respective organizations. **Oversight** does not have any information to the contrary. Therefore, Oversight will reflect a zero impact in the fiscal note for these agencies.

House Amendment 3 - §273.358 Pet Shop Operations

In response to a similar proposal from 2023 (HB 995), officials from the **Missouri Department of Agriculture**, the **City of Kansas City** and the **City of Springfield** each assumed the proposal would have no fiscal impact on their respective organizations. **Oversight** does not have any information to the contrary. Therefore, Oversight will reflect a zero impact in the fiscal note for these agencies.

Oversight only reflects the responses received from state agencies and political subdivisions; however, other cities, counties and local public health agencies were requested to respond to this proposed legislation but did not. A listing of political subdivisions included in the Missouri Legislative Information System (MOLIS) database is available upon request.
