FISCAL ANALYSIS

ASSUMPTION

Officials from the **Department of Commerce and Insurance – Public Service Commission (PSC)** assume this version of the proposal will only allow six months for the Public Service Commission to make a decision on the application submitted by the public utility company. Currently, depending on the level of detail and the size of the acquisition, it can take nine to twelve months, or longer in some cases, to make a decision. This does not include the potential of having to go to hearing.

PSC assumes this legislation will require an additional 5 FTE to process the applications in a six month time frame.

Oversight does not have any information to the contrary. Oversight assumes the PSC could absorb some of the costs related to this proposal as this is procedure the PSC already has in place, or there may not be many large water public utility companies that acquire smaller companies; therefore, Oversight will reflect the FTE cost as **Up To 5 FTE** to the Public Service Commission Fund.

Officials from the the **Office of Administration, Missouri Department of Transportation, Metropolitan St. Louis Sewer District, South River Drainage District, City of Springfield, City of Tipton, Tipton Water/Wastewater, the Wayne County PWS and Kansas City** each assume the proposal will have no fiscal impact on their respective organizations. **Oversight** does not have any information to the contrary. Therefore, Oversight will reflect a zero impact in the fiscal note for these agencies.

In response to a previous version, officials from the **Lexington Water District** and the **Morgan County PWS** each assumed this proposal will have a fiscal impact on their water district.

Oversight assumes this proposal modifies the definition of a “large water public utility” to include any public utility that regularly provides water service, sewer service or a combination of either to more than 8,000 customer connections and also specifies that a large water public utility may file with the PSC for a water and sewer infrastructure rate adjustment.

According to the PSC “FY 2022 Water/Sewer Companies Regulated by the Missouri Public Service Commission Report”, this legislation would currently allow 2 additional combination water and sewer companies (Confluence Rivers Utility Operating Co. and Liberty Utilities) to be defined as a “large water public utility”. Oversight assumes these newly defined companies could file for a water and sewer infrastructure rate adjustment which could increase utility cost to local political subdivisions.

Oversight will reflect a range from \$0 (no utility will increase rates) to an unknown cost to local political subdivisions for higher utility costs, however, Oversight assumes the potential increase in utility cost will be under \$250,000.

Oversight only reflects the responses received from state agencies and political subdivisions; however, other cities, counties and local utility companies were requested to respond to this proposed legislation but did not. A listing of political subdivisions included in the Missouri Legislative Information System (MOLIS) database is available upon request.

FISCAL IMPACT – Small Business

Small businesses could have an increase in utility cost as a result of this proposal.

FISCAL DESCRIPTION

This bill modifies the definition of "large water public utility" to include any public utility that regularly provides water service, sewer service, or a combination of either to more than 8,000 customer connections and specifies that a large water public utility may file with the Public Service Commission for a Water and Sewer Infrastructure Rate Adjustment

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
