

HB 225 -- NUCLEAR CLEAN POWER ACT

SPONSOR: Black

This bill establishes the "Missouri Nuclear Clean Power Act", which allows clean base load electric generating plants or facilities rated at 200 megawatts or more that utilize renewable sources to produce energy not in commercial operation as of August 28, 2023, to charge for costs associated with construction work in progress before the facility is operational.

The costs recovered by an electrical corporation are subject to inclusion or exclusion in a ratemaking proceeding under the authority of the Public Service Commission. The Commission may also authorize an electrical corporation to charge for additional amortization to maintain the corporation's financial ratios that will better allow it to cost-effectively construct a clean baseload generating plant or a renewable source generating facility.

This bill is the same as HB 1684 (2022).
