HRT and other Gender Affirming procedures are well-tested, and documented and are only becoming more developed as time goes on. To outright ban Gender Affirming care to those not 18 is pointless theft of their happiness and possible life. Doctors and parents aren't advocating for young folk to be trans. I and many others have had to fight parents, doctors, therapists, etc in order to start Hormone Replacement Therapy. Roughly 98% of trans folk who transition, never detransition and are perfectly happy living life as their better, more comfortable selves. These Gender Affirming actions/procedures are integral to the physical and mental well-being of those in question. Trans youth want nothing more than to exist in the world as they choose to present themselves with the same autonomy as is given to their cis-gendered peers. We are not a fetish. We are real people.

How can we trust our children with the the very medical associations and “experts” who censored and intentionally hid informed consent from us (and continue to do so) with the Covid vaccines. First do no harm went out the window. Many other countries and states see the devastating effects of the monstrosity of these puberty blockers and surgeries. They make it illegal. Pfizer and Moderna are in trouble for not giving informed consent as we now see warnings of heart attacks and strokes. I was a Tom-boy, so was my daughter. I’m sure glad my progressive parents didn’t know about or buy into this mutilation or I wouldn’t have my 3 adult children and they wouldn’t have grandchildren! Both my daughter and I passed through the Tom-boy phase, no harm done. Stop this madness now!

I support HB419.Children and adolescents are being harmed by cross sex hormones, puberty blockers, and surgical procedures that cause irreversible harm and mutilate otherwise healthy bodies.There is no scientific evidence behind these destructive and damaging therapies.Furthermore, children do not have the capacity to consent to these drugs and procedures. A growing army of detransitioners can attest to this.We need to return to the therapeutic approach of "watchful waiting" since children with gender dysphoria overwhelmingly outgrow these feelings when they pass through puberty.We do have an obligation to help children in distress with counseling and talk and play therapy to address underlying mental health issues.We are failing to address these real needs in the rush to medicalization and surgery. Please protect Missouri's children from this destructive and exploitative experimentation.

I encourage you to pass this bill as we need to protect the children of MO from experimentation and abuse that occurs when they (the underage children) are convinced, or coerced into permanent life changing surgeries because some teaching/indoctrination now has them confused about their sexual identity. I believe this bill should also be passed because it mentions penalties and liability for the violators. I also believe it should become law ASAP.

I agree that children under the age of 18 should not be subjected to doctors, etc. convincing them they should transition genders. They are too young to make such permanent decisions. Even adults can't make good permanent decisions. Look at how many divorces there are today, how many times people change jobs or even careers. And you can't change your gender back if you make a mistake or change your mind.

I am opposed to subjecting children to harmful cocktails of drugs that are used to treat cancer patients. The drugs being used are harsh and not scientifically tested. Adolescence has always been a difficult time. To allow and participate in transitioning a child that they may very well regret in future years is tantamount to child abuse. I am also opposed to mutilation of a perfectly healthy child for the same reason. Adults may chose for themselves, but we must protect the vulnerable. It is well know that this is a huge money making opportunity for big pharma and the medical complex. Lobbyists will say to oppose this is bigoted, but I say it is prudent and wise to guard after our vulnerable and easily manipulated minor children. Counseling services should be made available to help children cope with adolescent struggles and prevent them from causing permanent damage.

There are only 2 biological genders determined by an individual's chromosomes! Stop the minor transitioning surgeries or hormone shots! Parents should be informed if minors are getting groomed at school or worse, wanting to be cut up! If children cannot smoke, drive, vote, why should they be allowed to be experimented or mutilated on for irreversible decisions!

If a person wants to have surgeries after they are an adult, more power to them, but we should not allow an impressionable child to make a permanent decision like this. If you have been paying attention, more and more young girls who were trans and have changed their mind have come out saying they wish they never would have gone through with the hormones or surgeries. Let's protect kids until they are old enough to make a more informed decision.

These types of medical transitional procedures do harm to children. This is a decision that should be made when a person is old enough to understand the full ramifications of their choices. This should not be forced or coerced upon a child. This should not be done without parental consent.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

January 24th, 2023 Re: Official Testimony Supporting H.B. 419 & H.B. 540 Dear Mr. Chairman and Members of the Committee, My name is Joseph Kohm III. I am an attorney and the Public Policy Director for Family Policy Alliance. Family Policy Alliance advocates for policies that strengthen families and religious freedom in state capitols across the country, and federally. We host an alliance of 40 state-based family policy organizations, to achieve a vision of a nation where families thrive, life is cherished, and religious freedom flourishes. Thank you for the opportunity to share with you how H.B. 419 and H.B. 540 will protect children from dangerous sex change procedures. First, H.B. 419 and H.B. 540 help children struggling to embrace their biological sex by protecting them from harmful drugs and surgery. A small but growing percentage of the American population experiences distress identifying with their biological sex,[1] and for the small percentage of children who are gender nonconforming or experience distress identifying with their biological sex, studies consistently demonstrate that the majority come to embrace their biological sex in adolescence or adulthood, thereby rendering most medical physiological interventions unnecessary.[2] However, in recent years, politicized medical organizations have pushed referring children for invasive, harmful forms of "treatment" that can include off-label use of puberty blockers, administration of cross-sex hormones far above naturally occurring levels, and even – sometimes – surgery. These organizations have adopted their "guidance" without long-term, peer-reviewed studies.[3] The pressure is so great that in many states, medical professionals are legally barred from offering helpful talk therapy to children for this issue.[4] This functionally sends children struggling with their biological sex down a one-way path to transition by making it appear to be the only treatment option available. This is especially alarming given the fact that 80 to 95 percent of children will outgrow gender dysphoria and embrace their biological sex if these experimental treatments are not used,[5] but 100% of children go on to transition if these harmful treatments are used.[6] The use of puberty-blockers to treat gender dysphoria in children is experimental, with these drugs being used in an off-label manner, and will create long-term damage, including:[7] i. Sterilization: The combination of puberty blockers with cross-sex hormones will result in sterilization. ii. Potential for decreased growth spurts: There is preliminary evidence that delaying puberty may decrease the puberty-related growth spurt and thus limit the height the person would have otherwise achieved. iii. Potentially increased risk for osteoporosis: The time in our lives when the greatest concentration of calcium is put into our bones is during adolescence. Halting the natural onset of puberty will stop that process and there is no evidence that the normal calcium deposition is regained once puberty is restarted. The use of cross-sex hormones comes with serious known risks. For biological females, these risks may include:[8] i. Irreversible infertility; ii. Severe liver dysfunction; iii. Coronary artery disease, including heart attacks; iv. Increased risk of breast, cervical, and uterine cancers; v. Cerebrovascular

disease, including strokes;vi. Hypertension;vii. Erythrocytosis, which is an increase in red blood cells;viii. Sleep apnea; ix. Type 2 diabetes; x. Loss of bone density; andxi. Destabilization of psychiatric disorders.For biological males, these risks may include:[9] xii. Irreversible infertilityxiii. Thromboembolic disease, including blood clots;xiv. Cholelithiasis, including gallstones;xv. Coronary artery disease, including heart attacks;xvi. Type 2 diabetes;xvii. Breast cancer;xviii. Macroprolactinoma, which is a tumor of the pituitary gland;xix. Cerebrovascular disease, including strokes; andxx. Hypertriglyceridemia, which is an elevated level of triglycerides in the blood; Additionally, sex change surgeries and their effects are irreversible. These gruesome procedures include, for boys, removing the subject's penis and fashioning a fake vagina out of it (penectomy and vulvoplasty); and, for girls, removing flesh from the forearm or thigh and fashioning a fake penis out of it (phalloplasty), or a double mastectomy, the removal of both healthy breasts. The effects of damaging children in this way before they even reach the age of majority include infertility, increased risk of infection, and a high risk of additional necessary surgeries, and many more.[10] These bills protect vulnerable children from such "treatment" by granting children a right of action to seek legal recourse against doctors who perform these procedures on them. When plaintiffs incur damages at the hands of others, the law's objective is to make them whole or as close to whole as possible. Sadly, most children who undergo gender transition procedures can never be made fully whole. For example, a 14-year-old girl who undergoes a double mastectomy will never be able to nurse her future children or regain lost, fully healthy body parts. Thankfully, H.B. 419 and H.B. 540 are victim-centric, granting these children a right to recover vast amounts of damages. No amount of money could ever restore what was taken from them, but these bills correctly aim to make them as whole as possible. Second, H.B. 419 and H.B. 540 ensure vulnerable children struggling with gender dysphoria receive the help they need. These bills protect their access to therapy and other helpful treatments, such as anti-depressant medication. They create an environment that ensures any children with comorbidities, such as depression or anorexia receive proper treatment for those conditions, rather than enabling a singularly-focused, one-way transition pipeline that would leave these comorbidities totally untreated. In 2014, a study found that 62.7% of patients diagnosed with gender dysphoria had at least one co-occurring disorder, and 33% were found to have major depressive disorders, which are linked to suicide ideation.[11] H.B. 419 and H.B. 540 also protect victims from threats, intimidation, and coercion in favor of undergoing so-called gender transition procedures. Additionally, H.B. 419 makes allowance for children who may already be taking cross-sex hormones and puberty blockers by allowing them to take a healthy amount of time to wean off these dangerous drugs: the bill does not go into effect until six months after it is enacted.In conclusion, H.B. 419 and H.B. 540 are critically needed legislation to protect Missouri's children from dangerous and irreversible gender transition interventions. Both bills contain strong protections for children who are victims of gender transition procedures, and Family Policy Alliance endorses both. We recommend H.B. 419 as the stronger bill because it includes a further provision that allows children currently on puberty-blocking drugs and cross-sex hormones the time they need to wean off them safely. By passing this bill, Missouri will demonstrate its commitment to protecting vulnerable children and ensuring access to the healthcare they need. Therefore, we strongly urge you to vote "Yes" on this legislation.Sincerely, Joseph Kohm III, Esq.Director, Public Policy[1] See, e.g., Gary J. THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

As the MO American Academy of Medical Ethics State Director, I am submitting my written testimony in SUPPORT of HB 540, HB 419, and 463. I am at once a wife, a mother of (4) children 2 girls and 2 boys that span the ages of 16-26 years old, a constituent, and a board certified family physician. As the MO American Academy of Medical Ethics State Director, I am submitting my written testimony in SUPPORT of HB 540, HB 419, and 463. I am at once a wife, a mother of (4) children 2 girls and 2 boys that span the ages of 16-26 years old, a constituent, and a board certified family physician. As the MO State Director for AAME, I affirm the obligation of healthcare professionals to care for children and their parents struggling with gender identity with sensitivity and compassion. As a wife, mother, and physician, I love and care for individuals, communities, and family members who identify with the LGBTQ+ community. Attempts to alter gender surgically or hormonally for psychological indications, however, are medically inappropriate. Medicine rests on science and should not be held captive to desires or demands that contradict biological reality. Sex reassignment operations are physically harmful because they disregard normal human anatomy and function. Normal anatomy is not a disease; dissatisfaction with natural anatomical and genetic sexual makeup is not a condition that can be successfully remedied medically or surgically. The purpose of medicine is to heal the sick, not to collaborate with psychosocial disorders. Save our children from mental and bodily harm. We have a transitioning granddaughter who is no better off than when her parents started this procedure six years ago. She is going bald and doesn't really interact with other young people. It is a dark, lonely world for someone in her position. Please help restore sanity for our children.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

SUPPORT for MO HB419, HB463, and HB540 – “Missouri’s Children Deserve Help Not Harm” Act, “Missouri Save Adolescents from Experimentation (SAFE)” Act, and “Missouri’s Children Deserve Help Not Harm Act” Women’s Liberation Front (WoLF) is pleased to have the opportunity to submit written testimony in support of MO HB419, HB463, and HB540. These bills provide mechanisms to protect children and adolescents from unnecessary, life-altering, and permanent medical interventions. It is extremely important to consider the profound impact that “gender affirming” treatments have on children and adolescents, and we appreciate your concern for this issue. Over the past few years, increasing numbers of children in the United States have indicated that they identify as “transgender,” “non-binary,” “gender fluid,” or as other types of identities that do not necessarily conform with socially-created sex stereotypes. According to GLSEN, around 92% of these children are female. These children and their parents have been informed by myriad special interest groups, as well as some healthcare providers, that radical and permanent medical interventions will help improve the children’s mental health. However, long term studies suggest that individuals’ mental health actually worsens after medical interventions. Some special interest groups and healthcare providers even claim that medical interventions will save children’s lives; they insinuate – and sometimes even directly state – that children who do not receive so-called “gender affirming treatment” will die by suicide. This claim is not supported by evidence. According to the Gender Mapping Project, the number of medical intervention providers for vulnerable children and adolescents has dramatically grown over the past decade; there are now more than 800 clinics that provide services related to so-called “gender affirmation” or gender dysphoria treatments for children. These clinics offer a range of experimental medical services to children and adolescents, including cross-sex hormones, puberty-blocking drugs, double mastectomies, radical hysterectomies, and numerous other procedures. Independent for-profit surgeons also advertise to children on social media platforms like TikTok and Instagram. Young people immersed in online social media are, in many instances, swept into an online fantasy, fuelled by shiny, glossy stories of the “wonders” of permanent physical modifications such as double mastectomies. Increased public promotion of drugs and surgeries to alter children’s superficial appearances, along with threats that their children will die by suicide if they do not receive these treatments, have caused many parents to believe that it is appropriate and even necessary for their children and teenagers to undergo permanent and life-altering medical interventions. Unnecessary surgeries, puberty-blocking medications, cross-sex hormones, the removal of healthy body parts, and other cosmetic surgical procedures on young people have harmful, long-lasting, and often permanent effects. It doesn’t matter if a child is 10, or 14, or 17 – the child will undoubtedly be affected for the rest of his or her life by medical professionals who were responsible for profound, life-altering decisions about the child’s

body, future health, and future fertility. HB419 and HB540 provide a detailed list of the many different ways in which “gender affirming care” will harm the health of children and adolescents. We share the concerns stated in these bills, and we encourage you to review our recent submission to the National Institutes of Health; in our NIH submission, we provided detailed discussions about some of the harms caused by unnecessary medical interventions. HB419, HB463, and HB540 appropriately place the burden of responsibility on medical professionals and hold these professionals accountable for causing harm to children and adolescents. We agree that medical professionals should absolutely be held accountable when they encourage, promote, and/or provide unnecessary, permanent, and life-altering medical interventions to children and adolescents. HB419 and HB540 prohibit public funds from being directly or indirectly used to provide “gender transition procedures,” and they also state that parents of child victims should not be held liable. We support both of these strategies. Public funding should absolutely not be used to promote harmful and unnecessary medical treatments. We urge caution against criminalizing parents who are simply trying to provide support to their children. Unfortunately, many parents have been indoctrinated into believing that “gender affirming care” is the only viable option for their children, and we do not want these parents to be prosecuted when they are simply following the advice given to them by political activists, healthcare professionals, and even some educators. While we firmly believe that medical professionals should be held responsible, we also want to note that many practitioners have been repeatedly informed by their professional associations, mentors, and colleagues that “gender affirming” treatments are the only appropriate responses for minors who might be “gender dysphoric” or for minors who identify as transgender, non-binary, etc. In fact, some professional associations now normalize or encourage “gender affirming” treatments and medically unnecessary interventions for children. Therefore, medical professionals may be placed between “a rock and a hard place” when it comes to making decisions about how to respond to minors’ requests for surgeries, puberty-blockers, and other medical interventions. We would like to urge caution against assuming that all healthcare providers are malicious or are intentionally taking advantage of vulnerable children. Some (or perhaps many) medical professionals are simply following advice and guidance that is now considered mainstream or even “best practice.” For more information, please review the amicus brief that we submitted in support of the Arkansas SAFE Act, which prohibited “gender affirming” surgeries and drugs for children. Thank you for reviewing our written testimony. We support MO HB419, HB463, and HB540, and we are available and willing to discuss these important, complicated issues with you. We welcome your questions and we are happy to serve as a resource for you. (1) an adolescent is under the supervision of their parents. Therefore any conversation or activity related to gender, sex, or sexual orientation that is discussed or shared with a child or adolescent, should be immediately told to the parent at the very least there should be a parent decision. (2) there is very little research and no longitudinal studies on the effects of gender altering powerful pharmaceuticals on the physical or emotional development or damage to a developing human body. This is experimental at best and dangerous pseudoscience. (3) there are valid reports of osteoporosis, lack of any sexual physical pleasure and extreme depression of young people who have been harmed by the strong pharmaceuticals. Again this is dangerous. (4) giving strong pharmaceuticals without any longitudinal information goes against a physicians Hippocratic oath. I SUPPORT legal constraints on "gender affirming care" (ie gender-altering medications being allowed to be administered in Missouri) AND/OR a complete ban on those pharmaceuticals.

My name is Mary Haley, a concerned parent in Howell County. I am in support of HB 463. Children should not be allowed to make permanent decisions altering their bodies. This is common sense and why we also have laws protecting minors from being able to get tattoos below a certain age. Children should not be given "health procedures" That alter their bodies in order to embrace body dysmorphia at an age where they are still developing mentally and emotionally.

In any other context we would recognize so called "gender affirming" practices as genital mutilation and child abuse. We do not allow children to enter into contracts, even when advised by competent adults. Nor do we allow them to marry, even with a judge's order. How then can we possibly consider allowing them to permanently alter their bodies before they have the life experience required to understand the consequences? And make no mistake, even puberty blockers have permanent effects. Infertility, and damage to the skeletal structure from binders are just the most obvious.

Children under the age of 18 do not have the maturity to make life changing medical decisions. Once they are started on the transition pathway, it is a one way street because those who change their minds are shamed. This an ideology and a cult. Gender dysphoria is akin to anorexia and body dysmorphia. I am a Psychiatrist/Physician and I am shocked that members of my community continue to push this. Doctors who participate in this are motivated by greed, as are the pharmaceutical companies marketing these treatments. I am a life long Democrat, and I support this bill.

How is it that we've come to this? Just a few years ago we were discussing the fact that our kids were vaping in schools. The argument being the frontal cortex was not fully developed to make these kinds of decisions. In the age was raised to 21. But now we're giving these same children free range to choose their gender at a prepubescent age. We have lost all common sense there is something more twisted at work here.

Transition hormones and surgeries are dangerous! "In February 2022, Sweden announced that it would no longer promote hormone therapies (and certainly not surgeries) for minors except in extreme cases. Sweden continues to require psychotherapy (that explores and allows change) for all children expressing gender dysphoria under 18.9 o To date, Sweden, Finland, France, and the UK all agree and are taking similar approaches to address gender dysphoria. Meanwhile, the US is plowing ahead, encouraging the medicalization of very young children." This and more FACTS at CHANGEDmvt.com / Conversion Therapy Facts

Protecting our children should be our number 1 priority. God created male and female. No parent or doctor should be allowed to perform any surgical procedures on minors to alter their gender. I feel like 18 is too young! It should be 25. The complications that arise from any procedure including hormones are horrific. There is often regret and frequently it is too late to correct the issues. The children become sterile, they have no healthy sex life, suicidal tendencies increase and it does not address the issue that caused them to think they were another gender, so they continue down a dangerous path. What we should be doing is addressing the mental health of these children. I ask you to protect our children. Fight for them. Keep them safe! Thank you.

Gender affirming health care can literally save lives and is supported by every major medical association in the country. This includes the American Academy of Pediatrics, the American Medical Association, American Psychological Association, Endocrine Society, American College of Obstetricians and Gynecologists, and World Professional Association for Transgender Health. Medical decisions ought to be left to the patients, their families, and their health care providers, not a panel of people who clearly have only read inflammatory opinion pieces on the issue rather than anything based in medical science.

I have lived in Southwest Missouri and then Kansas City for the entirety of my life. I am a woman and I am also a lesbian. But my identity reaches far beyond those two things. Above all else I am a human. As a human I try to show empathy toward my fellow people. I understand that they have different experiences than I do. I understand that never can I know exactly what another person is experiencing. I can, however, let them make the best choices for themselves and their family. The Missouri legislature's obsession with regulating and controlling families in this state is where my empathy ends. Transgender children are not a political prop. They are real humans with needs, emotions, and values of their own. Are they and their families not the ones who should determine their own destiny? Are they not worthy of bodily autonomy? I supposed the bodily autonomy question shouldn't be left up to the MO GOP as we know what happens there. In short, transgender children deserve to be free, not under the thumb of the cowards of the right wing. Stand up for children in Missouri and do not support this bill.

As a resident of the State of Missouri and voting citizen, I oppose this measure and any measures which limit the rights of those living in my state to pursue life and leisure without harassment. This regulation will inflict harm upon a number of individuals with nearly no benefit to the rest of society. I acknowledge that this issue is complex, and it's handling should be left to the communities which it effects, rather than being decided by blanket edict. This measure is an over-reach by the state into the lives of individuals and seems more like political performance than actual concern for the citizenry. As a conservative-lead house, I would expect more from the party of small government and personal freedoms.

Testimony of Physicians for Reproductive Health Before Missouri House of Representatives
 Physicians for Reproductive Health (PRH) appreciates the opportunity to testify on HB 170, HB 183, HB 337, HB 419, HB 463, HB 494, HB 498, and HB 540. PRH is a physician-led advocacy organization working to improve access to comprehensive health care, including gender affirming care. Our network includes physicians of all specialties from across the country, including physicians in Missouri, committed to meeting the health care needs of our patients. We are strongly opposed to these dangerous bills as they are not based in science, require providers to stop lifesaving medical care, and would interfere in not only the patient-provider relationship, but in Missourians ability to be healthy. Gender affirming care is just that; health care. As actual physicians who know the evidence and science behind gender affirming care, we know that the care we provide is not a political stunt like the one the House is pulling today; we are meeting the needs of people of all ages in our state as they come to us for support and health care. Gender-affirming care is any health care that centers and acknowledges the gender identity of the patient. This includes primary care, reproductive care, and any other health service where the patient's gender identity is respected by medical providers. Cisgender people get gender-affirming care every time they go to their doctor: care that believes who they are, trusts their needs, and is in alignment with who they know themselves to be. Transgender, non-binary, and gender diverse individuals of all ages deserve gender-affirming care too. Gender-affirming care is safe, essential, life-saving health care that allows transgender and non-binary people to live their full and authentic lives. Leading medical organizations including the American Academy for Pediatrics, American Medical Association, American College of Obstetricians and Gynecologists, Endocrine Society, Pediatric Endocrine Society and World Professional Association for Transgender Youth support gender-affirming care for transgender and non-binary people. Bans and restrictions on this essential health care make patients and our communities less safe and healthy, and denies them access to the full range of the quality, compassionate, health care they deserve. The data repeatedly shows us that transgender and nonbinary youth are at an increased risk of depression and suicidal ideation compared to other young people, with recent studies finding that 66-72% of transgender youth are depressed and half considered suicide. Your proposed policies are directly harming the mental health and well-being of our community. The political dramatization of the "harm" that transgender people, queer people, and their rights have on communities is dangerous. LGBTQ people are no threat to the health and safety of communities. The real threat to the health and safety of communities is sitting here in this very room: the legislators working to pass these coercive, controlling, and misinformed pieces of legislation. The last-minute hearing on these bills makes it all the more clear that this was never about getting evidence-based information about LGBTQ communities and instead about trying to pass legislation filled with shameful lies fueled by transphobic and homophobic rhetoric. All people, no

matter their age or gender identity, should be able to attend school, play sports, and access health care in ways that affirm who they are. Bans targeting transgender youth sports participation are rooted in false discriminatory rhetoric. A person's gender identity may or may not be consistent with the sex someone was assigned at birth. Gender identity is central to how young people perceive themselves, and it is critical they are supported. When transgender and non-binary youth are affirmed by the people around them, their rates of depression and suicide drop significantly. Forcing young people to compete in sports that do not align with their gender identity is directly harmful to their well-being. There is also no evidence that allowing transgender student athletes to participate on the team that aligns with their gender identity would affect the fairness or the sport. Instead of passing legislation that puts the health care, dignity, and safety for trans people at risk, lawmakers should listen to trans people and the medical professionals who work directly with them, who understand the life-changing, positive impact of ensuring that they can access the gender-affirming care they need. We are the doctors who take care of your constituents. Believe us. Listen to us. Respect science and medicine. The wellbeing of your constituents, and of our patients, depends on it. Reject HB 170, HB 183, HB 337, HB 419, HB 463, HB 494, HB 498, and HB 540.

As a school counselor to see this bill is offensive and appalling. Long term studies show that excluding children and not excepting students/children for who they are create long term mental illness. Confidence decreases, suicidal ideations increase. Talk about not promoting well-being. If a child and their parents agree, how does this effect anyone else?

The purpose of these bills is to promolgate transphobic sentiment, and force people to detransition, move, or live in hiding. There is no other pupose than to go against medical science in order to promote an outdated ideology. This is a clear violation of the constiuation, and this sham hearing scheduled with just over 24 hours notice with a storm coming in has been scheduled to minimize public comment. You know what you are doing, and should be ashamed. These bills will directly lead to children and adults having deterioriating mental health up to attempting suicide. These bills will promote hatered of trans people, and we already have plenty of that. Are you ready for the blood on your hands? Are you gleeful for the children who will surely take their own lives? With these bills, you are telling trans people you would rather them die, hide, or leave than live as your neighbors. There's a saying in Missouri: Salus populi suprema lex esto. It means "the welfare of the people shall be the supreme law." It's our state motto. I say these obvious things that I believe you know, but you seem to have forgotten. You are not saving children, you are not saving the people of Missouri. You are working to the detriment of our neighbors, our friends, our kids, and ourselves out of fear. In the strongest possible terms, I urge you to vote against this legislation for the sake of our kids, and our future.

Rep. Hudson's bill attacks the freedom of Missouri parents to pursue the best medical care for their children. His testimony and response to questions during the hearing shows he is ignorant of much of the medical knowledge governing transgender healthcare in the US and globally, and yet he is attempting to legislate from his ignorance. May God have mercy on this misguided pastor's soul, and may he avoid a Christ-mandated millstone around his neck.

This is an overstep by the legislature to determine what medical interventions and procedures are available for citizens under 18. Those determinations are to be made by a medical professional in concert with a caregiver, parent of guardian. It is dangerous to deny such options to parents and their children. This bill protects zero people and it only harms those that are reaching out for healthcare interventions.

I am opposed to this legislation because prohibiting doctors from prescribing puberty blocking drugs to patients who need them and happen to be under 18 years old is as bad of an idea as prohibiting doctors from performing Coronary Artery Bypass Surgery (CABS) for men under the age of 66. Sixty-six is the average age of men who have this surgery, but there are many men who have heart disease and need this life saving procedure before they reach 66. And, CABS has risks associated with it, such as blood clots that can cause heart attacks, strokes, or lung problems; pneumonia; kidney failure; and death. Should we take the decision making power away from a man to have CABS because of his age, due to the potential risks associated with the procedure? No, of course not, just like we should not take the decision making power away from parents to decide with their doctors the best course of action to care for their children. This legislation would take those rights away from parents.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

As a parent of a transgender child who came out at 15 and is now 21, I can attest to the importance of appropriate medical care including hormone replacement therapy and hormone blockers in addition to other gender affirming procedures for kids experiencing gender dysphoria. Medical treatment for gender dysphoria is supported by The American Academy of Pediatrics American Academy of Child and Adolescent Psychiatry American College of Physicians American Medical Association American Psychiatric Association Pediatric Endocrine Society It is important that medical care be kept between the doctor and the patient with the patient's parents consent and full information. HB 419 is interfering in this process is risky for the children. Teenagers with gender dysphoria are at high risk for self-harm and death by suicide, in fact one of the highest rates for all teens and pre-teens. Kids can be in danger from society, other kids and adults who may bully them, physically harm them if their appearance does not match their gender identity. Doctors prescribe many drugs and treatments to children with depression, anxiety, ADHD, and other mental health diagnoses that we as society do not interfere with because we understand that the doctor and parent are following best medical practices. The same can be said for asthma, diabetes, epilepsy, all the diseases. As soon as society steps in to interfere with doctor's ability to care for their patients based on medical best practices, we risk all kids with all health conditions. Gender dysphoria is no different than any other diagnosis that is treated with medical intervention. I strongly oppose this bill because it will in fact harm more children.

My daughter is 19 and thriving today because of the lifesaving treatment she received at Washington University Transgender Center in St. Louis. At the onset of puberty, my daughter became deeply depressed. She could no longer function and we had to ultimately pull her out of school. At age 13 she tried to take her life. We sought psychiatric care that was helpful, but she remained mentally unstable and was unable to attend school. It wasn't until Lyra was able to tell me and my husband and her doctors and psychologist that she was experiencing gender dysphoria that we were able to start the treatment that really improved her mental health. Within 2 weeks of putting Lyra on hormone blockers, her whole perspective on life changed. She became a happy kid. She no longer wanted to hurt herself and wanted to go back to school. Today at 19 years old Lyra has a future. She has been accepted to Stephens College in the Fashion design school. She is so excited to start her life as an adult woman. We couldn't be more proud of her. I am thankful every day that her doctors were able to provide hormone blockers at the perfect time to save her. No doctor harmed my child, no doctor experimented on my child. They saved her. Please don't take this life-saving treatment away from kids.

The Trevor Project estimates that more than 1.8 million LGBTQ youth (13-24) seriously consider suicide each year in the U.S. — and at least one attempts suicide every 45 seconds. This bill is reckless and harmful putting very delicate healthcare decisions in the hands of legislators and not physicians and families. It is dangerous and despicable that the state of Missouri would go after such a vulnerable community in this way.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

My daughter is 25 years old now. I can't tell you exactly when she began her gender transition, nor is it any of your business really. It was a long journey, with a lot of fear, because the world is full of hate and all sorts of messages to kids like mine that they don't belong. I'm an executive minister for Community of Christ. We're an international church on whose denominational leadership team I have served for ten years. My kid was afraid that who they were might hurt my ministry, because churches are some of the worst at underestimating how vast God's love really is. She was afraid of what people at school would say. This legislative diatribe of bill after bill, is spewed out as if trying to confirm my kid's fears, from back then, that the world didn't want her. How dare we do this?! We had so much to learn. But we listened. We listened to the professionals, and mostly we listened to our child. And we did learn. But when I read the text of these bills, I get the idea that the sponsors have been more interested in listening to lies and nonsense. I am so grateful for the professional medical, psychological and psychiatric support that our child has received. This bill would have the State of Missouri reject the very expertise that helped my child become a well adjusted happy person. Instead, says this legislation, our state should be guided by religious bigotry, ignorance, misinformation and conspiracy theories. I came here today to ask us to please stop this. Stop it right now. Leave my child and others like her alone. Stop picking on the most vulnerable, most marginalized kids in our community. Our state is becoming a bully. Please stop it. Listen to the medical professionals and listen to the kids. There's so much to learn.

Again, quit wasting time and resources on this. You don't know better than the American Medical Association, American Academy of Pediatrics, or the American Psychiatric Association. The American Academy of Pediatrics has stated as recently as 2022: "Robust evidence demonstrates that access to gender-affirming care decreases risk of suicidal ideations, improves mental health, and improves the overall health and well-being of transgender and gender-diverse youth." You are harming children with this law. You are killing children with this law. All while you have the nerve to hypocritically attempt to put blood on the hands of the providers that are saving lives. This law is not based in science or any dimension of reality. It's more culture war nonsense funded by groups that want trans kids to die. It is a monstrous law.

Denying children access to medical care that will help them to exercise their individual rights and be themselves will cause more harm. Preventing children from accessing care that will build their self-esteem and confidence will lead to more harm. According to the Missouri Department of Mental Health, "In the United States, lesbian, gay, bisexual, transgender, or questioning (LGBTQ) individuals are over twice as likely to experience substance use, depression and anxiety, and 4 times as likely to have suicide attempts compared to those identifying as straight.^{1,3} Missouri data shows similar patterns." This bill will worsen these statistics.

I am writing in opposition to these and any bills targeting transgender students and athletes. These bills are a waste of taxpayer money, a direct attack on transgender kids and their parents, and should not be considered until Missouri's House meaningfully addresses real issues that impact taxpaying, working families like improved healthcare access, better wages, and reliable infrastructure. With only a 4-6 trans athletes in our state, certainly the number of bills being presented seeks to harass constituents, accomplish nothing for taxpayers, and create artificial outrage for the purpose of Missouri legislators putting donor money into their campaign accounts. I call on Missouri's elected officials to take stock and properly prioritize legislation that will make a meaningful difference in supporting the freedom and liberty for all Missourians, not just ones affiliated with party or political clout.

Republicans across the state exert that we deserve freedom. Republicans across the state exert that parents/guardians deserve to have control over their children's education and how children interact with the world every nanosecond. How do you justify stripping the freedom of a parent/guardian to be in charge of the medical needs of their child in consultation with a medical doctor?

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

My name is Brittany Dyer. I live in Springfield, MO and I oppose HB419 I stand before you as a foster mother, a part of the LGBTQ community and a former student athlete through the collegiate level On the volleyball and basketball court is where I learned how to win and lose. I learned how to work hard as an individual to be successful as a team. I learned how to push myself through the moments that I felt like quitting or giving up. That court was also my safe space. The place where I could quiet my mind and focus on the task at hand. As a closeted lesbian in a class of 55 students in rural MO a quiet mind wasn't easy to come by. I was filled with self-hate, longing to just feel normal, and sleepless nights trying to pray away the gay so to speak. I was like the staggering 60% of the LGBTQ+ community that was struggling with anxiety and depression and I needed an escape, that was sports. Beyond all the invaluable life lessons I learned from playing sports, sports quite literally saved me from my struggle with my mental health. That court was my safe space and is for thousands of students across our state. Every single student should be allowed the right to put on a Jersey and feel what it's like to be a part of something bigger than themselves. Just like you have the opportunity to do here in this committee. Within this room you work together as a collective team to push the state of Missouri forward and to a better tomorrow. Although it is not always well represented within these walls, you do serve a diverse state, with each group deserving equal representation and a voice. I have great pride for our country, but I can also recognize the mistakes we have made in our past and see how we can use it to direct our future. If you are a parent like myself you know children learn the best and with the deepest understanding when it's relatable. We must be able to relate to the world our children are living in today. Unfortunately, that world is currently divisive. I wish American history existed without blemishes but it doesn't. A thorough examination of our history is the only way to ensure we don't repeat it. Yes, it will create some difficult and sometimes emotional conversations in the classroom but that is what pushes us forward. We have the opportunity to start these conversations early and fully prepare our children in how to navigate a divisive world but more importantly teaching them how they can come together and work with their diverse peers to rebuild middle ground. Our state is diverse but our country is even more so, America the great melting pot. If we want our students to be successful in a diverse world, they have to experience diversity and working together at a young age. Capitalize on the innocence of youth that we are always so envious of, their ability to see through all social barriers without judgment based on your skin color, the way someone looks or who they love. To protect the lives and innocence of our children we have to start with their mental health by reducing their anxiety and depression. That cannot be done if we don't allow them equal visibility and representation in the school setting. I'll leave you with two quotes, one by Winston Churchill "Those that fail to learn from history are doomed to repeat it." And one from my 7-year-old son "all of my friends should have books that look like them because I do. It's not fair because everyone is different

and that's ok."

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.		

January 24, 2023
 The Honorable Rep. Alex Riley
 Chairperson, General Laws Committee
 201 West Capitol Avenue
 Jefferson City, Missouri 65101
 Re: **OPPOSITION to HB 419, a bill to deny medical treatment for trans youth**
 Dear Chairperson Alex and Members of the General Laws Committee:
 American Atheists, on behalf of its constituents in Missouri, writes in opposition to HB 419, a controversial bill which would intensify systemic discrimination against trans youth in Missouri. HB 419 would take away choices and support for an already vulnerable population. We urge you to vote against this discriminatory bill. American Atheists is a national civil rights organization that works to achieve religious equality for all Americans by protecting what Thomas Jefferson called the "wall of separation" between government and religion created by the First Amendment. We strive to create an environment where atheism and atheists are accepted as members of our nation's communities and where casual bigotry against our community is seen as abhorrent and unacceptable. We promote understanding of atheists through education, outreach, and community-building and work to end the stigma associated with being an atheist in America. We reject efforts to undermine the support and well-being of gender diverse youth based on the religious beliefs of lawmakers. HB 419 is an extreme political attack on trans people. Best practice medical care for trans youth simply delays puberty until young people are old enough to make their own decisions about their lived gender. This bill aims to take away their choices and tries to prevent them from having the chance to live as the gender they know they are inside. Trans children, like any children, have the best chance to thrive when they are supported and can get the health care they need. This bill would take that away from trans youth. It displays a fundamental lack of understanding of trans children and bans best practice medical care for trans youth that is backed by the American Academy of Pediatrics, the American Medical Association, and other leading health authorities. Patients and their healthcare providers, not politicians, should decide what care is in the best interest of a patient in accordance with current medical best practices. It is impossible to understand what it's like to have a trans child, especially if you have never met someone who is trans. Parents of trans children, like most parents, simply want to do what is best for their child, including working with doctors to ensure that their child has access to the best care possible. Politicians are putting the lives and well-being of trans youth at risk. Denying best practice medical care and support to trans youth can be life-threatening. It has been shown to contribute to depression, social isolation, self-hatred, risk of self-harm and suicidal behavior, and more. More than 1 in 3 trans youth have reported attempting suicide within the past year, compared to only 7 percent of their cisgender peers. But research shows that trans youth whose families support their gender identity experience a 66% decrease in suicidal thoughts, a 76% decrease in suicide attempts, and significant increases in self-esteem and general health. Being a kid is hard enough. We do not need politicians making it even harder for kids who are trans by interfering with personal medical decisions

and singling them out for increased bullying and harassment. Finally, this bill threatens anyone who is supporting a trans child's medical care. This is a gross overreach of governmental power. HB 419 further threatens providers with license revocation if they help their patients receive best practice medical care supported by organizations like the American Academy of Pediatrics and the American Medical Association. It would punish providers who are simply trying to do what is best for their patient. We urge you, please do not deny trans youth the care that they need, do not contribute to the discrimination against trans young people, do not penalize doctors for doing right by their patients, and do not threaten parents with neglect or abuse for seeking medical care for the child. **Reject HB 419.** If you should have any questions regarding American Atheists' opposition to HB 419, please contact me at bwilliams@atheists.org. Sincerely, Brittany Williams
State Policy Counsel
American Atheists

These bills do not represent my will as a constituent. Even as a straight man, I believe part of freedom in America includes expression of self. These laws are government overreach in its purest form. Let families and doctors speak with their children and patients about these matters, don't decide from your perch that it's wrong for everyone.

You're disingenuous slime, using children as political footballs with no consideration for their well-being and God will curse you for your participation in such hatred. I'm strongly opposed to this bill, which isn't even based in reality, considering that children under 18 aren't even allowed to surgically transition, except under extreme circumstances. If you actually cared about helping children, you wouldn't spread lies about litter boxes and gender transition, but would instead try to protect them from hateful rhetoric like this.

This bill is disturbing, disgusting, and mutilates the facts about trans children, and trans individuals overall. You know how you can ACTUALLY help the children or Missouri? Stop trying to ban their existence, stop spreading hate for children who want to be loved, stop your attempts at genocide. In reality that's what this would start, a trans Genocide. Please vote no on HB 419, for the sake of our children and our country.

I am the mother of a transgender child. His name is Chase. He always entertains us with his dry sense of humor. He is a straight A student. He is a member of future farmers of America (FFA) and even raised the cow that is currently feeding our family. He is building and painting sets for the high school play. He loves animals and calms every dog, cat, and mule he's ever pet. He cares for his siblings dearly and makes them homemade gifts on holidays. He loves being outdoors and is at ease kayaking our local rivers. As Chase would tell you himself, being transgender is the least interesting thing about him. He is so many other things. Its not a topic of conversation among his friends it school. It doesn't matter and his peers don't care. He's just Chase. A teenager in high school trying to become a happy and successful adult like everyone else. These bills attacking LBGTQIA+ youth in Missouri are inhumane, morally wrong, and full of misinformation. Offering "affirmation care," does not mean sex change. There are about a million steps in between a trans person coming out and surgery. And I can assure you, that we are not "coercing" our children into surgery. What we are doing is listening to them, finding counselors, psychiatrists, support groups, and anything else we can to support our children. These are all examples of affirmation care. With so many major issues impacting our state (poverty, education, crime, infrastructure), why is there so much attention/attacking on a group that is less than 1% of the population? If we are so concerned about our youth, why do we rank so low in child poverty and education? I encourage you to protect your child by any means you believe are right for them. I encourage you to protect my child with your vote. "This is a political mission that doesn't actually protect youth, but further defends the fears and phobias of some adults," Justice Horn

No doctor will prescribe irreversible treatment to a minor. I mean barring all those circumcision that get doled out at birth, but a child will start gender affirming treatment with hormone blockers which are regularly prescribed in other situations (early onset of puberty) and have no lasting effects when a child stops taking them. At 18 HRT becomes available and at that point are they a kid?

From school-aged children to high school students, know what's in their heart. They're taught right from wrong and they're able to make sound and just decisions based on their decision-making, feelings & environment. Anyone who says that transgender aged-children and students are falsely making claims or do not know what they're talking about is incorrect. HB 419 will directly negatively & dangerously affect trans and queer students who are finding their identity and existence in Missouri. Make the correct decision for the safety, health, healthcare & livelihoods of children in your communities.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.		

This legislative session in Missouri is the most dangerous one we've seen in many years. Missouri has the dishonorable position of having introduced the most anti-LGBTQ bills of any state so far this year. I thought America was founded on principles of freedom, life, liberty, and pursuit of happiness. Maybe it's supposed to be, but the current Missouri legislature is working hard to target and oppress a minority group of people and children, who want nothing more than the rights and opportunities afforded to the rest of the country. They have a hard enough time in life, without the state government actively searching for ways to cause them more harm. This is a targeted hateful overreach and the Missouri government does not belong in Missouri families lives. All kids deserve to play sports as the gender they identify as. Kids' aren't losing out opportunities to be a professional, college scholarships or anything remotely like that, due to a few transgender kids that want to play sports. This is a non-issue in the state of Missouri, and an excuse for some lawmakers to target a vulnerable group of children. This state has so many more problems that need addressing than whether a transgender kid or two want to play a sport. Go fix some real problems in Missouri that require critical thinking, rather than picking on kids and family civil liberties. Missouri kids should be allowed to get treatment that the American Medical Association advocates for in this country. There is no place for the Missouri government to interject itself in to family medical decisions and civil liberties of the citizens. Missouri lawmakers should be working towards advancing all healthcare, not regressing it because some people don't understand it, or have personal experience. These bills will contribute to a downward trend of overall medical care, as quality doctors will leave the state, and new ones will not want to come in. The bill targeting adult cabaret performances is another solution in search of a real problem. There is no issue here, and Missourians are free to ignore and not attend performances they aren't interested in. This is another excuse to target a minority group of people, in order to take away their civil liberties, and damage their lives and other career opportunities. If these hateful bills become law, more businesses will leave the state. More people will leave the state. More money will leave the state. Fewer people and business will come to this state. I have lived almost my entire life in Missouri and have been proud to be from Missouri. However, I've watched sports teams leave for better opportunities and thrive. I've seen businesses leave for better opportunities and take jobs with them and thrive. I don't want to watch the state become more hateful, and become an more oppressive place, forcing more people to flee. Missouri doesn't have the same resources and allure of many other states in America. It has to work harder to compete. Don't give people and business another reason to leave or avoid Missouri. Please don't advance or pass HB 170, HB 183, HB 337, HB 419, HB 463, HB 540, and HB 498. Get rid of them and any other copycat bills like them. They are bad for the people of Missouri and they are bad for the business of Missouri. There is no place for this hate in Missouri, regardless of political party. All Americans and Missourians should be free to be who they want to be,

and live how they want to live.

Missouri children deserve to grow up in a state that doesn't want them to change or leave. This bill will harm parents, children, teachers, community members and Missourians who could offer their skills to the state if they weren't pushed out by hateful legislation.

The State should not be inserting itself into complex medical decisions. The physician/family/patient relationship should be respected. Making sweeping legislature based on fear when there is clear data that gender-affirming care saves lives is unethical and harmful. This bill is made solely to isolate trans children and their families.

People of faith believe that we're all called to respect the fundamental dignity of all people and to treat others as we want to be treated, including those who may seem different from us. When we do that, we are truly living our faith. This bill is not that. Supporting fundamental protections for all Americans is important to people of faith because LGBTQ Americans are our friends, our neighbors, our family members and our coworkers. When it comes to being able to earn a living, having a place to live, or being served by a business or government office, LGBTQ people should be treated like everyone else. You can not choose someone's identity. It belongs to them only.

I am a graduate student of the University of Denver. I study counseling psychology with the intent to become a licensed therapist. During my education, I have both worked with children and studied childhood development. In a study conducted by Princeton University, after 5 years of socially transitioning, 94% of the children involved in the study maintained their identity as transgender. We do not question when children are heterosexual or cisgender. We trust in their ability to examine their own thoughts and feelings. Why is it any different for LGBTQIA+ children? Please, for the sake of the mental health of these kids, allow them to express themselves and move forward with affirming their identity.

The process to start the gender reassignment process is well documented in both the medical and psychiatric fields, No one is rushing anyone through the process. It is a long and arduous road to travel and for a child that has supportive parents and a medical advisor, why should the state step in and force someone to live with a disorder when treatment is available?

Hello, My name is Danielle Kozemczak and I am a resident of St. Louis, MO. I am greatly concerned about House Bills 419 and 463 that are being presented today to the General Laws Committee. I would have rather testified in person, but I was not given the time to plan on driving to Jefferson City. I would like to express my opposition to banning or restricting gender affirming healthcare for Missourians. My oldest child is trans and I have witnessed first hand how gender affirming treatment can save lives. My child has struggled with suicidal ideations and attempts. During his last attempt in 2020 I had to wrestle him to the ground to keep him from stabbing himself with a broken glass. He was 14 years old at the time. While he has benefitted from a variety of treatments, I feel that treatment for his gender dysphoria has been the most impactful treatment. The relief and joy he has expressed is significant. He has been going to the Trans Clinic for years now and sees a licensed therapist. He began testosterone treatment six weeks ago. This was a decision he made after educating himself extensively. As his parent, I also informed myself of the side effects and benefits from treatment. I realized that if I wanted my child to live gender affirming care was essential. Please understand that this treatment is essential in keeping my child alive. Statistics have shown that youth who are LGBTQ+ are at a higher risk of death by suicide. The American Academy of Pediatrics supports gender affirming care. Please let children and youth, their parents, and their doctors make these decisions. This legislation will kill transgendered children and youth. It will create a hostile environment for them in Missouri. Please don't Support HB 419 or HB 463.

HB 463, 419 and 540 are nearly word for word identical, and eerily similar to other bills around the country, as if some national clearinghouse is writing them to disseminate them. I have been around adolescents nearly my entire adult life, as a teacher, volunteer and parent. I have seen students struggle to find their authentic selves in many ways, to struggle to fit in. To work to hide themselves away. Finally, in the last decade, something changed and students no longer have to worry, to suppress their hearts, their beings as much. Some of them at least. As you've heard today, and last year when these bills came up, being able to be who they are, truly are reduces suicidality. Having supportive adults in their sphere reduces it even further. Forcing adolescents to suppress their true selves, to prohibit them from being who they are, to prohibit and criminalize their parents and doctors for making the best medical decisions for their children and patients will absolutely harm these kids. I have attended funerals for students who had to deny their best selves. Have you? It's just awful. Some of the same people bringing these bills forward are also pushing Parents Bills of Rights. I guess it is only some parents and some rights. Please oppose these dangerous and hypocritical bills.

I object to the way this bill has been named. It is prejudicial in it's wording. How can a bill with a name like this get a fair vote?! I have a granddaughter with gender dysphoria. She was suicidal at the onset of puberty. She was treated for depression by several doctors and child psychologists to the point she was reduced to a shadow of her former self. They were trying to save her life. It wasn't until she could articulate her gender dysphoria that she received the correct treatment, using hormone blockers. She was able to stop hating herself, stop trying to kill herself, return to school and continue with her life. She is now a happy, well adjusted young lady ready to start college. Not all adolescents have the same experiences in life, some need the life saving medical treatment (hormone blockers) at the correct time. Do not take this treatment option away from qualified doctors who only want the best for our children in Missouri.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

These three bills have been constructed without discussion from leading medical professionals, psychologists, psychiatrists, social workers, or counselors. These bills stand in direct contradiction to the evidence-based research and current clinical guidelines endorsed by national and international experts. They contain no references to any clinical guidelines of care from the World Professional Association for Transgender Health (WPATH), the American Academy of Pediatrics, the American Medical Association, the American Psychiatric Association, or The Endocrine Society. Not only do these bills not reflect accurate medical research, they also did not come from speaking to the thousands of transgender youth, teens, adults, or parents who have transgender children about their healthcare needs. Are you aware of a landmark study published by “Pediatrics” found that if trans adolescents and teens have access to puberty blockers, their chance of mental health struggles significantly declines? I didn’t need a study to know that. Before the procedure to get a puberty blocking implant, my then 11-year-old said, “I’m scared to death to get an implant, but I will want to die without it.” That’s why I am deeply offended that these bills are ironically named the “Missouri Save Adolescents from Experimentation (SAFE) Act” and the “Missouri’s Children Deserve Help Not Harm Act”. Nothing about this healthcare is experimental and nothing about these bills will be saving children like mine. But these bills and hearings for them do cause real harm to our kids. When my family has discussions about these kinds of bills, my child says “They want to take away the one thing that makes me feel confident about my life and that I can have a future. If I can’t keep my blocker and start hormones, I don’t know if I’ll make it 18.” These bills are extreme government interference. They would strip my child and other transgender youth of the “promised” opportunity to be guided and supported in making the healthiest decisions for themselves. They interfere in the fundamental rights of parents to direct the care and control of their child’s education and medical care that Missouri legislators claim to believe in. Passing these bills would not be keeping my child safe or help them in any way. Period. To the contrary, these bills will cause many trans youth to completely lose hope and possibly attempt to take their lives. The health care providers who treat our children, who get to know them through multiple visits — sometimes for years before there is any medical intervention needed — have all sworn an oath to “do no harm.” Have you done the same?

I hereby state my opposition to this bill. As a healthcare provider, I believe that this bill stands in the way of young individuals receiving life-saving care. Individuals with gender-identity concerns are at significantly higher rates of suicide and self-harm than their peers, due to the social pressures put on them to conform, as well as adults in their lives not supporting them. As it stands, individuals seeking gender affirming care already need to undergo rigorous screening processes and healthcare providers do not take it lightly. I urge lawmakers to consider the damage that can be done when considering legislation such as this.

Would you deny a child treatment for cancer? For mental health? For genetic deformities? This bill sounds like that is exactly what you would do. You have just chosen to deny health care to children facing sexual identification challenges you don't understand. Discrimination for any reason is wrong, and worse when based on information so generalized that it will harm many children.

Research published 1/18/23 in the New England Journal of Medicine evaluated 315 transgender youths between 12 and 20 years old over the course of two years while they were being treated with gender affirming therapy. This study showed that access to puberty blockers and hormone therapy can improve mental health outcomes, including reducing suicidal ideation, among transgender youths. American Medical Association and American Academy of Pediatrics oppose efforts to restrict gender affirming care for minors. Gender affirming care is healthcare, and standard of care. The government does not need to be dictating the decisions that need to be made by patients, doctors, and parents. As a parent of an adult transgender daughter, I can testify to the desperate need for access to healthcare for all transgender individuals.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

To: House Committee on General Laws From: Children's Mercy Hospital – Kansas City Date: January 24, 2023 Re: Written Testimony on HB 419, HB 463, and HB 540 Dear Chairman Riley, Vice Chair Hicks, and Members of the Committee: On behalf of Children's Mercy Hospital, thank you for the opportunity to offer testimony on these bills. We are concerned HB 419, HB 463, and HB 540 would prohibit healthcare professionals from providing evidence-based care that is well established by professional clinical practice guidelines. Children's Mercy Hospital is a leading independent children's health organization dedicated to holistic care, translational research, breakthrough innovation, and educating the next generation of caregivers. For over 125 years, we have provided world-class pediatric care to the children of Kansas City and our region. We are ranked as one of the best children's hospitals in America by U.S. News and World Report, ranking in all 10 specialties. Our Gender Pathways Services (GPS) Clinic is focused on the long-term physical and mental health outcomes of our patients. Transgender and gender-diverse youth experience higher rates of suicidal ideation relative to the general pediatric population. Studies indicate over half of transgender youth have considered suicide. Studies also demonstrate that gender-affirming care improves mental health outcomes and reduces suicidality for transgender and gender diverse youth. Our Clinic obtains parental consent for medical treatment as required by law. We practice family-centered care and partner with families and patients to create individualized treatment plans that thoroughly evaluate and explain all aspects of any suggested course of treatment. Established clinical practice guidelines recommend against initiating gender-affirming medical treatments until after youth reach puberty. Children's Mercy Hospital does not perform gender transitioning surgeries. We have serious concerns about the effects of these bills on the patients we currently serve in the GPS clinic. These three pieces of legislation would restrict our healthcare providers' ability to provide established, safe, and critical gender-affirming care for our population. Established nearly a decade ago, our GPS Clinic is a pediatric multi-disciplinary approach to provide evidence-based care after a diagnosis of gender dysphoria is made by a licensed mental health provider, such as a therapist or psychiatrist. Our professionals provide interdisciplinary, family-centered services for transgender and gender-questioning patients. Our GPS Clinic follows established clinical practice guidelines from the Endocrine Society and the World Professional Association of Transgender Health. Patients who visit our GPS Clinic see providers in endocrinology, adolescent medicine, and psychology. Additionally, we offer patients and families social worker and hospital chaplain support. The interdisciplinary team and family collaborate in creating treatment plans, and the care we provide is thoughtful, deliberative, and focused on the individual patient's physical and emotional health needs. Every situation and patient is unique. There is no one-size-fits-all treatment. We thank this Committee and the Missouri General Assembly for their efforts to protect children's health, strengthen the mental health support system for youth in Missouri, and preserve the doctor-patient

relationship. We fear these three bills would compromise the evidence-based care developed over many years and seriously threaten the mental health of our patients. Thank you for considering our testimony. Children's Mercy Hospital – Kansas City

I urge you to stand strong in support of LGBTQ rights. Stop wasting taxpayer time and money on frivolous bills that would harm the rights of Missourians. There are plenty of issues that need your attention. Please direct your attention to helping the citizens of Missouri instead of attacking innocent people who are already marginalized.

This bill is an ill-informed, unscientific boilerplate bill aiming to block trans children's access to gender-affirmative care on the basis of religiously motivated bigotry masquerading as science. This is not an opinion, but a provable statement of fact. Every claim made here is also made in other states, many of which have been demonstrably discredited, often *by* the same scientists who made the claims. Examples: <https://www.vice.com/en/article/m7gg54/florida-transgender-healthcare-minors><https://law.yale.edu/yls-today/news/team-experts-provides-critical-review-florida-medical-report-transgender-care><https://aeon.co/essays/the-real-reason-why-theres-a-global-rise-in-trans-youth><https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5951646/><https://www.theverge.com/22590708/trans-youth-gender-affirming-healthcare-bans-science><https://sciencebasedmedicine.org/what-the-new-york-times-gets-wrong-about-puberty-blockers-for-transgender-youth/>The entirety of this effort is predicated on nonsense, and you know it full well. I know this comment won't change anyone's mind, because those pitching these bills are shameless ideologues. But we know, and the world knows, that nonsensical bigotry is what these bills are.

I am writing in serious opposition to the following bills: HB183, HB337, HB419, HB463, HB540, HB494, HB498. As a parent, it is upsetting to me that my friends whose children don't identify as binary or cisgender, would be targeted in such a way. It is firmly understood in the scientific and medical community that these people exist. They exist, and they identify themselves when they are CHILDREN. The only way to keep them safe from self-harm is to affirm their identities. The only way to keep them safe from harm from others is to build tolerance and allow them to be seen and understood. By attacking these children's capacity to participate in extra-curricular activities and to seek medical treatment (which is again, well documented as life-SAVING treatment), you are in a very real sense, erasing them. I beg you to do some actual research into transgender and non-binary children and adults. Please, look at the vast evidence we have at our disposal of how to keep ALL children safe and properly cared for. As a legislator, I think it's important to always consider the following about proposed laws: Who does this help? Who does this harm? These bills do nothing to help your constituents. All they do is harm. Thank you, Gina LaRose

Trans healthcare, otherwise known as "gender affirming care", has been widely studied and generally agreed upon by every major medical organization in this country and several others across the globe. This bill is not about protecting kids but instead harming kids who need access to specific healthcare to live happy and healthy lives. If you want to actually protect children you wouldn't be getting in the way of their ability to make decisions with the help of their doctors and parents/guardians.

Hello, my name is Lear Rose and I am a gender nonconforming transgender individual who resides in the second district of Missouri. Gender, affirming care can be necessary and life-saving intervention providing hope for individuals like me. According to the Trevor project 54% of young people who identify as transgender or non-binary seriously considered suicide with in the past year gender, affirming care has proven time and time again to improve the mental health of transgender individuals, saving lives. It is despicable to take away, children's bodily autonomy and hope for a better future. Trans youth deserve to be protected not criminalize. Medical decisions to be made on behalf of the patient and doctors and parents not the state. trans. Gender and gender nonconforming people have the right to live in access medical care like anyone else. from the bottom of my heart, I urge you to stand with gender, nonconforming and transgender people for the protection of their bodily autonomy.

I am in opposition to this bill. I do not believe that the Missouri House of Representatives should be practicing medicine without the requisite training and education. This is an issue to be addressed by medical experts, the child and the child's parents. Missouri has become the poster child for the Death of Expertise. Who wants to seek an education or work in a state where the expertise of doctors, librarians, teachers are disrespected by the elected leaders of the state??

It is intriguing to me that the sponsors of this bill focus solely on purported negative effects of hormonal treatments and surgeries, while completely ignoring the beneficial effects of these treatments as recognized by numerous medical organizations. By the same arguments advanced in this bill, it would supposedly be prudent to ban chemotherapy treatment for various forms of cancer, as according to the American Cancer Society, side effects can include infertility, anemia and other blood disorders, bladder and kidney damage, nerve damage, psychiatric effects, and many others (and at much higher rates than seen in hormonal treatment). I would hope that the sponsors would not seriously advance the banning of chemotherapy for children or adults based solely on negative side effects, as there are numerous life-sparing benefits to this treatment. In much the same way, there are numerous benefits to hormonal and surgical treatment for transgender children, but these are summarily ignored in this bill for apparently-ideological reasons. History will not look kindly upon those who put their names on this craven attempt to score cheap political points.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

The Missouri Chapter, American Academy of Pediatrics, representing more than 1,100 physicians, trainees, and pediatric-providers across the state of Missouri, strongly oppose legislation which infringes on the family patient and medical professional relationship. Our members recognize that child development is a complex and, at times, highly emotional experience for all involved and seek to provide care in a way which addresses the social, emotional, and physical health of both the child and their family. Our member standards of care utilize the most up to date medical research and evidence-based guidance available to emphasize and promote the long-term health and development of children in a way which encompasses the full spectrum of care for the child and family - including mental health, social resources, and medical care. Our members fully support the family unit, including parents and guardians, making appropriate medical decisions for the care of their child in consultation with medical professionals, and speak in strong opposition to legislative attempts to undermine this relationship. Finally, we reiterate that at absolutely no point in time are surgical procedures which impact the fertility or reproductive ability recommended, performed, or considered for our patients before they enter adulthood at the age of 18. While gender affirming care can be a complex process, evidence-based standards of care utilize decades of research, hundreds of peer-reviewed studies, and the most up to date medical information to develop age-appropriate care for Missouri's children and families.

Let kids be kids. Children deserve to be who they are, without having politicians tell them who they should be. Transgender teens are more than 7x more likely to kill themselves than cisgender teens, and it's because of attacks like this cruel legislation that marginalize them. I have friends and loved ones who are trans, who have known since they were kids, just like I've known since I was a kid that I was cisgender. And for kids who aren't sure, growing up is discovering who you are and becoming comfortable with yourself, which can include discovering and evolving with your gender identity. The politicians putting forth this bill are robbing children of this process and from themselves. The American Pediatric Association supports gender affirming care—The experts have shown that this care saves lives. Do not bar children from receiving needed medical care just because you don't understand or because it scores political points. I would hope that if it was your child, that you would open your heart to them. Do the right thing and oppose this bill.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.		

Hello. I am a St. Louis, Missouri born-and-raised resident, and I am opposed to all of your policies attempting to eliminate transgender people from our state. I am a 22-year-old transgender man, and I began my medical transition as a minor (days before my 17th birthday) in Missouri in 2017. Myself and my other transgender friends have absolutely no regrets about the decisions we made and the treatment we received. I live every day fulfilled and loved as the man I was meant to be. Everything you are citing and saying are conspiracy theories fueled by hate and the need to control bodies that are not yours. I hope that recognize the error of your ways and listen to science and the people about whom you speak. Every person deserves access to the healthcare that they need to survive.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

You are not practicing health care providers, you are not educated enough to make the statements that are made in this bill. If you remove the rights of these young Missourians to have the health care that they are entitled to you are dooming multiple generations to leave Missouri, resort to unsafe care facilities, or end their own lives. The suicide rate for trans youth is significantly higher than any other grouping, and multiple studies have shown that this is only elevated by allowing them access to health care and health care providers that meet their needs and don't demonize them for being who they are. This bill will not prevent harm, it is being proposed to insight violence and harm to trans youth, either by their peers, their health care providers, or themselves.

These bills will result in children's death and self harm. Children have a right to be who they are and when adults deny them the ability of self determination and experience of diversity, you politicians are in fact stopping their ability to grow and develop in a healthy manner. You politicians are brainwashing children. These bills will harm children and and everyone in my family oppose these bills.

This bill is incredibly dangerous. Medical transition saves lives. If lawmakers cared about helping Missouri children, there would be bills in place for funding healthcare, schools, public libraries, and mental health resources. Bills like these are a slippery slope into excluding ANYONE who needs hormone treatment or other health care that could be related to transition from the resources they need to live happy and healthy lives. Please consider, for once, not being blinded by hate and disgust for people who do not hurt you and simply try to live their fullest life, and recognize that bills like these do nothing but harm. The prejudice, bigotry, and utter ignorance on display in bills like these is revolting.

So distant from reality and the *reliable* empirical evidence available. Another reason we need more medical professionals who *actually* work in gender affirming care in state government. Once again, this is a made up solution to a made up "problem." To think that a kid can just prance into urgent care and get gender affirming care is so far from the truth. Let doctors do their jobs for once.

My name is Hannah Shanks. I am a woman, a Missourian, a mother, and a Christian. I oppose this bill on all of those grounds. This bill does the exact opposite of its titular purpose - this bill heaps harm on trans youth and their families. As this body has heard over and over again from families, experts, doctors, teachers, and mental health providers - bills like this and the practices proposed within demonstrably harm trans children, adolescents and adults. This body has heard over and over again that when bills like this are in public debate, and when policies like this are implemented, crisis calls to suicide hotlines for trans youth drastically increase. Missouri's children do not deserve harm - no matter who they are, no matter how they live, no matter what they need. Listen to the voices of impacted families. Listen to the medical doctors, mental health providers, and other experts who continue to come before this body and kill this bill.

Missouri children to deserve help, weather that entails therapy or gender affirming care, is between them and their doctor's. If a child chooses to undergo gender transition socially and medically then it will only do so under strict adherence to the DSM-5 and only after a significant amount of time and therapy sessions. robust international consensus in the peer-reviewed literature that gender transition, including medical treatments such as hormone therapy and surgeries, improves the overall well-being of transgender individuals. The literature also indicates that greater availability of medical and social support for gender transition contributes to better quality of life for those who identify as transgender. Research Findings¹. The scholarly literature makes clear that gender transition is effective in treating gender dysphoria and can significantly improve the well-being of transgender individuals.². Among the positive outcomes of gender transition and related medical treatments for transgender individuals are improved quality of life, greater relationship satisfaction, higher self-esteem and confidence, and reductions in anxiety, depression, suicidality, and substance use.³. The positive impact of gender transition on transgender well-being has grown considerably in recent years, as both surgical techniques and social support have improved.⁴. Regrets following gender transition are extremely rare and have become even rarer as both surgical techniques and social support have improved. Pooling data from numerous studies demonstrates a regret rate ranging from .3 percent to 3.8 percent. Regrets are most likely to result from a lack of social support after transition or poor surgical outcomes using older techniques.⁵. Factors that are predictive of success in the treatment of gender dysphoria include adequate preparation and mental health support prior to treatment, proper follow-up care from knowledgeable providers, consistent family and social support, and high-quality surgical outcomes (when surgery is involved).⁶. Transgender individuals, particularly those who cannot access treatment for gender dysphoria or who encounter unsupportive social environments, are more likely than the general population to experience health challenges such as depression, anxiety, suicidality and minority stress. While gender transition can mitigate these challenges, the health and well-being of transgender people can be harmed by stigmatizing and discriminatory treatment.⁷. An inherent limitation in the field of transgender health research is that it is difficult to conduct prospective studies or randomized control trials of treatments for gender dysphoria because of the individualized nature of treatment, the varying and unequal circumstances of population members, the small size of the known transgender population, and the ethical issues involved in withholding an effective treatment from those who need it.⁸. Transgender outcomes research is still evolving and has been limited by the historical stigma against conducting research in this field. More research is needed to adequately characterize and address the needs of the transgender population. <https://whatweknow.inequality.cornell.edu/topics/lgbt-equality/what-does-the-scholarly-research-say-about-the-well-being-of-transgender-people/>

Is Representative Hudson a doctor? Does he know more than the American Medical Association? Does he know more than the American Academy of Pediatrics? Does he know more than Endocrine Society? Does he know more than the American Psychological Association? Does he know more than the American Psychiatric Association? Does he know more than the Pediatric Endocrine Society? These are just a few of the organizations who support-if certain requirements are met-gender transition therapy among adolescents. In total, there are more than two dozen American based medical organizations who support gender transition therapy among adolescents. Does Representative Hudson know more than all of these groups? Representative Hudson is a Pastor. How does this in any way qualify him to make medical decisions for families? This issue is about liberty and freedom. Individual children and their families should have the option to pursue gender transition therapy without fear of reprisal. Doctors, experts in their field, should have the ability to treat individual children deemed by their care team to be able to access such therapies, without the fear of criminality or professional sanction.

I am a citizen of this state, concerned about the well-being of our youth and families affected by the 8 bills scheduled for the hearing this afternoon. This bill, in addition to the others on the schedule today, January 24, 2023, would take away the freedom to access gender-affirming health care, legislate kids' sports and ban trans kids from playing sports where most appropriate, and would attack drag shows. We have REAL issues in this state and these bills are a cruel distraction from solving real problems Missourians are facing. These bills would have real-life tragic consequences for youth, families, and businesses in this state.

Hello, I am writing today in regards to HB 419 and 463. I will not restate their titles as I find them outrageous and offensive. I find it ironic that in a state that has only made it easier for the mentally ill and deranged to obtain automatic weapons, that any of our conservative legislators would dare to utter the words "protect our children". It is currently, and will probably always be, easier to obtain and distribute fentanyl in Missouri than estrogen and testosterone. And yet our legislature is OBSESSED with "protecting our children" from a threat that does not exist. Go outside. Go to a store. What do you see? Men and women. Or has that changed? Have any of the Republicans in the chamber been to a public place recently? You all are legislating like you haven't. We should be spending our time trying, as a state and a nation, to ACTUALLY protect our children, not to turn incredible parents who LISTEN to the NEEDS of their children into felons and criminals for nothing other than spite. That is why I oppose these two bills. Thanks, Jason Gober

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

My name is Jen Bernstein, and I am submitting this testimony in opposition of HB 419 on behalf of the National Council of Jewish Women St. Louis (NCJWSTL). NCJWSTL is a non-profit organization in metropolitan St. Louis, representing over 5,000 members and supporters throughout the state. We focus our work on community service, advocacy, education and philanthropy to improve the quality of life for women, children and families while supporting individual and civil rights, and have been doing so since 1895. We are opposed to this bill because it would cause active harm to trans kids. We care about all children in this state, and trans kids are at extreme risk for self harm and suicide. This is just entirely unnecessary and cruel.

Trans individuals should have access to transition services at any age. Research has shown that trans individuals have a 98% satisfaction with their transition and very few have regrets. Trans individuals are also EXPONENTIALLY more likely to commit suicide, which reduces significantly if they are able to have transition services. Adolescent suicide should be something Republicans are interested in preventing as the “pro-life” party, but sadly I know that is not the case.

The government has no right to tell an individual how they feel. If they want to transition into the body they believe is right for them, stay out of it. That is between the individual, their doctor, and hopefully a supporting family.

I have a transgender son and this bill will be devastating for him. When you have a child with gender dysphoria, gender affirming care can be the determining factor in whether your child lives or not. The health risks are secondary to the high suicide rates of dysphoric adolescents that don't receive gender affirming care. As a father I strongly oppose this bill. I am asking you as a fellow father to not put children's lives at stake and vote no on this bill.

Gender affirming care is widely accepted and used by the medical community. Any care like puberty blockers is done under the care of a doctor, likely multiple doctors, in concert with parents or guardians, and the child. The fear mongering around this issue is unacceptable. Trans kids exist, their experiences should be valued, and decisions on their care should be left between their doctor and families. You aren't saving kids here, you are hurting the most vulnerable among us. Please vote this down.

I am opposed to this legislation because it oversteps the authority of the state by interfering with individual medical and psychological health needs. For the most part lawmakers in the state of Missouri are farmers, small business operators, auto dealership managers, educators, HVAC and guttering installers, marketers, pastors, attorneys, engineers and retired persons. They are not medical and psychological practitioners. They are not trained to address medical and psychological conditions and determine if, when and how these conditions are treated. As such, they must not regulate medical and psychological conditions and the procedures needed to address these conditions. They must leave these matters to the trained, skilled medical and psychological professionals that recognize and understand the impacts of these medical and psychological conditions on their patients and the value in providing treatment to address these conditions. The state legislature is demonstrating its ignorance by attempting to regulate medical and psychological conditions and treatment procedures.

This bill ostracizes an already vulnerable demographic, and exists to promote a moral panic about trans people. Trans people have existed for all of humanity; they deserve to be treated with dignity and respect, which includes access to (often life-saving) gender affirming care. This bill seems to operate under the mistaken belief that people under the age of 18 cannot be trans, or do not need access to gender affirming care. Trans people do not spring into existence at the age of 18; they are born as children like everyone else. As they grow and come to know themselves, why should they be denied access to necessary medical care as determined by their caregivers and physicians? We would not prevent a minor from receiving medical interventions such as eyeglasses or cardiac surgery, if they were medically indicated and the minor's guardian had given permission. Why should gender affirming care be different? The puberty blockers prescribed to trans youth are the same ones currently used to prevent early-onset puberty in cis children; we know these drugs are safe. Many, many studies have shown the improvement in outcomes for trans people (especially youth!) who are able to access gender affirming care. It would be especially cruel to withhold medical treatment from trans minors since they are already in such a vulnerable position, often ostracized if not by their peers then by their own government representatives. There is simply no reason for government to overreach into the territory of physicians and parents on this subject.

My testimony draft:When my daughter, Rowan, was in preschool she couldn't tell you what she wanted to grow up to be like her peers could. When my daughter, Rowan, was in Middle School, we found bullets in her room - she was planning to take her own life. She was withdrawn, couldn't state her opinions, and would seldom speak at all. When my daughter, Rowan, was 15 she finally told me she was my daughter, and not my son. We knew we needed to listen to this child who had never wanted to grow up. She couldn't bear to grow up into an adult man, like biology had planned. We did what we had to. We helped her access care, and I got my child back as she began transition. She's now bright and social. She has a large group of supportive friends. She's a competitive skateboarder. She is finally happy. Now we have to face down the legislation before the committee today.The bills being heard are all rooted in discomfort around Trans people, and a wish for them to not exist. These acts will prevent Trans kids like banning chemotherapy would cure cancer. Can't have cancer if you're dead, can't be trans if you're dead. Banning gender affirming care will result in dead kids, just like Rowan might have been without Gender Affirming Care.Our family is "lucky." We have the resources to leave the state (we've all lived in our whole lives,) which is exactly what we will be forced to do if these bills pass. The idea what we would be turned into refugees to save our child's life due to Missouri's laws is sickening. The cowardice to target children with your culture war is staggering. Gender affirming care is life saving healthcare. Are you prepared to deny children life saving care? Or does that sound like the crime against humanity it sounds like to me?

Research has shown youth who receive gender affirming care have better outcomes regarding their mental and social health. This bill would directly discriminate against youth and exclude them from necessary medical care. Ultimately, this will cost more for or medical system to rectify later in life, causing larger medical bills, undue burden on already taxed mental health systems.

I oppose the anti-athlete bills (HB 170, HB 183, and HB 337), government overreach bills (HB 419, 463, and 540), and the anti-free expression bills (HB 494 and 498). These do not address real problems in our state and will harm me and my family.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

My name is Dr. Kerri Schafer and I live in Columbia, MO. I am a licensed psychologist, working with college students at the MU Counseling Center, and a board member at The Center Project, Mid-Missouri's LGBTQ community center. I oppose this bill. According to the American Academy for Pediatrics and all other major healthcare associations, caring for a transgender child or adolescent must include affirming their gender. This is rooted in empirical evidence that doing so results in improved mental health, improved quality of life, and perhaps most importantly, reduced suicide risk in the short- and long-term. Research demonstrating that gender-affirming healthcare decreases suicide risk is especially important because transgender individuals are at significantly increased risk for attempted and completed suicide compared to cisgender (non-transgender) individuals. This increased suicide risk is due to the effects of discrimination and oppression (for example, being at risk of losing basic human rights such as the right to appropriate healthcare, having their identities debated in public forums). The same people who want to ban healthcare for trans children and adolescents are also citing essential biological differences between genders as reasons to ban trans youth from participating in sports teams in accordance with the gender they know themselves to be. These politicians want to force transgender adolescents to go through a traumatic puberty and then point to the characteristics developed during puberty as reasons they are a threat to cisgender youth. It seems to amount to an effort to erase and exclude trans youth altogether. For those who are truly concerned about the welfare of transgender youth, please know that gender-affirming medical treatment for a minor involves thoughtful, watchful care from doctors and parents. There are already existing, evidence-based medical standards that require insistent, persistent, and consistent assertions from a child about their gender before initiating puberty blockers, which temporarily prevent puberty. Many youth have been sharing what they know about their gender for over a decade before initiating hormone therapy that would involve permanent bodily changes. Gender-affirming medical care is a medically necessary treatment for gender dysphoria for many youth. Anyone who has been present at the hearings over the last few years can easily recall the pleading from parents who were terrified at the thought of their child's medical care being taken away. These bills would take choices away from transgender youth and prevent them from living as the person they know they are inside. It would punish healthcare providers and parents who care deeply for transgender youth and just want to take good care of them. When it comes to private medical decisions, all of us want the dignity to be able to make those decisions for ourselves and our children, in consultation with a trusted healthcare provider. Please vote in opposition of this extremely harmful bill.

This bill interferes with the relationship between doctors and patients and parents of the patients. It infringes on freedoms in that regard. Also, science says that gender-affirming procedures such as hormone blockers can be reversed and pose no harm to children. It can also provide mental health benefits. This is bad legislation that infringes on freedoms and causes harm to constituents.

What has happened to the legislators in MO? These bills are contrary to national and state values and plain common sense. The GOP claims to be Christian! Why are MO legislators so threatened by people unlike themselves? LBGTQ are not a threat to anyone, any more than heterosexuals are. Why not deal with ACTUAL issues - high maternal fetal morbidity and mortality rates? Poverty? Hunger? Homelessness? Mental health crises? ACT and think like the Christians you claim to be. Sponsoring bills such as these is shameful and wasteful spending of our tax dollars. Do good things instead of forcing your personal or political beliefs on others. THESE are not political issues. These are not problems that require a political intervention. DO work on REAL problems affecting MO residents, especially our vulnerable ones.

As a parent and a citizen of the state of Missouri, I am opposed to this bill, which, if passed, has the potential to cause great harm to children. Gender-affirming care and gender transition procedures save lives. Children and adolescents who do not receive this care are at increased risk for mental health problems and suicide. Many leading medical associations, including the American Academy of Pediatrics, American Academy of Family Physicians, American Psychological Association, and American Medical Association support and affirm the effectiveness, medical necessity, and safety of gender affirming care and gender transition procedures. Please keep our children safe and healthy by opposing HB 419.

The first rule of medicine is to do no harm. The idea that physicians and parents are teaming up to harm children is ridiculous. Any family seeking gender affirming care is doing so because it is in the best interest of their child. No physician will begin care that is age or developmentally inappropriate. These bills banning care are reckless and will endanger the mental health of children, causing increased harm, not reducing any imagined harms. Please spend time actually speaking to the parent of a child experiencing gender dysphoria, or the child themselves. Stop these needless attacks on citizens of our state.

This bill violates every child's civil right. By denying a person (especially a minor) the freedom to govern their own body and gender you are putting these children in grave harm. This is just another bill using government overreach to regulate a marginalized community. Trans children need our support and love not condemnation.

I am writing in opposition to the anti-LGBTQ and blatantly anti-transgender bills that are being discussed. Specifically, HB170, HB183, and HB337 which discriminate against transgender children and adults participating in school sports, HB 419, HB 463, HB540 which deny gender affirming care for those under age 18 as well as HB 494 and HB 498 which attack and criminalize drag performances. All of these bills are unnecessary and are a blatant attack on the rights of LGBTQIA Missourians! They horribly discriminatory and harmful and violate the human rights of Missourians. These bills are (horrible) solutions looking for a problem. They are a waste of time and they are extremely harmful. They will negatively impact the physical and mental health of LGBTQ+ Missourians, who already lead the nation in reports of self-harm. You will kill people if you pass these bills. Again, I strongly oppose all of these bills and they should be rejected.

Trans children deserve to live happy and healthy lives in Missouri and the United States - we cannot pick and chose which children to support and which to abandon. Bills like these have devastating effects on the LGBTQ+ community, and can lead young LGBTQ+ folks to depression, self-harm, increased suicidality, etc. Parents and families deserve the right to make decisions for themselves in regards to bodily autonomy, school activities, gender, and sexuality. If we pass draconian laws targeting trans children, we create a state that is dangerous for not only LGBTQ+ families, but for all Missourians. Why would anyone want to diminish what could be a happy and healthy childhood? We cannot be truly free until we all are free.

Any act that bans Gender-Affirming care for transgender minors is a good way to get those minors to commit suicide. If that was the goal in introducing this bill, then congratulations. If it passes all the blood of children that the House could possibly want will be on the hands of members of the House. There are several studies that have shown that gender-affirming care lessens the rate of suicide among transgender minors.

I am a concerned citizen speaking out in **VEHEMENT OPPOSITION** to HBs 419, 540 and 463! While each of these bills talks about, in overly inflated ways, the health risks to children who seek gender-affirming care from hormones to gender transitioning procedures. They do not in any way discuss the mental health of a single child, in ANY of these bills. These legislators exhibit feigned outrage over the need to, "protect" and "provide care," for MO children yet they do not care one iota about their mental wellbeing. Transgender children have exponentially higher rates of mental health crises, addiction and substance abuse rates and alarming levels of self-harm and suicide instances. Pretending to care about children, while only being concerned for their chromosomal gender-conforming normalities is both antiquated, short-sided and nothing but using false pretenses to force a set of suffering individuals to conform with this legislator's regressive and puritan beliefs. These are the same legislators who cry about vaccinations being mandated, which actually hold demonstrable public utility. Gender-affirming care impacts **NO ONE** but the patient in need of such care. **NOT ONE** person will be impacted, other than the patient. These instances of gender-affirming care are **NOT** under the jurisdiction of the MOLeg any more than are my choice of meds for my sinus infection. This decision should be left to **NO ONE** but a parent, the child in question/in need of care and the medical professional that has been chosen to oversee the medication or procedure. These procedures are safe, regulated and overseen by licensed medical professionals with experience in this type of care. Ignoring the mental health of these children goes against the hypocritical oath of a medical professional and thus should be weighted as equally as physical health, in deciding care for these minors. It is **NOT** up to MOLeg to make these decisions. They will have blood on their hands as more MO children suffer from depression, anxiety and suicide. This type of care is **ESSENTIAL** to the physical health, wellbeing and general safety of all children for whom gender is a source of mental and physical anguish. I have no right to tell you what to do with your child but conversely, you have zero right to tell me what I cannot do for mine. I **STRONGLY** encourage you to vote in opposition of this bill or MO will be known for child suicide rather than protecting children. These bills seek to **HARM** kids, not help them. Don't let the titles fool you, that is all they will cause; **HARM** to children.

Most of what is outlined in this bill is not happening. It just serves to fearmonger and perpetuate a moral panic in the interest of drumming up votes. Research has consistently shown that trans kids are happier and healthier when they have access to gender-affirming care. Suicide rates among trans kids are astronomical when they do not have that access. This bill will kill children, all in the interest of winning political favor. Are you so morally corrupt?

My name is Lisa Spahr. I live in Manchester, MO and parent a transgender youth. Please do not support this bill as it harms children like my own. Caring for my children is my utmost honored responsibility. I have secured the best care for my child. That care has been in place and ongoing for years. I'm not sure why legislators feel they should be putting themselves between doctors and families. My child's care is my responsibility and I do so with highly trained doctors such as endocrinologists and psychologist trained in transgender care, whom follow best practices that all of the major medical organizations support. Due to bills like this, Missouri is gaining the dubious honor of having the most anti-trans bills in the nation. To families like mine, that is embarrassing at best, terrifying at worst.

This is hateful, unnecessary, legislation. I would prefer that my elected officials work on items that could truly (and in a far more positive and proactive manner) help our state. Rather than policing people's preferences, performances, and genitals, get to work better funding our schools, tackling our out of control crime rates, and work toward drawing businesses to our state.

The government does not have the right to make determinations regarding what individuals do with their own bodies when no harm is being done to anyone else. These decisions are never easy for anyone to make. The process is not simple. No child would choose to undergo the transition process without considerable thought. It is far better to make the process accessible through legal means with proper medical care. We can best help our trans kids by helping them navigate their lives with honesty, integrity, and proper care. To do otherwise is what is actually harmful.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

Chairman Riley, Vice-Chairman Hicks, members of the committee I am submitting remarks on behalf of Pro Choice Missouri in opposition to SB 42 that seek to mandate exclusionary political interference in Missouri classrooms. Pro-Choice Missouri works to protect and expand every Missourian’s right to bodily autonomy, to access essential reproductive healthcare, to access accurate information in order to make the best decisions for ourselves and our families, and to parent our children in safety and dignity. By designating parents who support their children’s access to gender-affirming care as abusive, this bill threatens separating children from loving families. Already, transgender transgender children are more susceptible to bullying and sexual assault, when compared to their cisgender counterparts, transgender children are more susceptible to bullying and sexual assault, causing transgender youth to be more than three times more likely to attempt suicide. This is a direct product of the isolation, demonization, and invalidation resulting from both culture and policies, like this proposed bill, that deny their gender identity. SB 843 will cause immeasurable harm to children and their loving families in Missouri. On the national level, the Supreme Court has already ruled in Bostock v. Clayton County (2020) that discrimination on the basis of sexual orientation or gender identity qualifies as sex discrimination. This discrimination has been at the root of violence and exclusion of transgender individuals for decades, and must be ended to create a society where every young person in Missouri is safe, validated and supported. As Missourians, we value personal freedom, and the right to live life free of political interference, yet the Missouri legislature is once again eager to undermine our abilities as individuals to make decisions about health and wellbeing. Missouri children and families deserve to be treated with dignity and respect. This bill will create lasting damage to the mental health and development of transgender young people, whose gender identity will be explicitly invalidated by this legislation. Do not make yourselves the face of forced family separation in this state. Pro-Choice Missouri, representing more than 70,000 members across the state, opposes the advancement of these resolutions, and urges you to stop advancement of SB 843. Thank you. Missouri children deserve MORE than politicians interfering with their understanding of themselves and their bodies. These bills will cause lasting harm in Missouri. Pro-Choice Missouri opposes the advancement of this bill, and urges you to vote NO. Thank you.

As a therapist working for the Department of Mental Health, I strongly oppose this proposed act. Current best evidence-based practice acknowledges the need to protect transgender youth, a group of individuals whom already have the highest rate of youth suicide. Current peer-reviewed research tells us that the best way to protect these individuals is not by continuing to exclude them from their community and peers, but by allowing them to embrace their identified gender. The proposed act appears to be stemmed from outdated science, faith-based ideas, and transphobia. These choices should be left to the doctors, parents, and individuals who know themselves and their children best, not a room of lawmakers. Note: I am a Callaway County resident, and would have attended in person to oppose these harmful bills. However, the choice to release them with only 24 hour notice was clearly deliberate to keep these bills quiet, and keep those who have full time jobs from being able to request time off in order to more vocally oppose.

If you had a family member or friend who was dealing with gender issues, wouldn't you want to support them and help them feel included and accepted? Kids know at a very early age who they are. Ask any grown-up who is LGBTQ+ when they first realized and they will all tell you that it was when they were very young. Kids need to know that their bodies can match who they are inside

This bill goes directly against science. Science has shown that most - if not all - trans youth know that they are transgender before the age of 6 or 7. This does not occur by brainwashing or being read to by a drag queen - it is simply the way these children are made. Transgender youth have a statistically significantly higher rate of suicide than their cisgender peers - with some studies stating that transgender teenagers are 7.6 times more likely to attempt suicide than cisgender peers. Further forced isolation and a denial of basic medical care will only further worsen these statistics. A large body of research and science supports providing gender-affirming care to youth and that obtaining gender-affirming care significantly reduces a trans child's suicide risk. In short, gender-affirming care is providing help, not harm; thus this bill is ironically named, as preventing gender-affirming care will only cause harm and increased suicide risk.

These most difficult health care decisions belong to the individual, the parent if individual is a minor, and the treatment team. If lawmakers were physicians specializing in the treatment of kids with gender dysphoria, I might consider your opinion. Leave health decisions to the team involved. Stop trying to legislate health care decisions by business owners, farmers, lawyers, pastors, etc. Government does not belong here.

My name is Melissa Cameron, and I am writing to express my opposition to HB 170. I strongly believe that all individuals, regardless of their sexual orientation or gender identity, should be treated with dignity and respect. This bill would discriminate against members of the LGBTQ community. It would have a detrimental impact on their mental and physical well-being and would send a message that they are not valued members of our society. It would create a hostile environment for LGBTQ individuals and would likely cause many talented and qualified individuals to leave the state. This would be a loss for all of us, as diversity and inclusion are essential to a strong and prosperous economy. I urge you to reject this discriminatory bill and work towards creating a more inclusive and equitable society. Thank you for your time and consideration. Sincerely, Melissa Cameron

I am writing in opposition to the anti-LGBTQ and blatantly anti-transgender bills that are being discussed. Specifically, HB170, HB183, and HB337 which discriminate against transgender children and adults participating in school sports, HB 419, HB 463, HB540 which deny gender affirming care for those under age 18 as well as HB 494 and HB 498 which attack and criminalize drag performances. All of these bills are unnecessary and are a blatant attack on the rights of LGBTQIA Missourians! They horribly discriminatory and harmful and violate the human rights of Missourians. These bills are (horrible) solutions looking for a problem. They are a waste of time and they are extremely harmful. They will negatively impact the physical and mental health of LGBTQ+ Missourians, who already lead the nation in reports of self-harm. You will kill people if you pass these bills. Again, I strongly oppose all of these bills and they should be rejected.

What is commonly referred to as a natural puberty is not a neutral choice when it comes to transgender minors. There will be irreversible changes that they will be stuck with that negatively influence them the rest of their life if they are not allowed access to the care they need - based on the current standards of extensive monitoring and evidence. Studies show that 98% of minors will continue gender-affirming care into adulthood (Continuation of gender-affirming hormones in transgender people starting puberty suppression in adolescence: a cohort study in the Netherlands, 10/20/22). This means that by denying this healthcare to transgender minors, you are throwing 49 kids under the bus in order to keep one from changing their mind. This bill is being pushed on a personal belief and not scientific evidence which is readily accessible. Lastly, I encourage you to read in detail the studies that are presented to you on this topic. There are several studies that claim extremely high numbers of minors decide to stop HRT or puberty-blocking medications. Please know that reading deeper in these you will see that the minors never claimed they were transgender, they are described as "gender non-conforming" which could include anything from a gay teen to a masculine girl to a boy wearing nail polish. None of which make a person transgender. Please listen to what the majority of the medical field say on this matter and do not get in between a parent and their child's healthcare.

I am a woman who has lived her whole life in Missouri and I am ashamed that my state legislators are using their time to put forth such narrow minded laws. We rank 49th in education nationwide -- that actual harms children, not making laws that allows government to meddle with local choices. Women and girls face many levels of discrimination that could be fixed instead. Why don't schools provide period products? Why do rape kits sit un-processed? Putting forward bills like this shows me as a voter that you care more about headlines and made-up "scandals" that are not real issues. Do better.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

I am a primary care physician in the heart of Kansas City. I have over 14 years of experience serving this community. I provide high quality, top notch primary care to underserved and marginalized communities. I am the Health Commissioner for the Kansas City LGBT+ Commission and serve on this advisory board to the Mayor, City Council, and City Manager. I am the Medical Director for the LGBT+ Specialty Clinic at University Health. I hold several academic roles at the University of Missouri Kansas City School of Medicine including Docent, Clerkship Director, and Assistant Professor of Internal Medicine and Pediatrics. I am board certified in Internal Medicine and Pediatrics and see patients of all ages. This work is my specialty. I have worked with the LGBT+ community for many years and have experience with gender diverse kids, teenagers, and adults. All 9 of these bills should be strongly opposed. All of our national professional medication organizations including the American Academy of Pediatrics, American College of Physicians, and ACOG as well as five others, support and affirm the LGBT+ community and would vote against these bans. There is evidenced based medicine and science to support gender diversity. We have strict guidelines that we follow (See WPATH SOC 8 and UCSF). These bans are all hateful, discriminatory, and attention seeking for a political agenda. They ignore basic human decency. It is vital that the house votes against all 9 of these dangerous bills. WE know that the number of anti LGBT bills proposed in the past 5 years has skyrocketed. Ironically, this aligns closely to this country's culture wars. I am in the exam rooms today with LGBT+ patients. The work I do with these patients is the most fulfilling, important, and vital work I do as a physician but it is hard work. I will leave here today emotionally and physically exhausted because I spend time with these patients and I learn and listen to their stories. Ultimately, their voices should be heard/centered but in this day in age, it is dangerous to be out. These bills are dangerous and threaten their existence. I urge you to contact me for medical questions or a professional medical discussion on the science and evidence behind gender diversity. I strongly encourage you to vote against these bills. I would be there today with you if I was not with patients. I appreciate your time.

I urge you to oppose this bill because the state does not have the right to determine who receives what medical care. This is a decision that should be made by families and their healthcare providers, not legislators. For some transgender youth, receiving medical care could be a life or death situation, as they grapple with mental health issues that include suicide. This is NOT your decision to make.

I am the mother of a transgender daughter and know many families with school age transgender kids. We do not enter lightly into medical treatment for our kids. It is not done without thorough research and emotional evaluation. In my daughters case she became so much happier once she could begin HRT. HRT, puberty blockers, testosterone treatments are life affirming for our children doing great good. These treatments fall within the AMA guild lines for treating trans youth.

The name itself is ironic because of the already heightened mental health crises among transgender youth who DO have familial and societal support. Take that away and the numbers go from 4 times more likely to 7 time more likely to attempt suicide, suffer from depression and anxiety, and more. The research and science SUPPORTS gender affirming care for those under the age of 18 for several reason but some key importances are the fact that puberty cannot be reversed so an individual would have to suffer through extremely dysphoric changes in their body which will be much harder to alter after the onset of puberty such as the development of breasts and menstruation of the development of an Adam's apple, voice drop, and facial hair. Taking away a physician or healthcare institutions right to provide LIFE-SAVING GENDER AFFIRMING care is unconstitutional is takes away the right to life liberty and the pursuit of happiness for anyone in the community.

Nick S (he/him)19, Mus Ed student at MUI have enjoyed several privileges in my life. I'm white, cisgendered, have always been financially stable, had loving parents, and grown up here in Jefferson City. Along with those facts, I am here today proudly queer, and me, and anyone part of our community will remain proudly queer, no matter how much you legislate our freedoms away. As my main point today, I would like to state that if the legislative body here in Missouri and in the United States wanted to truly "protect our youth," they should also expedite discussions about the nearly 9 million starving children in the US - almost 200,000 being from Missouri (feeding America), the more than 330,000 students who have experienced gun violence at school since the Columbine shooting (wash post), and the over 4,000 sexual abuse cases against catholic priests in 2021 alone (US conf of cath bishops) in addition to expediting harsh anti-lgbtq legislation. As stated, there are several ways to truly protect the youth of Missouri and America. Anti-lgbtq laws are not one of those ways, and they purely seek to push all form of queerness back into the closet. Thank you for your time.

This bill represents a violation of human rights and an improper interference of church doctrine in public education, resulting in a violation of separation of church and state. It is harmful to the mental, emotional and social health of children and community members, and is completely hypocritical, given that the broad excuse for this bill and others like it is "parental rights". This bill and its bigoted companion bills completely disregards the parental rights of parents of LGBTQ+ youth to make medically-supported healthcare, social, educational and recreational decisions for their children, while imposing the will of a subset of unrelated parents onto children who are not their own.

I oppose legislation in this state to restrict the rights of LBGTQ+ individuals under the guise of protecting children. I know that most citizens of this state care deeply about the welfare of our children. But instead of providing funding for child hunger, child health care, child protection services, education, the arts or acts to protect children from gun violence - this house is responding to right wing fear mongering about LBGTQ+ individuals. Please reject these transparent and ineffective bills that will not protect our children or improve their quality of life - and instead focus on how we can provide more safety from gun violence in our communities, and a better quality of life for all Missouri youth.

This bill is named incorrectly, as it will harm and lead to the deaths of many young Missourians. As a mother this horrifies me. With this you are stealing our children's future and taking away my rights as a parent and my child's right to bodily autonomy. It has been shown over and over again that allowing children to transition when they need to, or at least be on blockers to forestall the PERMANANT effects of puberty makes them happier and more well adjusted and able to join society. I reiterate this bill as written will murder children. And you being pro-life I'd thought you'd be against that.

I urge you to oppose this bill. For many transgender youth, receiving hormone treatment or other medical care is truly a matter of life and death. Studies have shown that transgender youth who are experiencing gender dysphoria are more likely to feel depressed or anxious, harm themselves or attempt suicide. Such an extreme rejection of the scientific consensus on appropriate healthcare for transgender children will not only destroy lives; it will end lives. By creating legislation around the specific medical treatment for transgender children – you are treating these children as different, treating them as “other,” and not as people who deserves dignity

The government should not be trying to take away the right of the parents and their medical care team to do what is best for the child. This scare tactic that doctors are performing medical transitions on minors is not real, these are simply just parents and doctors trying to help their kids survive, and live happily. It's never a rash decision, and the physicians have taken an oath to protect patients, so why would the state of Missouri think that they know a patient better than the parents and doctors? If my child was discussing transition in any way, we would take the advice of doctors, counselors, etc to make the best, age appropriate decisions. The state should not be involved. This is another bill targeting trans youth, because a large portion of this red state isn't willing to learn, and only willing to try to block things they aren't willing to understand. I would encourage everyone to take the time to learn about gender, sex, binaries, etc before even bringing these bills up.

This morning your committee will hear several bills meant to take away a medical decision from doctors and parents. I urge you to vote down this bill, kill it in committee, and let the physicians and parents of our state know you support their right to make the best medical decisions for their children and patients.

Hello. My name is Rebecca Throm. I live in Fenton, MO. I oppose HB 419. This proposed bill affects me directly because I am the loving mother of a 16 year old transgender male named Kyler. Kyler needs the help of your vote in opposition of this bill to have the freedom to be the person he KNOWS he was born to be. He is backed by medical professionals that say gender affirming treatment is in his best interest to live a long and happy life. Denying best practice medical care and support to transgender youth can be life-threatening. It has been shown to contribute to depression, social isolation, self-hatred, risk of self-harm and thoughts of suicide. Research shows that transgender youth whose families support their gender identity have a 52% decrease in suicidal thoughts, a 48% decrease in suicide attempts, and significant increases in self-esteem and general health. This bill would punish those supportive families. Parents would have to choose between the possibility of government prosecution and supporting the health and well-being of their transgender child. Physicians that perform care to transgender youth and gender affirming care are doing so to protect and provide the best care possible to our children. Gender affirming care is provided with much care and consideration put into what is best for our children. Denying this health care to our children puts our children at risk. Save our children by allowing the care the physicians say is necessary. Parents, patients, and medical professionals, not politicians, should decide what medical care is in the best interest of all youth. I strongly urge you to please vote against HB 419. Thank you very much for your time.

To the Legislatures currently hearing the anti-trans bills on the floor: Instead of focusing on real issues that affect Missourians, such as obeying the voice of the People and expanding Medicaid as approved in August of 2020, you GOP Legislatures are now trying to distract Missourians by targeting literal children. We see right past your tactics. Your entire illegitimate clown show has been a self-repeating cycle of creating issues that don't exist in the first place, then providing fluff solutions that look like you've solved something big. However, your political games will put children in harm's way. Denying kids to healthcare will do more damage to them in the long run and place more costs on the state. Additionally, criminalizing the existence of drag queens, trans people, and other adults with free will is a violation of our inalienable rights. You have no right to threaten us and children with structural oppression when your entire party has made a mockery of a governance.

(This is the same statement provided by myself for HB 463)The language in the title of this act alone is incredibly backward and prejudiced. Trans kids who receive hormone blockers are NOT being "experimented" on. They are receiving a chance at life-saving healthcare--one that they can change their minds on if they so choose. Hormone blockers do not block puberty permanently, and having the government telling doctors who they can and can't serve is oppressive at best.If I had the language to make my needs known as a kid, I would have been saved so much heartache. Top surgery would have been out of the question till I turned 18, but hormone blockers would have changed my world for the better. Please reconsider this dictatorial act and think of kids like me. And if you don't, watch out for a mass exodus of your LGBT constituents (and their loved ones) because if these acts pass, it will be a clear sign that we are not valued or wanted by our elected representatives. This act will cause so much more harm than it will good.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

I grew up in central Missouri and lived here for 38 of my 39 years on this planet. I was born in Columbia Missouri. Lived in Fulton as a toddler and went from kindergartener to adult in Tebbetts Missouri. I moved in with my girlfriend, now my wife in Jefferson City Missouri. The missing year was in my early twenties in Southern California because I wanted to transition and knew that early 2000's Missouri would be a very inconducive place to attempt it. The reason I came back was because I could not afford to live there. So my choices were to either work the street, pan handle, or come back to Missouri and return to the closet.I didn't like any of those options. So I came back as myself. I got a job and tried to make my way. For the sake of brevity, I will not recount here how it nearly cost me everything.... my environment broke me and I went back into the closet.The years went by and I married, had kids and lived and worked in Jefferson City making my way up the ladder slowly but surely. Trying to live in a manner that is prescribed to me by any and all human contact brought me to dark places in my life and in my mind. But I also had a family, I had kids.... They kept me going this far and just the thought of not being their for them as they grew up fell in love and found their place in life crushed my heart into tiny pieces... I had to make a change. I had to be there for them. I transitioned and the social and work life consequences had to be ignored. I had to risk the well-being of my family just to be able to be able to get a shot at happy fulfilling life with my little ones.My point in all this is I am a born and bred Missourian and this establishment has brought me great joy in the advances in trans rights and the ability to simply be one's self as an adult. There may still be some unnecessary boundaries in the way of trans well-being, but I believe one day we will get there as the march of progress goes on.But with these new laws this establishment has brought me even greater disappointment for even debating this. As a child of eight years old, I knew I was different and was terrified of anyone finding out. If I had the ability to have the proper care back then my life course would had been charted without fear knowing that my body would develop correctly. I didn't even know it was possible let alone attainable back then if it wasn't for the fact that it simply was unheard of.Pushing these trans kids through the life altering effects of puberty is abuse. I will forever and always have the broad shoulders I do. I hopefully had started medical transition early enough to stop my hair loss. I now, recently have bald spots appearing on my head. I will forever have a naturally deep voice. I have to constantly moderate in my head to attain what you hear now. Whether it is good or not I have to live with it. My body has been forever altered due to puperty. There is no going back and fixing all of it at this point. There are some operations that can lessen the effects but there is no way I could ever afford it and insurance doesn't cover it.What they do cover is T blockers. These have the ability to delay puberty for as long as they are taken. It has been proven to be a safe and reliable way to bide more time for individuals to be sure that transition is right for them. If they decide it isn't then all they have to do is stop taking them and puberty takes hold. That is their power. The problem here is the government is now trying to take power away from people. Doctors Fathers Mothers and worst of all the children themselves. 18 is to

late and everyone knows it. They don't want us to be able to live a normal life they want us to be under their thumb because they fear losing whatever American Dream they have in their head. Feels like there isn't any room for anyone else to dream these days. Thank you.

As a person of faith and member of the clergy, I understand all people to be deserving of respect and care. One of the ways we care for our transgender and non-binary children and youth is to love and support them through their transition. This includes affirming their gender identity, using the correct pronouns, and providing appropriate medical and mental health care. These actions are literally lifesaving to our transgender and non-binary children and youth. This bills will marginalize and further threaten the well-being of Missouri children and youth. Please dismiss this legislation.

Good afternoon. My name is the Rev Mike Angell. I am a pastor at the Episcopal Church of the Holy Communion in University City Missouri and I am here to voice my opposition to eight bills attacking the LGBTQ+ community. Eight bills, announced late yesterday, which seek to criminalize parents, punish doctors, and defund schools for allowing kids to play. You now have proposed more bills against trans kids than there are known trans athletes in our state. Doubtless today we will hear about the book of Genesis. We will likely hear that God created humanity male and female, from chapter 1, verse 27. That reading makes it sound like the gender binary is the point of the teaching. It isn't. There's a repetition in the verse: God created humanity in God's own image. Human beings have the capacity to do such good. Last night, my husband and I were explaining to my four year old why I needed to get up before five in the morning to be in Jefferson City, why I wouldn't be back in time to put him to bed. Some lawmakers want to make a law to keep your friends from playing sports, was the best I could explain. Now, our son is about the most gender normative kid you could imagine. He loves trucks, and dinosaurs, and he loves sports. He said, "that's mean! Dada, tell them not to be mean." Please stop this cruelty. Stop trying to win elections by unleashing ugly bullying. Let the doctors and parents and educators and coaches work together to decide what is best for our kids. Don't put big government in the way. The last thing I want to say is this, to every trans leader who is here, especially the kids who are out of school to fight back. You are made in the image of God, just as you are. Your courage inspires me. Whatever awful questions you face today. However scared you are, know, know that these proposed laws will not have the last word. Cruelty will not have the last word. You are loved, valued, seen, and infinitely worthy. And we will show up again and again to tell these legislators not to be mean.

These bills are harmful, absolutely harmful, to transgender children, who experience suicidality at a 1:2 ratio. These bills are cruel and unnecessary. There are more bills against transgender children this session than there are transgender kids wanting to play sports in this whole state. Leave transgender kids and their families alone, treat them in a way that honors their full humanity. I strongly oppose these bills!

My name is Richard Haegele and I am a resident of St. Louis, MO. I am greatly concerned about House Bills 419 and 463 that are being presented today to the General Laws Committee. I would have rather testified in person, but I was not given the time to plan on driving to Jefferson City. I would like to express my opposition to banning gender affirming healthcare for Missourians. My oldest child is trans and I have witnessed first hand how gender affirming treatment can save lives. My child has struggled with suicidal ideations and attempts. In late 2020 he made a serious attempt to end his life and I had to wrestle him to the floor to stop him from stabbing himself with broken glass. He was 14 years old at the time. Since then he has benefited from a variety of treatments, but his goal was to start testosterone therapy. He has been going to the Trans Clinic for years now and sees a licensed therapist. We waited until he was 16 and had the support of his therapist. He did extensive therapy into hormone treatment and as his parents we educated ourselves on the risks and benefits. Ultimately I realized that it was essential to keeping my child alive. Charlie began testosterone treatment six weeks ago. The relief and joy he has expressed since starting has been the most effective therapy so far. We know that LGBTQ+ youth are at a greater risk of suicide. We know that the American Academy of Pediatrics supports gender affirming care. Please do not support these bills. These are decisions that need to be made by individual children/ youth, their parents, and their doctors. Bans and restrictions on gender affirming care will kill trans children and youth. Please help keep Missouri a safe and affirming space for my child and all LGBTQ+ individuals.

My name is Dr. Ryan Cox, and I am a psychologist in Kansas City, Missouri, who has worked therapeutically with the LGBTQ and transgender community for 14 years. I want to register my opposition to HB 419. I do not believe it is in the business of the state to mandate the kinds of medical decisions doctors and patients can make together. Gender-affirming care is supported by every major medical organization that exists, including the American Medical Association, the American Psychological Association, and the American Academy of Pediatrics, among others. These bills are solutions in search of problems, and create hostile and discriminatory environments not only for LGBTQ minors, but also for parents, families, and clinicians. There is no evidence to suggest that providing support and affirmation for questioning minors and young adults creates deleterious consequences - in fact, the opposite is true. The suicide attempt rate for this population is close to 50% (compared to about 1.5% for cisgender adolescents and young adults), and this is due directly to discrimination, stigma, and marginalization. Let's do better for Missouri's population and its youth, and oppose this hateful and unnecessary bill. Thank you.

The state government should not be forcing it's way into people's lives like this. It should be protecting, not taking away, our freedom. This bill is an incredible overstep of the government. These decisions should be between a doctor, the patient, and the parents, not the Missouri state legislature.

You're spending public time and money on divisive issues that stem from your religious beliefs rather than anything to actually improve the quality of life for Missourians. Our state has a median income of **LESS THAN \$31,000**; we are ranked around 30th for education; 42nd in healthcare; and some of you are too focused on what people have between their legs and if house members have a jacket with long sleeves? You people make a mockery of public office and I will be happy to stand alongside younger generations who will be the end to the out of touch bigoted boomer era.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.			

Dear Chairman Riley and members of the House General Laws Committee, Thank you for the opportunity to provide testimony today on this important topic. Our names are Dr. Sarah Garwood and Dr. Christopher Lewis, and we are the co-directors of the Transgender Center at Washington University and St. Louis Children's Hospital. We write this letter as private citizens and concerned physicians, and while we are practitioners at the University's School of Medicine, our views are intended to reflect our own expert opinions and not intended to represent Washington University, St. Louis Children's Hospital, or BJC HealthCare. Affirming young people in their gender and providing gender affirming care is literally life-saving. In the transgender population there is a lifetime suicide attempt rate of 40% with the majority of these attempts happening before the age of 19. Fortunately medical interventions have evidence of improving that statistic. A study published in the medical journal, Pediatrics, in January 2020 demonstrated a statistically significant decrease in suicidal ideation when people were given access to needed therapies. More recently published studies have found (Journal of the American Medical Association, 2022) found that gender-affirming medical interventions were associated with lower odds of depression and suicidality and (New England Journal of Medicine, 2023) concurrent increases in positive affect and life satisfaction and decreases in depression and anxiety symptoms. Transgender medical care is evidence-based and guided by national standards of care created by the Endocrine Society and supported by the American Academy of Pediatrics (AAP), the American Academy of Child and Adolescent Psychiatry (AACAP), and many others. These bills ask us to practice medicine in violation of professional standards of care. It may surprise you to know that most of the adolescents in our practice are not currently receiving puberty blockers or gender affirming hormones. They are mostly seeing mental health professionals to work on how they can feel more comfortable in their bodies. Sometimes teens are exploring identity or bending gender norms -- and all of that is ok and normalized. Only after years of these conversations do we ever talk about options for gender affirming hormones. For prepubertal children the focus is on psychosocial support and family education only. Only after puberty starts may other options even become available, and even then, not every teen needs, or wants, to begin hormones or have a puberty blocker before age 18 or ever. The experience of being trans is different for each individual, and therefore how and when a person transitions will look different as well. We also want to be very clear: for those who do need hormone therapy, hormones save lives. But even then, medications for pubertal suppression and gender affirming hormones are only an option for pubertal youth after all guardians have offered consent, letters of support have been provided from mental health providers, and the patient meets stringent eligibility and readiness criteria involving gender development, psychosocial wellness, and extensive counseling and education by a multi-disciplinary team that includes parents. Puberty blockers prescribed to transgender youth are known to reduce depression, anxiety, substance use and

suicidality which may result from gender dysphoria. Not prescribing puberty blockers to youth who do need them is an active choice that can lead to harm. Puberty blockers are medications that have been used in both children and adults for decades. In children, the primary use is for treating puberty when it occurs too early, such as in toddler-aged children, or for preserving reproductive organs if a child has cancer and is being treated with chemo or radiation therapy. More than thirty years of drug safety data and hundreds of peer-reviewed publications attest to the safety and reversibility of these agents. Finally we want to underscore that at no point are surgeries impacting fertility and reproduction on the table for anyone under the age of 18. Again, to reference national, evidence-based standards of care, surgery for trans youth is not part of guidance that is recommended. We appreciate your willingness to consider feedback as you discuss these life-supporting health care policy decisions, and look forward to continuing to work with the committee. Best, Sarah Garwood, MD Christopher Lewis, MD

I am testifying in opposition to HB419, HB463, and HB540. I strongly believe that parents are the best people to make decisions about how to raise their children. Parents may consult with religious leaders, doctors, or any other experts they see fit, but ultimately they are the ones who get to make the decision on what's best for their kids, not the Missouri legislature. Yet these bills would take that authority away from parents of transgender kids. Medical professionals also think this legislation is a bad idea. The American Medical Association and the American Academy of Pediatrics, together representing over 250,000 doctors, have both strongly opposed this kind of legislation because it prohibits doctors from being able to make the best decisions for their patients. The benefits of gender-affirming treatment for transgender kids are well documented, and gender-affirming care must be an option for Missouri parents as they consider how to best support their transgender children. Please do not get involved in personal medical decisions. Oppose these three bills.

My girlfriend is transgender. She did not get to transition until adulthood. Constantly she talks of how she wish she could have transitioned as a child. Using puberty blockers would have prevented her from having to go through male puberty and having her body undergo unwanted changes. This is government overreach as each child should be able to receive the treatment their medical team and parents choose.

Let patients and doctors decide for themselves what is best. Trans kids who receive gender affirming care are less likely to be depressed or suicidal. Gender affirming care DOES NOT mean surgery. You are using the (false) fear of radical mastectomies in children to pass these bigoted laws. I will point you to the chart in this tweet: All major medical organizations oppose legislation banning gender-affirming medical care for #trans youth: https://twitter.com/jack_turban/status/1608266556168888322

All young people experience the turbulent adolescent years, including youth of every gender. Parents and other caregivers want to provide the best care for their children. Gender appropriate medical care is just one aspect of health and wellbeing. Attacking transgender children and youth is immoral because it does so much harm by denying beneficial health and services because politicians have labeled these youths as ‘others’. Transgender youth need all the supports they need, including caring relationships, educational opportunities, and policies that prevent discrimination in every aspect of their lives. Discriminatory policies and limits to gender affirming care can take a toll on mental and emotional wellbeing and can sometimes lead to substance abuse and suicide. The American Psychological Association supports the practice of gender affirming care. Psychological science is clear that gender-affirming care helps trans kids. A study out of the University of Washington discovered that among 104 trans and nonbinary youths ages 13 to 20, gender-affirming care lowered the odds of moderate to severe depression by 60% and suicidality by 73% (Tordoff, D. M., et al., JAMA Network Open, Vol. 5, No. 2, 2022). Another study, which used data from more than 27,000 people collected by the National Center for Transgender Equality’s 2015 U.S. Transgender Survey (PDF, 2.22MB), showed that transgender youth who began hormone treatment in adolescence had fewer thoughts of suicide, were less likely to experience major mental health disorders, and had fewer problems with substance misuse than those who started hormones in adulthood (Turban, J. L., et al., PLOS ONE, Vol. 17, No. 1., 2022). When young people are happy, healthy, and able to pursue their goals—regardless of gender—it creates a better future for us all.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

I am a concerned Missourian who opposes HB419 for several reasons:1) The bill takes away parental rights of parents and attacks medical freedom. It inserts the state in between doctors, parents and their children. As a supporter of parental and medical rights, this bill seems like a dangerous government overreach.2) The bills subvert the guidance of medical groups. Medical groups like the American Medical Association, the American Academy of Pediatrics, the American Psychiatric Association and the Endocrine Society oppose attempts to limit gender-affirming care.3) Gender-affirming care is considered evidence-based medicine that has been shown to be associated with improved mental health meaning a ban on this care would be probably detrimental to the mental health of transgender youth in the state. A recent study published in the New England Journal of Medicine found that gender-affirming hormone therapy for youth improved life satisfaction while decreasing depression and anxiety.4) Some proponents of these restrictions cast accessing gender-affirming as easy and something any child could get, but this is a mischaracterization. Youth who wish to access gender-affirming care must meet many criteria and the gender dysphoria they face must be persistent.5) While gender-affirming care has side effects, many other types of medicines have them too. We don't ban antidepressants because of their side effects.6) Drugs and procedures used in gender-affirming care are not exclusive to it. For example, puberty blockers are used to treat early puberty and cancer. Because of these reasons, I encourage you all to vote NO on HB419.

A legislator with a bachelor’s degree in biblical studies is distinctly unqualified to legislate what physicians can and cannot do. Physicians must “first, do no harm”. This bill commands them to do harm by abandoning and neglecting the needs of our most vulnerable children. Gender reassignment surgery is already not performed on children under eighteen. Hormonal blockers are used to delay development of sexual characteristics until the child reaches the age of consent. This is hateful legislation that will confer torment on our most vulnerable children — forcing unwanted puberty upon them.

Politicians are not doctors, and should not make medical decisions. Have you met or talked to any student that has gone through the transition process or medication? First you have to see your doctor, then a gender affirming doctor, then you have to see counselors/therapists before you can get medication. Surgery, unless there is a medical need is usually after they turn 18, and needs more counselor and therapist letters. Plus you have to deal with the insurance companies as these are not cheap procedures. Parents and trans kids do not need more loopholes and steps to jump through, and definitely do not need politicians saying they cannot get the care needed. There is a huge concern in the LBGT community of suicide without affirming care. Please do not add to these numbers by making life harder than it already is for these kiddos and their families.

These bills do nothing but further divide people between political extremes. They are garbage aimed squarely at taking transgender folks out of public spaces and indeed actually making our existence illegal. You hold in your hands to power to actively harm thousands of Missourians and you have chosen violence over kindness, hate over love. There is nothing that your chosen targets, the transgender community, can do to convince you that we are your neighbors, caretakers, friends, family, children, teachers, partners, and above all, that we are human too. May your choice to destroy us haunt you forever.

Aproximatly 1.7% of the population is born with an intersex mutation....about the same number as those people born with red hair...What provision does this bill make for intersex children who undergo corrective or augmentation surgery as infants. What provision does this bill make for children who are assigned the wrong gender at birth by a physician. What provision is made for children in the foster care system to obtain gender affirming surgery if they are an intersex child assigned the incorrect gender?When the term verifiable medical condition is used is that also taking into consideration a verifiable mental health condition?

This is a media stunt, a distraction, from the real work the MOleg was elected to do. Missourians face the loss of local affordable healthcare, low wages, unattainable housing, and the defunding of public education. As a rural leader representing residents of Southcentral Missouri, it is my duty to once again ask that our quality of life no longer be ignored. Stop advancing a culture war that is wasting residents' tax dollars while members of this House and their buddies gain fame and wealth with tax-cut legislation.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

My Representatives, I am writing a testimony in opposition of the uneducated and biased bills you waste our taxpayer dollars on. I grew up from a conservative family but we never discussed the rights of trans kids as something to be destroyed. What you and the Senate are doing I fully believe is unconstitutional and unpatriotic. It is against the 1st and 14th amendment to bar LGBTQ children and students from learning and speaking about their experience. Preventing them from competing with their peers is a direct attack on their rights that they all are entitled to. Your "excuses" on why all these bills are just and to help these children is a blatant lie. You waste your time creating discourse on human rights. I don't believe any of you are true Americans because this country was supposed to be the shining light of all people's coming together. What you are doing is sexualizing children before they can even find their sexual orientation and forcing them into a box that will never fit them. Do you truly never put yourselves in those children's shoes because your point of view is so stuck up your own behinds to imagine anything else but your hate? Transgender people are people and transgender children are just like other children and deserve every right to how they would prefer to present. You are saying right now to all Missourians that you want to discriminate against these people because you can't sexualize them the way you want to. Why can't we have bills geared toward the true safety of children such as putting more pedophiles in prison? There is an epidemic of child sexual abuse and you want it to be worse for those children to punish them and put them into more danger than they already face daily. Don't even go there with the misinformation about children being abused by the LGBTQ community because statistically it is mostly conservative white men who sexually abuse children. What would your mother's think I wonder about this blatant disregard for human life? What would your God think or Jesus if he saw the atrocities you write into law? God made transgender kids the way they are and you are saying he's wrong by barring said children from medical procedures that would enrich their lives. Jesus said to love thy neighbor and thy enemy and let me tell you I see no ounce of love for these poor children just trying to be themselves. You should be ashamed of yourselves for the misuse of your positions. You have a plethora of opportunities to learn from LGBTQ people if you don't understand something. What I see you doing though is not asking the LGBTQ community what would be best for these children even though you know nothing about what it means to be transgender or queer. So if your goal is not to help the children, not to learn of their struggles and help them then it is obvious your only goal is to strip the rights of people which is corrupt and unjust. It's frankly no one's business if a child wants to transition or experience something they feel would be a better fit. The fact I have to write any of this at all shows how bigoted and uneducated you all are on these issues. This is not the America I envisioned when I was young; this isn't the Missouri I know. True Missourians are kind and help one another in need. How much of your own humanity are you going to continue to sacrifice for your fantasies? For your hatred? Is this really what you want to burn in Hell for? You are weak. I challenge you to turn all these bills around and start from scratch the

right way. With actual education and engage with the LGBTQ community directly instead of pulling things from thin air like you have been doing. I am regretfully ashamed to be a Missourian because of you and the Senates transgressions the past three years. I would like to be proud and I am telling you now how we could become a state that is respected and called home by not just people like you but also the LGBTQ community and transgender kids. Make it make sense and do the right thing.

I am a citizen of Missouri living in the Kansas City area and I wholly oppose this and other legislation targeting young people who are intersex or transgender. No one, especially those who are still young and vulnerable to all the hatred directed at people who are different or don't fit in with the majority, should have to be the target of government actions to further marginalize and "other-ise" them. Transgender and intersex kids deserve our love, support, and aid to help them navigate the insanely difficult school years. Not the blind bigotry and uneducated conclusions drawn by so many that say they must conform to a (false) sex or gender binary. The challenges and medical decisions faced by transgender and intersex kids should be the business not of the legislature to limit, but only that of the kids, parents, and their doctors. It's nobody else's business.

I am trying to understand why there is such an effort being made to exclude 4-5 Missouri students who identify as transgender, want to play sports and have reached out to MHSAA. Titling bills Save Women's Sports, Missouri Children Deserve Help Not Harm and Missouri Save Adolescents from Experimentation demonstrates the lack of sensitivity and understanding around this topic. Medical professionals advocate for inclusion noting that children who identify as transgender and aren't treated as such have a higher incidence of self harm and suicide. The focus should be on inclusion, not exclusion, and having fun with their peers. Everyone isn't going to be an Olympian -- let MHSSA, the NCAA and the Olympic Committee deal with these issues outside the purview of the Missouri legislature.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

Advocates of Planned Parenthood of the St. Louis Region and Southwest Missouri opposes HB 419, HB 463 and HB 540 as dangerous, discriminatory, and unconscionable. PPSLRSWMO health centers proudly provide respectful, equitable, and evidence-based care to transgender, nonbinary, and gender diverse people. It is with this experience and expert perspective that we state to this committee that access to gender-affirming care is essential, and for many patients, is lifesaving. Care and counseling for transgender youth must be individualized, evidence-based, and free from discrimination and government overreach. Let us be clear — trans rights are human rights, and by even introducing this legislation, its sponsors have already done unconscionable harm. This narrative adds fuel to discrimination and hostility against transgender and gender-nonconforming young people, individuals, and entire communities, and further contributes to radical attempts to deny them their fundamental humanity. Transgender young people are at risk for pervasive mistreatment and violence, and disproportionate psychological distress, including reporting staggering rates of suicide attempts. What we know to be true, what the data confirms, is that we can optimize the health of transgender and gender-nonconforming young people by affirming their identities, supporting them, and securing their access to needed, lifesaving care — not by leveraging reckless attacks on their humanity and undermining their access to health care. Please oppose HB 419, HB 463 and HB 540.

It is a statistical reality that gender-affirming care saves children's lives. Taking away their care is cruel and unusual and offers zero public benefit. What will you tell parents when their transgender children commit suicide rather than be forced to live as what they are not? Because that is the reality you face. Their deaths will be on the hands of all who support this bill. Jesus would not approve.

As a parent in the state of Missouri, I expect the legislature to stay out of family's medical decisions. As a parent of a genderfluid child we have over 10 years of experience listening to our child, talking with our pediatrician, and considering our own faith and religious beliefs. Our experience is that no one is forcing our child to do anything. Our religious beliefs are that God created our child to be this outstandingly beautiful person. Don't place limits on what God has created because you don't understand. Each family should have the right to make their own medical decisions without Missouri legislature involvement.

House Bills 419, 463, and 540 are harmful bills that are based on unduly restrictive government intervention into personal medical procedures, which can only be deemed appropriate or necessary by attending physicians. The bills make no concrete definition as to what is considered "transition" and uses broad language to attack individuals who have legitimate medical concerns and needs for medical intervention. Further restrictions on healthcare funding or insurance funding violates patients' rights to privacy and must be assumed to be an act of government overreach.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

Trans kids exist, whether you like it or not. All trans adults were children once, of course, and we all wish we were believed and given the treatment for our gender dysphoria, not to be suppressed and ignored. The reality is that children younger than 18 are not getting gender-affirming surgeries. That simply is not happening and is not an issue. And anyway, what trans people do to their own bodies is no one else's business and gender-affirming surgeries are not mutilation. Many trans kids just start puberty blockers, which are perfectly safe and reversible. That should only be a decision made by a doctor, parent, and child. The government has no business interfering with parents doing what is best for THEIR kid and deciding to police others' bodies. Listen to trans kids. We know who we are from a young age and we should be embraced and affirmed, not rejected and demonized..

What is wrong with you? STOP VOTING TO GOVERN PEOPLE'S BODIES. Let kids (and adults) be who they are, love who they love, participate based upon their chosen gender. Stop meddling in things that you have NO BUSINESS governing....i.e. people's bodies and what we choose to do. This is the MOST BACKWARDS, HILLBILLY stuff I've heard of. Why make MO look even worse in the eyes of the educated and open-minded. What are you afraid of?
