

SECOND REGULAR SESSION

HOUSE CONCURRENT RESOLUTION NO. 58

102ND GENERAL ASSEMBLY

INTRODUCED BY REPRESENTATIVE GRAY.

5691H.011

DANA RADEMAN MILLER, Chief Clerk

AN ACT

Relating to sickle cell awareness week.

Be it enacted by the General Assembly of the state of Missouri, as follows:

2 **WHEREAS**, sickle cell disease is an inherited blood disorder that affects red blood
3 cells. People with sickle cell disease have red blood cells that contain an abnormal type of
4 hemoglobin; and

5 **WHEREAS**, normal red blood cells contain hemoglobin A. Hemoglobin S and
6 hemoglobin C are abnormal types of hemoglobin; and

7
8 **WHEREAS**, red blood cells containing mostly hemoglobin S do not live as long as
9 normal red blood cells and have difficulty passing through the body's small vessels. These
10 hemoglobin S red blood cells can block small blood vessels, resulting in tissue damage due to
11 less blood reaching that portion of the body; and

12
13 **WHEREAS**, sickle cell trait is an inherited condition in which both hemoglobin A
14 and S are produced in the red blood cells, always more A than S. Sickle cell trait is not a type
15 of sickle cell disease; and

16
17 **WHEREAS**, sickle cell conditions are inherited from parents in much the same way
18 as blood type, hair color and texture, eye color, and other physical traits. The types of
19 hemoglobin a person makes in their red blood cells depends upon what hemoglobin genes the
20 person inherits from his or her parents; and

21

22 **WHEREAS**, since sickle cell conditions are inherited from parents, it is important for
23 people to be aware if they are a carrier before having children; and

24

25 **WHEREAS**, more than 90,000 people in the United States have sickle cell disease,
26 affecting mostly persons of African heritage according to the National Institute of Health.
27 Currently, there is no universal cure for sickle cell disease; and

28

29 **WHEREAS**, sickle cell disease results in a shortened life expectancy, with the
30 average life expectancy being 42 years for men and 48 years for women; and

31

32 **WHEREAS**, based on the population of 6 million in the state of Missouri, 700,000
33 are African American. 1 out of 400 suffers from sickle cell conditions and 1 out of 12 has the
34 sickle cell trait; and

35

36 **WHEREAS**, with these estimated numbers, there are approximately 1,750
37 individuals with sickle cell conditions and 58,000 individuals with the sickle cell trait in
38 the state of Missouri; and

39

40 **WHEREAS**, approximately 700 children, adolescents, and young adults with sickle
41 cell disease reside in the St. Louis metropolitan area. However, less than 25% of this sickle
42 cell population will graduate from high school or seek higher education; and

43

44 **WHEREAS**, health maintenance for persons with sickle cell disease starts with early
45 diagnosis, preferably as a newborn; and

46

47 **WHEREAS**, treatment of complications often includes antibiotics, pain management,
48 intravenous fluids, blood transfusions, and surgery in combination with psychosocial support;
49 and

50

51 **WHEREAS**, there are promising new treatments being developed which can prevent
52 red blood cells from sickling without causing harm to other parts of the body, reduce the
53 frequency of severe pain and acute chest syndrome, reduce the need for blood transfusions,
54 and provide options to eliminate iron overload caused by repeated blood transfusions; and

55

56 **WHEREAS**, public awareness about sickle cell trait and disease and the numerous
57 programs and screenings available is vital to reduce the pervasiveness of sickle cell
58 conditions:

59

60 **NOW THEREFORE BE IT RESOLVED** that the members of the House of
61 Representatives of the One Hundred Second General Assembly, Second Regular Session, the
62 Senate concurring therein, hereby designate the third full week in September as "Sickle Cell
63 Awareness Week" in Missouri; and

64

65 **BE IT FURTHER RESOLVED** that the General Assembly encourages and urges all
66 citizens of this state to participate in activities during Sickle Cell Awareness Week to address
67 the pervasiveness of sickle cell trait and disease and the need to increase public awareness of
68 the available programs and screenings; and

69

70 **BE IT FURTHER RESOLVED** that this resolution be sent to the Governor for his
71 approval or rejection pursuant to the Missouri Constitution.
