

HB 2115 -- PROSTHETISTS AND ORTHOTISTS

SPONSOR: Toalson Reisch

The bill allows certified orthotists and prosthetists to provide devices and services to patients without a referral from a physician, as long as they refer any cases beyond their scope of practice to the appropriate health care provider.

The bill imposes deadlines and obligations on health carriers to respond to prior authorization requests and reimburse claims for devices and services, and prohibits them from denying requests or claims based on insufficient documentation if certain conditions are met.
