

HB 2531 -- SUBMETERING OF UTILITIES

SPONSOR: Christofanelli

This bill requires the Public Service Commission to adopt regulations that require submetered utility customers to pay only the customer's portion of the energy consumed; establish standards for safe and proper installation of submeters; require that the services delivered to a submetered customer are consistent with the service requirements imposed on the utility company; establish standards that protect customers against termination of services; and establish standards for location of submeters.
