

HB 2641 -- WORKERS' COMPENSATION BENEFITS

SPONSOR: Marquart

For the purposes of computing the average weekly earnings that serve as the basis for determining the compensation benefits for a volunteer firefighter or a volunteer emergency services responder, the benefit shall be based on the average weekly wage in the volunteer's regular employment, only to the extent that temporary total disability prevents the volunteer from performing the job duties of regular employment. The bill also specifies a method for calculating compensation when the average weekly wage has not been fixed or cannot be ascertained.

This bill is similar to HB 1910 (2024) and HB 1290 (2023).
