

HB 2930 -- COMMUNITY COLLEGE TO SPONSOR CHARTER SCHOOL

SPONSOR: Smith (163)

This bill expands the current locations where a charter school may be established to include in a school district located within a public community college district.

Such charter school must be sponsored by the public community college and only students within the public community college district may attend the charter school. Community colleges that sponsor a charter school are eligible for additional appropriations to defray costs of sponsoring the charter.

The bill repeals language restricting payments to charter schools to existing established charters.
