The provisions of this bill make a marked change to protect the privacy of an individual's data as submitted to the Department and the University and delineate that should any confidential be released, the person releasing the data shall be held accountable. I think these are good changes.

THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.

HB 2164 requires Emergency Medical Services data in Missouri be sent to DHSS and the MU School of Medicine for collection, analysis, and disclosure to public health authorities, health researchers, local emergency medical response agencies, and more. The bill says the data will be used in epidemiological studies. Are they setting up for pandemic X? Is this another way to fake an outbreak? Promoters of this bill are selling the idea that the emergency patient can get better, faster care because their records are immediately accessed and then communicated from EMS to the hospital just by scanning a driver's license (which is creepy). Do they know we already have sophisticated data on individuals? Even more concerning, when will EMS personnel have time to enter data and read it in an emergency situation when they're needing to respond to the person's immediate needs because their heart stopped, they're not breathing, they're bleeding, choking, etc? We have all seen situations in hospitals where individuals were lined up at a computer station throughout their shifts entering data. Patient care becomes secondary when healthcare workers have to enter data. This obsession with data competes with and negatively effects care.

Just no. Cannot see benefit to people in an actual emergency; Busy EMTs should be focused on immediate emergent care not entering data.. More red tape; more access of private health to agents who have nothing to do with personal health care. Company to do data distribution already focused on tracking if people are vaccinated. This bill brings strong concerns of health bureaucrats seeking data for overreaching in public control as they did with Covid. Vote no on 2164.

Medical providers should not be allowed to disclose private medical information without express written permission. No academic studies can override individual expectation of privacy. This is especially important in this data driven society. Systems are routinely hacked by bad actors who scrape the data to sell on the black market. Every effort should be made to protect health information, not spread it further without the express knowledge and permission of the individual.

Digital technology has already taken over healthcare. We do not need more documentation for our health care professionals. EMS personnel currently communicate perfectly with ER physicians over the phone and can be monitoring their patient while doing so. This is absolutely not needed.

We (husband and I) are strongly opposed to HB 2164. We don't want nor need anymore collection, analysis and use of our personal health data, no matter how you try to sell it. This bill is NOT for the benefit of people, but rather is simply a tool with which bad actors have the potential to get our personal information and use it against us. In a real emergency, emergency personnel don't have the time for this garbage, plus if they have time to get it and read the wrong info, they'll kill the patient. STOP this idea of collection and disseminating of personal information, plus the potential "selling" of sensitive personal information by OPPOSING HB2164.

As a prior emergency room nurse, this bill is very one-sided and irresponsible. I feel it is another attempt to gather information on the citizens of Missouri. When EMS is called to the scene of an emergency they are there to do the ABCs...stabilize then transport. EMSs is not there to fill out additional paperwork for data harvesting. I am not for this bill, HB-1264!!! Strike down this bill. Kathy Leimer RN,BSN

HB 2164 requires Emergency Medical Services data in Missouri be sent to DHSS and the MU School of Medicine for collection, analysis, and disclosure to public health authorities, health researchers, local emergency medical response agencies, and more. The bill says the data will be used in epidemiological studies. Are they setting up for pandemic X? Is this another way to fake an outbreak? Promoters of this bill are selling the idea that the emergency patient can get better, faster care because their records are immediately accessed and then communicated from EMS to the hospital just by scanning a driver's license (which is creepy). Do they know we already have sophisticated data on individuals? Even more concerning, when will EMS personnel have time to enter data and read it in an emergency situation when they're needing to respond to the person's immediate needs because their heart stopped, they're not breathing, they're bleeding, choking, etc? We have all seen situations in hospitals where individuals were lined up at a computer station throughout their shifts entering data. Patient care becomes secondary when healthcare workers have to enter data. This obsession with data competes with and negatively effects care.

I oppose HB2164. The government has been taking more and more of our data, all in the name of helping us. This data goes to DHSS & MU, and then shared with other entities, like databases. While it may seem like a good idea for EMS to help a patient who is unresponsive, there are too many risks vs rewards. Also, when will the government be satisfied with the amount of data that they have on each individual? Enough is enough. Patients are not even asked for consent to have their data captured by the government.

This bill is more about data collection than patient care. The vendor mentioned in the fiscal note, ImageTrend, is heavily focused on software to track vaccination status on a local, state, and national level. This system allows for the "automatic delivery of vaccine certifications and notifications for vaccine boosters or follow-up care via email or text message". Even if all other states are doing this, as just one in a variety of model bills related to EMS, this is still a data grab. Once this data is shared with DHSS and MU, there is no guarantee where it will end up. Page 2, paragraph 3 of the bill allows for disclosure to a broad list that includes "other public health authorities, health researchers, local emergency medical response agencies, EMS regions, EMS medical directors, and other legitimatere search entities...". In New Jersey in 2021 where legislation like this was passed, a data breach in the state's health department system allowed state police to access the personal information gathered from a local EMS provider. Aside from a lawsuit as was filed in this case, there is no recourse in this bill for individuals whose data has been compromised. Additionally, what evidence is available to justify this step in an already chaotic EMS setting. How is it realistic to care for patients while collecting, accessing, and reading more data. Healthcare workers are already required to spend much more time entering and reviewing data than interacting with patients. I have sat in hospital rooms with my elderly mother for hours on end watching nurses sit at devices instead of doing the most basic things for patients. We should require proof that this would help patient outcomes in this state before we deal so loosely with the personal information of Missourians.

When government starts to look at kids as an income source with data collection, I think of third world countries and sweat shops. When government works with private industry to make kids a source of income with data, I think Nazi Germany. If we are going for fascism/totalitarianism, I believe with this bill we are on the right track. If we are going for liberty and freedom, the train has derailed.

DHSS and the MU School of Medicine should not have citizens' data for collection, analysis, and disclosure to public health authorities, health researchers, local emergency medical response agencies, etc. This is an infraction against citizens' privacy.

Dear Health Reform Committee, Vote no on this Bill. Does not protect Personal Identifiable, confidential information. Citizens lose protection under HIPAA. Penalties far from Adequate for any individual or group to be held accountable for mishandling data. Benefit does not outweigh harm to individuals from data mining in our society today. All trust and faith has to be gained back after the last 4 years of the vaccine rollout and government entities and officials lying to the American People.

We don't need more patient data being entered in to a system that can be exploited, stolen, surveilled which takes time away from patient care which is more important. If an EMS person was responding to an emergency and had to stop and enter data instead of taking care of the patient, that is WRONG!! All of this data is not needed. Please oppose this Bill!!!

HB 2164 requires Emergency Medical Services data in Missouri be sent to DHSS and the MU School of Medicine for collection, analysis, and disclosure to public health authorities, health researchers, local emergency medical response agencies, and more. The bill says the data will be used in epidemiological studies. Are they setting up for pandemic X? Is this another way to fake an outbreak? Promoters of this bill are selling the idea that the emergency patient can get better, faster care because their records are immediately accessed and then communicated from EMS to the hospital just by scanning a driver's license (which is creepy). Do they know we already have sophisticated data on individuals? Even more concerning, when will EMS personnel have time to enter data and read it in an emergency situation when they're needing to respond to the person's immediate needs because their heart stopped, they're not breathing, they're bleeding, choking, etc? We have all seen situations in hospitals where individuals were lined up at a computer station throughout their shifts entering data. Patient care becomes secondary when healthcare workers have to enter data. This obsession with data competes with and negatively effects care.
