## FISCAL ANALYSIS

### ASSUMPTION

#### § 190.241 - Trauma center designations

Officials from the **Department of Health and Senior Services (DHSS)** state § 190.241.1 of the proposed legislation prohibits the DHSS, Division of Regulation and Licensure (DRL), Time Critical Diagnosis (TCD) program from denying a qualified hospital designation of a level I, II, or III trauma center based solely on the distance or mileage between trauma centers.

As a result of the proposed legislation, TCD anticipates the addition of approximately 20 new program participants. This would require two (2) full-time Registered Nurses (annual salary of \$78,792) to process the additional applications and conduct the required inspections. The Registered Nurses will be remote and are expected to travel extensively; therefore, it is assumed travel will be double the standard cost at \$10,262.

**Oversight** does not have information to the contrary and therefore, Oversight will reflect the estimates as provided by the DHSS.

In response to a similar proposal, HB 984 (2025), officials from the **Cass Regional Medical Center** stated, for those who are already invested in the trauma program, this bill could be financial detrimental to the investments that have already been made and dedicated to trauma to include trauma coordinator, trauma registry, medical director, equipment, etc. Annual cost of these items alone for a Level III center is \$250,000. Need for additional trauma center should be based on geography to avoid diluting the program due to numbers and geographical locations.

**Oversight** does not have any information to the contrary. Therefore, Oversight will reflect a potential unknown loss to local regional medical centers and hospitals.

**Oversight** notes other hospitals were requested to respond to this proposed legislation but did not. A listing of political subdivisions included in the Missouri Legislative Information System (MOLIS) database is available upon request.
