

HB 316 -- MODIFIES THE DEFINITION OF EMERGENCY VEHICLE

SPONSOR: Cook

Currently, vehicles must yield the right-of-way to approaching emergency vehicles that have their siren or lights active, and must, to the extent possible, make a lane change and slow down when passing a stationary emergency vehicle that has its siren or lights active. This bill expands the definition of "emergency vehicle" to include vehicles operated by county and municipal park rangers.

This bill is the same as HB 2747 (2024).
