

HB 3059 -- INSURANCE COVERAGE OF PRESCRIPTION DRUGS FOR ADVANCED,
METASTATIC CANCER

SPONSOR: Peters

This bill prohibit any health benefit plan that provides coverage for advanced, metastatic cancer and associated conditions from requiring that an enrollee fail to respond to a different drug or prove a history of failure of a different drug prior to the plan providing coverage.

The bill applies only to a drug that is consistent with best practices for the treatment of advanced, metastatic cancer or an associated condition, supported by peer-reviewed, evidence-based literature, and approved by the US Food and Drug Administration.
