

HB 3296 -- FIRE BOARD PURCHASING POWERS

SPONSOR: Simmons

Currently, the boards of fire protection districts can enter into contracts with people or groups for the development, construction, acquisition, or operation of any public improvement relating to the control or prevention of fires. If the cost of the bid or contract will exceed \$10,000, the fire protection district must publish notice for bids for work or material. This bill increases that threshold to \$50,000.
