Thanks to the sponsors for these bills. Geoengineering is causing these extreme weather swings; ruining our soil and crops; poisoning air and hurting our health. This is a deliberate attempt to reduce the population and kill us any way possible. Geoengineering must stop.

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

The effect of geoengineering on my family has been easy to see. When the skies are sprayed, my little ones have nasal congestion, which also affects their sleep. With the amount of spraying going on, this means that my children are congested often. The other day, when it rained, I breathed in to relish the smell of my childhood— only now it smells like metal. The rain smells like metal. What a tragedy for our earth! Not to mention the impact of greatly reducing our life-giving sun— the impact of low vitamin D on living things, the fact that the shady parts of our yards stay damp either for much longer or just permanently— causing more fungus and other damp-related issues. Honestly the biggest impact this has had on me is the constant anger I feel knowing I'm being poisoned without my consent. In a country that was founded on the principle of "liberty for all." If I do not have my health, and my family's health, I do not have liberty.

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

Please vote to stop Geoengineering, as I will push to stop it in West Virginia. Here is my letter to WV elected Reps in 2023 and the chemtrails are now even more active, so this letter is relevant to your action today. --- "I write again to the elected and unelected Representatives of WV. After two full days of silver skies over my home here in the WV Allegheny Highlands (NOT caused by Canadian fires), the sun shining from a patch of blue sky appeared thru my window this morning, so I walked out of my shop to look up only to be heartbroken once again to see SRM (Solar Radiation Management) just got a late start today.

There is no longer any reason after today to keep writing and requesting your help to stop this madness, but only to send this final TRUTH -- that your "silence is consent" to this massive Gain of Research Program, and history will reveal the devastating results that some of you signed off on with full knowledge of it's risks. Just as the C19 - RNA Vaccination became apparent to many as an actual Biological Weapon Attack on the global population, an increasing number of people are opening their eyes to see and ears to hear the modus operandi of the W.E.F./W.H.O./U.N. that is creating existing climate disasters, wars, famine, and diseases only to implement their malevolent cure. Why use a nuclear weapon on a country when they can reduce the human population with poison falling down from the sky under the guise of Geoengineering to negate Climate Change that will supposedly save their lives. Please open your eyes to the truth and stop this madness.

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

**Stop the mass pollution stop the geoenineering!! I support the ban of geoenineering and weather modification in the state of Missouri.**

**As a resident, I believe individuals and communities should have a voice when it comes to environmental exposures that may impact our air, water, soil, and overall health. There are growing concerns about the potential long-term effects of these practices on human health, agriculture, and ecosystems.**

**Because the public has little ability to opt out of large-scale environmental interventions, it is both reasonable and responsible to take a precautionary approach. Missourians should not be subjected to these activities without clear transparency, consent, and a full understanding of the risks.**

**I respectfully urge you to support this bill and prioritize the health, safety, and well-being of the people and land of Missouri.**

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

We are writing to express our support for Missouri House Bill 2388, the “Clean Skies Act.” This bill represents a responsible and proactive effort to protect Missouri’s environment and the health of its citizens by regulating geoengineering, weather modification, and cloud seeding activities. These practices, which often involve the release of chemicals, pollutants, or other agents into the atmosphere, can have unknown and potentially harmful effects on air quality and public well-being. By prohibiting unauthorized geoengineering and weather modification, the bill establishes clear, enforceable standards and demonstrates Missouri's commitment to safeguarding our natural resources.

House Bill 2388 also prioritizes accountability and transparency. It sets forth a public reporting system for suspected violations, requires mandatory investigations, and imposes tough penalties—including felony charges and substantial fines—on those who engage in unauthorized activities. The enforcement provisions, which allow for collaboration with local law enforcement and even the National Guard if necessary, ensure that these important safeguards will be upheld. Importantly, the bill proactively addresses the growing role of technology and artificial intelligence in environmental experimentation by explicitly including artificial intelligence in its language, ensuring the law remains effective in the face of emerging technological threats.

Another strength of HB 2388 is its careful distinction between potentially dangerous geoengineering and ordinary agricultural practices. By exempting the use of pesticides for traditional farming and ranching, the bill allows Missouri's agricultural community to continue its vital work without additional bureaucratic hurdles.

Overall, House Bill 2388 is a forward-thinking and prudent measure that places public health, environmental stewardship, and government transparency at the forefront. It will build public trust and help ensure that Missouri’s skies remain safe, clean, and free from unauthorized manipulation. I urge the legislature to pass the Clean Skies Act to protect the future of our state.

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

**I EXHORT you to pass HB2388 to Ban Geoengineering and Weather Modification here in the state of Missouri.**

**As an artist, my reason is NOT because I desire to paint landscapes with clear blue skies. It's because I want clean air for ALL Missourians, and NOT TOXIC AIR, SOIL, WATER OR FOOD!**

**"We the people" do not give consent to secret experiments from governmental or private companies to spray us with known toxins.**

**The public has become increasingly concerned that these types of things have already been going on for decades without our knowledge or consent.**

**And guess what? The more we learn about it, the more we discover that we are right.**

**Look at what our own government recently ADMITTED to doing right here in our very own community of St Louis where they implemented a Cold War test by spraying humans with toxic radioactive chemicals JUST to see what would happen.**

**Well, nothing has changed!**

**We have done nothing to stop the government or anyone else who wants to conduct secret experiments.**

**All under the guise of research.**

**We say no. It's been over 30 years ago that I first LOOKED UP and noticed the geoengineering, and I knew then it was wrong. WE, THE PEOPLE were never given a chance to vote to stop this. I've seen more planes filling our skies with chemical trails this past week than ever. It's getting worse and we cannot protect ourselves without YOUR help!**

**I have one simple question for you...Will YOU protect us?**

**Will you send a message (like other states have done) to say that the Missouri Legislature will protect our citizens?**

**Please, "JUST LOOK UP," and then pass this legislation! Please DO THE RIGHT THING and help keep Missourians healthy!**

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

We have witnessed, first hand, what these aerosols are doing to people at risk for respiratory/asthma. The air quality has MORE THAN ONCE, hospitalized two of our three children after being outside (healthy as can be) on heavily sprayed days and/or post-weather manipulated storms—large snowfalls. It does not show up as “classic pneumonia” on chest X-rays (per multiple doctors on duty at children’s mercy) but has a considerable amount of debris to clear. This is so health hazardous to the people, on so many levels. It’s time to protect, what should be a given, human right to clean air.

I am against weather modification for global warming. Will their global warming is a hoax. It's a lie. It's a way to change your weather. Block out the sun and to charge this extra taxes. No government entity should be changing our weather, creating tornado's droughts. Extra rain Like rain, bombs, extra snowstorms and flooding. The chemicals in the sky ruin our crops run our trees and affect our health.

The offense of this contamination's offense is trespassing upon the Public without our consent. It is a health & safety issue that is real and life threatening to human existence. We need to stop these poisons from coming into Missouri borders.

I am asking the state of Missouri to ban all types of geoengineering in the state of Missouri. Our skies are no longer the clear blue skies I witnessed decades ago. The geoengineering in our skies does not have approval from We the People, & by passing legislation to ban all types of geoengineering in the state of Missouri you are fulfilling the Will of the People in Missouri. I very much appreciate your support in passing legislation to ban geoengineering in Missouri. Thank you!

Dear Committee Members,

Thank you for taking up the important issues of Geoengineering and Weather Modification. My name is Gary Winkler, a resident of St. Louis County and a MO licensed professional engineer, with >20yrs experience in separation of atmospheric gases, and holding patents including in renewable fuels. I have also long been keenly concerned with environmental stewardship, and am a member of the MO Coalition for the Environment. Due to a conflicting appointment, I am unable to attend the 3/30/26 hearing, so I am writing to encourage you to support the intent of HB2388 and HB2656 and/or similar efforts to restrain Geoengineering and Cloud-Seeding.

Geoengineering is currently being conducted over MO skies to reduce sunlight reaching the ground, in stated hopes of reducing global temperatures. Although often dismissed, this activity is well documented and occasionally admitted. Perhaps the most prolific and hazardous step currently being taken is the addition of aluminum and other nanoparticles to jet fuel, which results in long-lingering contrails. The additives are designed to provide nucleation sites for the water vapor in the exhaust and nearby atmosphere. Whether or not atmospheric conditions are conducive to "cloud" formation at a given time, these materials (which are well documented as having serious health and environmental implications) are eventually transported to the soil or water, and are bioavailable to plants, animals and humans. To my knowledge, environmental impact reviews were never conducted, nor any other customary public approval steps taken.

Atmospheric levels of CO2 and its purported connection to changes in our climate receive massive amounts of funding and attention in the press. The actual level of CO2, which is rarely mentioned, is 0.04%, placing it in the classification of a "trace gas". From my experience with atmospheric gas properties, and from numerous studies, it seems inconceivable that the slight observed increase in the amount of this trace gas is capable of causing the asserted drastic potential impacts. Meanwhile, CO2's upside is that it is plant food, and life would quickly be extinguished if it were not present. Scientists widely agree that fossil evidence indicates a much higher CO2 level in the past, coinciding with far more abundant plant and animal life. The global ecosystem is designed with balancing mechanisms; an increase in CO2 proliferates plants, which convert the CO2 to O2 and sugars, limiting the potential CO2 rise. Additionally, the current level of CO2 is near the saturation point, meaning that the current CO2 level absorbs most of the available energy in the applicable narrow infrared spectrum, so additional CO2 will have very little effect on temperature, a fact often ignored in climate models.

Engineers are trained to find the best solutions to problems, weighing all the benefits and

costs/downsides. It is rare, perhaps never, that even the best solution does not include some downside. Unfortunately many other disciplines and organizations, including researchers and government agencies and tech companies, often have little or no incentive to weigh the tradeoffs. Adding these materials to jet fuel is a rather clever approach to reduce sunlight hitting the earth, while giving a slight engine performance boost. However, it appears that the downsides have not simply been underestimated, but treated as irrelevant.

Some questions that should be answered include:

1. What unbiased lab-scale studies have been conducted, and what are the impacts of each geoengineering process on plants, animals, and humans?  
There is mounting evidence that aluminum and other toxic substances now being used are harming all these life forms. Any experiments must be fully conducted in the laboratory, rather than spraying our planet followed by "let's see what happens". MO DNR scientists should be directed to assess the impacts. Jet fuel suppliers should be required to certify that additives unapproved by MO DNR are not present in any fuel dispensed at MO airports, with major penalties, including potential imprisonment, for violations.
2. Have all EPA (e.g. Clean Air Act) requirements been met? (not waived or bypassed)
3. If historical levels of CO<sub>2</sub>, solar output, and global temperatures are considered, is CO<sub>2</sub>'s impact on temperatures being exaggerated?  
A forthright answer will include the solar long term cycles including the most recent "Little Ice Age (LIA)" of the 14th-19th century and "Medieval Warm Period (MWP)" of the 10th-13th century, and the superimposed 11-yr epicycles, as well as the fact that the most recent CO<sub>2</sub> level rise began well before the human-related CO<sub>2</sub> output increase.
4. If CO<sub>2</sub> increases actually did have the claimed thermal impact, would the higher temperature have a net benefit or detriment?  
Far more people die from cold than heat, crop production increases with temperature, etc.

Regarding cloud-seeding for rain production and other weather modification techniques, the downsides likely have lower catastrophic potential. However, downsides are numerous and should be fully weighed, and at a minimum tightly regulated by legislation and appropriate state authorities.

Some questions that should be answered on this subject include:

1. What independent unbiased studies have been conducted and what are the impacts of the materials used in each weather-modification process on plants, animals, and humans?  
MO DNR scientists should be directed to review existing studies, as a first step.
2. How can we mitigate risk of unintended flooding, erosion, and other damage?  
Solid science-based limits would be required. This is a complex and difficult subject, so very conservative strict limits must be used, at least initially.
3. If/how to compensate regions downwind that have been "cheated" from rain?  
This also is a very nebulous and difficult subject.

As a much safer, more effective, and more sustainable alternate to weather modification, Missouri could be at the forefront of a comprehensive ground-based water management approach that reduces flooding as well as drought impacts, adds hydropower, improves electrical grid reliability and costs, and adds revenue streams to MO from other states. If you are interested in exploring better solutions, I will be happy to discuss further and point you to a better direction, building on the successes of major water projects in the Ozarks about a century ago.

Regarding HB2388 and 2656, you have a pivotal role in history. The recklessness of current activities is unsustainable; I encourage you to take the right action and quickly advance an effective bill(s). The bills may or may not require modification, but please do not eviscerate or delay them. If you support this effort, the brief flak that you will receive from well-heeled special interests will fade away, and one day you will be judged as having taken a heroic step in both of your roles as caretaker of God's Creation and defender of Missouri's citizens.

Best regards,  
Gary Winkler

I am writing in support of legislation to ban geoen지니어ing and weather modification in Missouri. As a resident, I believe individuals and communities should have a voice when it comes to environmental exposures that may impact our air, water, soil, and overall health. There are growing concerns about the potential long-term effects of these practices on human health, agriculture, and ecosystems.

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

My name is Jamie Woodle. I am an Integrative Nutrition Health Coach and Health Educator with a Master of Science in Health Education. I am also an Air Force veteran, an active-duty spouse, and a resident of Stone County, Missouri.

I am in support of banning geoengineering and weather modification.

My professional passion is helping Missourians pursue better health and long-term well-being. As a health educator, I can teach people how to avoid harmful foods, artificial dyes, and ultra-processed ingredients. But I struggle with a much harder question: how do we teach people to avoid toxic exposures when they have no control over what is in their air, water, fields, and gardens?

I know that our government takes heavy metal exposure seriously. During my time in the Air Force working in aircraft maintenance, heavy metal exposure was considered a significant risk—so much so that we were required to undergo blood testing for heavy metals every single year.

Exposure to heavy metals such as silver and aluminum is cumulative and well-documented to pose risks to human health. These metals can accumulate in the body and are associated with neurological and cognitive impairment, as well as increased risk of chronic disease. Silver, in particular, has antimicrobial properties that can disrupt microbial ecosystems, raising concerns for soil health and crop productivity, as well as for the balance of beneficial microbes in the human lung and gut microbiomes.

The people of Missouri have little, if any, ability to opt out of what falls from the sky or enters their environment. Because of that, I respectfully ask you to vote yes on banning geoengineering and to stand with the people you represent in protecting their health.

| <b>THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.</b>  |                               |                           |  |

I have deep concern over the over long term health of humans and plants and animals if these practices continue. We strive to raise quality natural beef and food to share with people and this chemical practice that rains down from the skies is detracting from our healthy practices. Therefore, I am writing in support of legislation to ban geoengineering and weather modification in Missouri.

As a resident, I believe individuals and communities should have a voice when it comes to environmental exposures that may impact our air, water, soil, and overall health. There are growing concerns about the potential long-term effects of these practices on human health, agriculture, and ecosystems.

Because the public has little ability to opt out of large-scale environmental interventions, it is both reasonable and responsible to take a precautionary approach. Missourians should not be subjected to these activities without clear transparency, consent, and a full understanding of the risks.

I respectfully urge you to support this bill and prioritize the health, safety, and well-being of the people and land of Missouri. Thank you so much. May we make Missouri clean and healthy!!

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

We, the people, are not experimental subjects. We do not consent to being exposed—without choice or full disclosure—to unregulated substances such as graphene oxide, aluminium nanoparticles, or other unidentified agents already suspected to be present in atmospheric spray programs. There are growing reports and whistleblower accounts linking these activities to environmental degradation, respiratory illness, and crop disruption.

Your duty as an elected representative includes safeguarding the public from untested technologies that threaten both our ecosystem and our sovereignty.

I draw your attention to the following legal and ethical frameworks:

The Nuremberg Code (1947) — Prohibits experimentation on human beings without voluntary, informed consent.

The Human Rights Act 1998 — Protects the right to life (Article 2), the right to respect for private and family life (Article 8, and the right to be free from inhuman or degrading treatment (Article 3).

Environmental Protection Act 1990 — Requires the control of pollution and mandates proper assessment of substances released into the environment.

Aarhus Convention (ratified by the UK) — Grants public rights regarding access to information, public participation in decision-making, and access to justice in environmental matters.

It is unacceptable to push forward any form of climate manipulation or atmospheric experimentation without transparent science, parliamentary scrutiny, or public consultation.

I am calling for:

An immediate moratorium on all geoengineering and SRM-related trials over UK airspace;

A full independent investigation into aerial aerosol activities and public health impacts;

Parliamentary disclosure of any agreements, research funding, or involvement in international climate intervention programs.

This is not climate action—it is unregulated environmental tampering with potentially irreversible effects.

We demand accountability. We demand transparency. And above all, we demand protection.

**GEOENGINEERING AND WEATHER MODIFICATION/MANIPULATION NEEDS TO STOP! MISSOURI NEEDS TO STAND STRONG AND BE BOLD IN ITS LEADERSHIP TO END THIS INSANITY. IT IS DESTROYING THE PLANET AND EVERY LIVING PLANT AND ANIMAL...INCLUDING HUMANS...WITH THIS INSANE EXPERIMENT! DEMOCRAT LYNDON B JOHNSON ONCE FAMOUSLY OR INFAMOUSLY SAID...'He who controls the weather controls the world!. and that is what this is all about...POWER HUNGRY CORRUPT GLOBALISTS WHO WANT TOTAL POWER AND CONTROL OVER HUMANITY INCLUDING ANOTHER BILL GATES SCHEME OF DEPOPULATION BECAUSE THEY BELIEVE THE**

**FEWER OF US THERE ARE THE EASIER WE ARE TO CONTROL!**

They're not "fighting climate change" they're engineering the sky. Stratospheric aerosol injection, aka chemtrails, is real. They're spraying the atmosphere with aluminium, barium, and strontium, poisonous metals we end up breathing, eating, and absorbing.

They say it's to block sunlight and cool the Earth, but who gave them permission to dim the sun? Sunlight is life—photosynthesis, food growth, vitamin D, mental health—it all suffers. Ecosystems collapse. Crops fail. People get sick.

This isn't science, it's a planetary experiment without our consent. Weather manipulation is real, and it's being used for power, control, and profit.

Dr. Sherri Tenpenny: "We are finding aluminum, barium, strontium being poured into our lower atmosphere...fine particles are enriched by the toxic elements of mercury, chromium creating a toxic nightmare harmful to everyone." It is also toxic for our water and land.

The chemical being pumped into our skies are dimming the sun...on purpose...another brainchild of mad scientist Bill Gates. Plants and human needs sunlight to grow. Weather is God's job.

**Who is shaping the weather now?**

**THE PART THAT'S NEVER DISCUSSED**

History shows us something uncomfortable.

When a capability is proven...

When it's patented...

When it's studied by intelligence agencies...

When it's weaponized once and then "restricted"...

It doesn't disappear.

It goes quiet.

**It goes classified.**

**It goes deeper underground.**

**Most operations don't end — they evolve.**

**And while the public is told the sky is changing naturally, the paperwork tells a different story: decades of experimentation, atmospheric interference, and strategic interest in controlling the very systems that govern life on Earth.**

**Weather doesn't just bring rain.**

**It controls food.**

**Water.**

**Movement.**

**Economies.**

**War.**

**And those who control the environment don't need armies — they control outcomes.**

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

My name is Kaley Head. I am a resident of Stone County. I'm a wife, a mother of three, and public school teacher of 10 years. About two years ago, I started a petition on Change.org to give a voice to fellow

Missourians like me who felt helpless with regard to what we know is going on in our environment. We the people do not give consent to anyone (government or private) to spray our atmosphere with toxic pollution. Today, as Michael mentioned in his testimony, we have more than 10,000 signatures.

Today I am here to speak on behalf of those Missourians who are demanding action and protection. If you haven't already heard from them directly, you will. Believe me, you will. Michael Hogan with Missouri Clean Skies touched on the dangers of Geoengineering but because we only have three minutes to cover such an extremely complicated topic, I will spend some of my time talking about Weather Modification.

To be clear on the difference, Geoengineering involves spraying the stratosphere with deadly toxins to dim the sun to potentially lower our temperature. It is a terrible and deadly idea as Michael said previously.

Instead of focusing on reducing pollution, the idea is to add more? Even at the cost of tens of thousands of lives each year? The people say NO! Missourians say NO! But what about Weather Modification?

This is man's idea of manipulating nature to achieve a desired result.

Simply put, it's an attempt to control our weather. Emphasis on the word "control" which also means to manipulate. One commonly known form of Weather Modification is Cloud Seeding. As you probably know, this has been around for decades. One of the first known uses of cloud seeding goes back to the Vietnam War where our military used it as a weapon. Around that time, President Lyndon Baines Johnson said in a speech; "one who controls the weather, controls the world".

There's reasonable data suggesting that this practice did not stop in Vietnam but only increased as a weapon of war.

But what about domestically? Cloud seeding is also used by private companies who make a profit off of their claims

that they are able to force clouds to produce rain, usually by spraying chemicals like silver iodide into clouds.

Today, you're probably going to hear from a well-known cloud seeding company asking you to reject that part of this bill. They will say that silver iodide is harmless to the environment in the amounts that is

used. But the safety data sheets on silver iodide says this:

? Warning!

? Very toxic to aquatic life with long-lasting effects

? Avoid release to the environment

o Let me repeat that, avoid releasing into the environment.

We say it is NOT ok to spray toxins in our environment, including silver iodide (or whatever else they come up with) no matter the amount or the excuse. And besides the toxicity, who gets to decide who gets rain and who doesn't. Is it right for a land-owner who has the money to hire a cloud seeding company to force a cloud to drop rain onto his land when that rain might have fallen naturally onto another

region downwind? No, it is not right. And it is not right for a company to profit off manipulating our weather? Do we the people even get a say in this? It affects us all.

Committee Members, our weather is changing. I admit it. But the more we learn, the more we realize that our weather is actually being changed and manipulated intentionally. A very large part of our population believes that our weather patterns are getting more severe because of the activities that SB860 bans.

Missourians are demanding an end to all forms of weather modification. We don't want it and we sure don't need it.

Missouri gets plenty of rain. We have never needed any help from any human sources before, and we won't in the future. Let's let God handle our weather. He's the best weatherman.

Thank you for your time.

As a resident of St. Louis County, and the state of Missouri, I've personally observed and been the victim of government environmental manipulation. Many times I've been walking my dog in the evening, and I've heard a strange noise coming from an unusual vehicle. A type of spray or mist was coming out of the back. When that truck passed, it turned off the spray, but it was too late. My dog and I had already walked through it, and we were choking and gagging. They were spraying for West Nile virus, killing off the entire insect population in my neighborhood. It has been years since I've seen a fly, a bee, a butterfly, a gnat, or a firefly. It looks like their plan worked, except for the fact that it killed off an entire ecosystem, not to mention the fact that my dog and I were breathing in toxic chemicals. Now imagine those chemicals coming out of the back of a plane, flying in the atmosphere across the entire state. The harm that will be done to people, the environment, and insect populations cannot be denied. Humans are changing the environment. Are we changing it for the better? Not if the solution is worse than the supposed problem we are trying to fix. Even though changes in climate are reality, we should be challenged to find a Better Way. Florida and Tennessee have already made great strides in banning this type of practice. We in the show me state should be working to be Leaders in this area. Forcing people and animals to breathe and toxic fumes is not an acceptable solution.

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

I am writing as a Missouri resident to urgently request your support for legislation to ban geoengineering and weather modification practices in our state.

This is a matter that directly affects the health, safety, and future of our communities. Individuals and families across Missouri are increasingly concerned about the potential long-term consequences these activities may have on our air, water, soil, agriculture, and overall well-being. Yet, the public has little to no ability to opt out of these large-scale environmental interventions.

Given the uncertainty and the potential for widespread impact, a precautionary approach is not only reasonable—it is necessary. Missourians should not be exposed to these practices without full transparency, informed consent, and a clear, science-based understanding of the risks.

I urge you to act now. Please support this legislation and take a stand to protect the people and land of Missouri before further harm can occur.

Thank you for your immediate attention to this critical issue.

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

I am writing in support of legislation to ban geoen지니어ing and weather modification in Missouri. As a resident, I believe individuals and communities should have a voice when it comes to environmental exposures that may impact our air, water, soil, and overall health. There are growing concerns and, much concrete evidence, about the potential long-term effects of these practices on human health, agriculture, and ecosystems.

Because the public has little ability to opt out of large-scale environmental interventions, it is both reasonable and responsible to take a precautionary approach. Missourians should not be subjected to these activities without clear transparency, consent, and a full understanding of the risks.

I respectfully urge you to support this bill and prioritize the health, safety, and well-being of the people and land of Missouri.

As representatives of the people who elected you it is your responsibility to see that institutions, both private and public, do not override the wishes of the people and/or do not endanger their health and well being.

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

I'm a concerned citizen who has petitioned my federal government and now my state government to cease and desist poisoning me, my family, children, and grandchildren. We do not consent!

We don't want geoen지니어ing, cloud seeding, stratospheric aerosol injections, solar radiation management or any manmade weather modification. God handles that for us. It's called weather. It gets hot, cold, wet, dry, snows and periodically we have a tornado.

Florida had three hurricanes (Debby, Helene and Milton) in 2024. Since they outlawed this effective 7/1/25, they've had no hurricanes. Our government has been manipulating weather since the 1940's per Operation Popeye.

We don't need aluminum, barium, strontium or any heavy metals sprayed on our air, water, soil or us. We don't need more dementia, respiratory ailments, and damaged soil leading to less food and less nutrition.

This is not the first assault on us. We are tired of being lab rats.

Missourians were exposed to radioactive contamination from the Manhattan Project at Cold Water Creek resulting in an explosion of cancers and autoimmune diseases.

Illegal dumping of radioactive waste from the Manhattan Project also went into the Bridgeton landfill which had a continuous fire burning.

Missourians were exposed to uranium, radium, and thorium from explosives manufactured during WWII and The Cold War and dumped in Weldon Springs resulting in more cancers, Hashimoto's and autoimmune diseases.

US Army Corp sprayed neighborhoods with toxic zinc cadmium in the 50's and 60's.

Missourians had dioxin sprayed on Times Beach, then a flood resulting in a condemned neighborhood and more cancers.

Missourians were bullied into smart meters by Ameren who has a monopoly. Smart meters are a health hazard, fire hazard, privacy and security hazard and have half the lifespan of an analog meter. We don't need more electromagnetic frequency (EMF) exposure.

**Then there was Covid19 jab that wasn't safe or effective. People were bullied to take an experimental bioweapon to keep their jobs. Then hospitals and doctors were paid handsomely to harm unsuspecting patients with protocols that resulted in many deaths. Look at the excess deaths rates, infertility, strokes, heart inflammation, especially in young healthy men, and morticians pulling out spike protein from the deceased.**

**This is a demonic way to treat taxpaying citizens and fellow human beings.**

**We do not want any more exposure to toxins, nuclear waste, EMFs, bioweapons or heavy metals.**

**Please join this important effort to restore transparency and defend the public's right to clean air, water, soil, and healthy brains and bodies.**

**Thank you for your leadership and commitment to protecting Missourians against yet another assault. I'm praying for you to have the courage to do the right thing.**

**I am writing in support of legislation to ban geoen지니어ing and weather modification in Missouri. We should all care about environmental exposures that may impact our air, water, soil, and overall health.**

**Because the public has little ability to opt out of large-scale environmental interventions, it is both reasonable and responsible to take a precautionary approach. We should have a right to know what the government is doing to us.**

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

I am a lifelong resident of Southeast Missouri. I am extremely concerned with what I see overhead on an almost daily basis: jets leaving wide trails of “vapors” which grow wider and hang in the sky for hours. These created clouds don’t move; they will remain in the same place for hours.

I grew up being fascinated with clouds. I used to lay in the grass and study them and find shapes. I was so interested in them, that as an adult, I wrote a book about clouds.

Unfortunately, the past 3 years hardly a day goes by that these peculiar “trails” populate the skies over my home. My seasonal allergies have become year round and my number of sinus infections have increased. My eyes and nose itch so badly that I can hardly even go outside. I believe these trails are playing a large part in my allergies worsening.

My questions are many, but my biggest is why is this being allowed and who is getting rich over making us sick?

Respectfully submitted,  
 Mary Livingston  
 Whitewater, MO

I am joining this petition of Missouri residents imploring state legislators to protect our air, soil and skies from the harmful pollutants caused by stratospheric aerosol injections, solar radiation management, marine cloud brightening, cloud seeding, atmospheric injections and other forms of weather modification flying over our state . Military, private and NGO aircraft and weather balloons engage in weather modification and research by flying over our state without our consent or any public discussion. This lack of transparency is astounding, how is it that these agencies have the liberty to fly planes over private land and spray the air we breathe, and the soil which grows our food? Missourians neither voted on nor agreed to fund or take part in extreme and frequent efforts to modify weather, seed clouds, impact climate change, or conduct weather manipulation experimentation and research. This is a nonpartisan issue. Weather manipulation pollution is harmful to Missouri air, soil and water.

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

**My name is Michael Hogan, and I am the President and Co-Founder of a newly-formed grass roots organization called Missouri Clean Skies.**  
**1 short year ago, I went from ordinary Missouri citizen; a minister, business owner, husband and father to Political Activist.**  
**The cause of my sudden involvement was from my tremendous personal concern over the topic of discussion in these bills.**  
**In a matter of months, my organization has garnered the support of 145,000 followers on social media. And over 26 million content views.**  
**Why the explosion in support? Because the people want something done about this issue.**  
**In the hearing, I will bring more than 10,000 petition signatures from our citizens. Also, a petition addressed to Missouri Legislators by 24 medical doctors including 7 from right here in Missouri, calling on you for action.**  
**HB2388 and HB2656 are bills that ban Geoengineering and Weather Modification in the state of Missouri.**  
**Why is this necessary? Why have other states like Tennessee, Florida and Louisiana recently passed similar legislation? And why are there more than 30 other states that have legislation pending? It's because the people do not give consent to environmental experiments that pollute our air, water and soil without their knowledge or concern for their well-being.**  
**How do we know that it is happening? Isn't this just a conspiracy theory? Where's the proof? First of all, we are not talking the debate over chemtrails and contrails. We are only interested in the provable facts about actual Geoengineering projects.**  
**So, Let's start with Lee Zeldin, head of the EPA who recently said (and I quote) "...Geoengineering is real. It's something that the US government has acknowledged for a long time. Solar Radiation Modification, Stratospheric Aerosol Injection, Marine Cloud Brightening, Weather Modification, Cloud Seeding".**  
**He goes on to say that it's being funded by the government.**  
**So right there in one sentence, the idea that this is a conspiracy theory is completely debunked**  
**Today, the goal of Geoengineering projects is to spray one million tons of pollution (nano particulates of metals and sulfuric acid) each year into our stratosphere to reflect sunlight and to dim the sun.**  
**Leading scientists like Dr. David Keith say the idea is to mimic the effect that a volcanic eruption has on cooling our planet.**  
**And this plan, as crazy as it sounds, has been adopted by global leaders all over the world while, at the same time, admitting that it is extremely risky and that the unintended consequences would be enormous.**

**Dr, David Keith himself said this “may end up killing many tens of thousands of people a year as a direct result...” And that is a quote.**

**If we don't have a law against this madness here in Missouri, we have no way of stopping this.**

**But it's not just the government.**

**Private companies like Make Sunsets are actively sending toxic chemicals into the stratosphere using balloons.**

**Another private Israeli/American company called Stardust Solutions has a fleet of planes specifically designed to spray our stratosphere.**

**This is geoengineering and it must stop! Missouri must stand up and say no!**

**Greetings! I am asking for you to support this legislation to ban geoengineering and weather modification in MO. Many Missourians are outside daily during the Spring through Fall months of the year and we are very concerned about what we are breathing in each day. What are the long term affects on us,, our pets and our agriculture?**

**Several other states have already passed legislation to end this in their states. My friend in Florida has beautiful clear blue skies while our skies here are a gray haze a good portion of the time. Please hear our concerns and support this bill for us. Thank you so much!**

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

How Electromagnetic fields and Geoengineering are connected.

- 52 (d) An artificially produced electric field, magnetic field, electromagnetic field,
- 53 electromagnetic pulse, sound wave, sound pollution, light pollution, microwave, or
- 54 ionizing or nonionizing radiation;

My name is Robert Workman. I live in Wentzville, MO.

I am a Certified Building Biologist Environmental Consultant (BBEC) I have a second more advanced certification Electromagnetic Radiation Specialist (EMRS) and have over 200 hours working with electrical engineers in electrical measurement with advanced Spectrum Analyzers, and Oscilloscopes. In other words, I can see the electrical pollution caused by Non-Linear Loads, also called switch mode power supplies in every Smart Meter and even the opt out Digital Meter. I am trained in Radio frequency measuring meters from 20 MHz to 40 GHz. I have conducted 230 surveys in Missouri, Illinois, Tennessee, and Michigan and recommended specific Mitigation plans for Clients who have been injured from this trespassing technology

I have been injured by the Smart Meter and Electromagnetic fields coming from Cell towers and other smart trespassing devices. I have confirmation from two different medical doctors. Lyme disease, Kidney failure, loss of hearing in right ear are just a few of my injuries. My right ear has been cooked as seen in picture. The heavy metals were a big component to why I was so sick

Heavy metals like barium, strontium, aluminum, and magnetite that are coming out of the sky will get into the food supply, water, and lungs. This will create an environment for the EMF to vibrate these metals and recirculate get back into the blood and cause illness. Heavy metals act like a conductor and heat up in sensitive areas like the brain. The FCC Guidelines have a maximum exposure limit is 6 minutes without considering heavy metals in the brain. The melatonin which is used to detox the human body starts to shut down and the organs like the kidneys start to fail. Geoengineering and Electromagnetic manipulation of the weather is trespassing on all God's creation. I do not consent to being trespassed. Have we done an environmental analysis? This is violation of federal laws like National Environmental Policy Act (NEPA) and Americans with Disabilities Act of 1990 (ADA)

- #1 Dr. Klinghardt PHD Woodland Washington Heavy Metals
- #2 Dr Simon Yu St Louis Mo Heavy Metals and parasites
- #3 Dr. Crist Lyme Doctor Heavy Metals must detox
- #4 Dr Kessinger Rolla Mo Chiropractor
- #5 Dr Wiley Dentist Heavy Metals
- #6 Dr. Casar parasitologists Hilo Hawaii Heavy Metals and parasites

In conclusion the mitigation plan for all Missourians that have been trespassed is to have the state pay for an Infrared sauna and doctors care to monitor. The cost for the mitigation will be 5000 for the Sauna

and 3000 to work with a doctor. This will need to be done every year which will cost taxpayers Millions into the Billions.

Missouri residents deserve to breathe clean air, drink clean water, and grow our food in clean soil. Geoengineering and weather modification add ingredients without our consent. This is equivalent to purchasing food items with ingredients not being disclosed on the label. It's actually worse, since we can't decline to breathe the air or drink the water. Old wood trees are dying from the top - from exposure to these chemicals, reducing our property values and forever changing our ecosystem. The earth is self-regulating without man-made interference. Just as the country survived the dust bowl, we continue to survive and thrive. Modern farming practices, infrastructure, and conservation are sufficient to protect the environment without broadcasting known toxins that will have generational detrimental impact. Additionally, many of the chemicals being sprayed in the skies are chemicals that are highly regulated by EPA and Title V air permits. Power plants spend millions of dollars (passed to the ratepayer) to remove the exact same pollutants that are then sprayed directly into the air, also paid for by residents' tax dollars. Please end the manipulation of our air and water and ban geoengineering and weather modification by passing this bill.

This statement is in **SUPPORT** of HB2388.

Every person and all life forms share the sky above our Earth. We are seeing increased poisoning of skies that were once blue. We know that some of the assault above us is caused by Stratospheric Aerosol Injection and aluminum-laced jet fuel, along with other processes, collectively referred to as Geoengineering. These practices have turned our clear skies into a haze of artificially induced chemical "clouds"--known to be harmful to life on Earth.

**ALL tinkering with our skies must stop. Working against nature always backfires. Every "fix" leads to a tragic cascade of continued harmful interventions. Controlling the weather is the most elemental, crude project imaginable. Rain saturated with aluminum, silver iodide, and other toxic elements with known neurotoxic effects, lead to diseases such as Alzheimers. This toxic rain pours down on our children, our animals, our waterways, and the soil that provides our food. All of this poison bioaccumulates in all of us--and we never gave our consent to this exposure.**

While living in Missouri's National Forest, my family observed the failing health of the trees. The forest's beautiful scent disappeared along with the vigor of the forest. Our organic gardens were covered with an unmistakable chemical residue following each rain.

Geoengineering is one of the most unwise of all acts of human hubris. We must not allow it. Let Missouri, our state so blessed with natural beauty, be a leader in saying **NO** to the poisoning of the skies--for the future of our children and grandchildren.

| <b>THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.</b>  |                               |  |      |

I am writing in support of legislation to ban geoen지니어ing and weather modification in Missouri.

As a resident, I believe individuals and communities should have a voice when it comes to environmental exposures that may impact our air, water, soil, and overall health. There are growing concerns about the potential long-term effects of these practices on human health, agriculture, and ecosystems.

Because the public has little ability to opt out of large-scale environmental interventions, it is both reasonable and responsible to take a precautionary approach. Missourians should not be subjected to these activities without clear transparency, consent, and a full understanding of the risks.

I respectfully urge you to support this bill and prioritize the health, safety, and well-being of the people and land of Missouri.

To all elected officials,

I am writing today to lend my voice in support of HB 2388. I urge you to take very seriously and to please do your research on subject of Geoengineering.

This is s program of spraying chemicals into our skies all over the country. It has been going on for many years without any approval from the public. For proof that it is happening you need only to step outside your door on any given day and look up. When you see a white plume of smoke trailing behind a high flying plane, often stretching from horizon to horizon, ask yourself “why and what is it” coming out of the plane. Something is going on in our skies and we have the right to know if this is safe for all of us to breathe and what it is doing to our bodies and the environment.

I believe from my own research the there are among other things nano particles of metal, aluminum oxide, among others that are being injected into these white clouds behind planes.

The story I read is to slow down the rate of global temperature rises. If this is true, where are the scientific studies to show this is a safe thing to be dumping on ALL life on earth? Please take a look at [www.geoengineeringwatch.org](http://www.geoengineeringwatch.org) further news and information. We are currently exposed to around 80,000 manmade chemicals, many of which we can avoid by careful choice of what we eat and drink. This is not the case with the experimental spraying of our skies which covers everything we eat, drink and breathe.

You might ask “What if Missouri passed a law banning chemtrails but surrounding states don’t “. My answer would be that this is NO reason not to a this practice. This issue is larger than one state, but it desperately needs to reach a critical mass among the 50 states and there is no reason we can’t be among the first.

Lastly, I urge you to consider doing a little citizen science for yourself. Go outside, the best time is at night and swipe your finger across the hood of your car. Then go into a dark room and shine a flashlight on your finger and observe the tiny little shiny particles on your finger. What are they??

Thank you again for your attention to this critical issue!

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

I am imploring state legislators to protect our air, soil and skies from the harmful pollutants caused by stratospheric aerosol injections, solar radiation management, marine cloud brightening, cloud seeding, atmospheric injections and other forms of weather geo-engineering modification flying over our state. Military, private and NGO aircraft and weather balloons engage in weather modification and research by flying over our state without our consent or any public discussion. This lack of transparency is astounding, how is it that these agencies have the liberty to fly planes over private land and spray the air we breathe, and the soil which grows our food? Missourians neither voted on nor agreed to fund or take part in extreme and frequent efforts to modify weather, seed clouds, impact climate change, or conduct weather manipulation experimentation and research. This is a nonpartisan issue. Weather manipulation pollution is harmful to Missouri air, soil and water and it must stop.

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

The skies almost everyday in St. Charles. Four airplanes shooting out that poison. Sunday at 3:30 they were covering the entire sky in front of the Sun. Chrystal Blue skies turned into a ??murky sad cloudy ??sky by 5:00. I took a photo and put on Facebook. Im sick of the daily spraying ruining our sunny ??? ?????Blue skies. Afraid to go outside. We have 3 heppa filter machines going 24 hours a day. Please put a stop to this POISON !???????

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

I submit this testimony in strong opposition to House Bill No. 2478, the so-called “Clean Skies Act.” While positioned as environmental protection, this bill is a dangerous overreach that will stifle scientific research, criminalize legitimate activities, and leave Missourians less safe in the face of a real climate crisis.

The bill’s definitions are so broad as to be absurd. “Geoengineering” includes vague terms like “climate intervention,” while “weather modification” covers interference with “electromagnetic or sonic characteristics of the atmosphere.” “Pollutant” is defined to include “artificially produced” electromagnetic fields, sound waves, and even light pollution. This language could be used to target basic atmospheric science, university research, or even the operation of broadcast towers and cell networks.

Worst of all, the bill classifies “artificial intelligence” as a legal “entity” capable of committing a crime. This is legally incoherent and appears designed to create fear around emerging technology rather than address any actual harm. Under this framework, a researcher using AI to model cloud formations could theoretically be charged with a felony.

The enforcement provisions are equally extreme. The Department of Natural Resources is tasked with investigating anonymous online reports, issuing cease-and-desist orders with the “weight of a court order,” and enlisting the National Guard for enforcement. Penalties include felony charges, fines over \$100,000, and two years in prison, with each day of an alleged violation counting as a separate offense. This is not environmental regulation. It is a recipe for selective prosecution and state overreach.

This bill ignores the reality of climate change. This legislation makes no distinction between reckless experimentation and necessary climate science. It would criminalize work needed to understand and address the extreme weather events already harming Missouri communities.

We cannot legislate based on conspiracy theories. If the goal is to prevent environmental harm, we should pursue transparent, science-based policy, not a bill that equips the state with felony charges against algorithms and opens the door to using the National Guard against academics.

For these reasons, I urge a vote no on HB 2478.

**THE INFORMATION ON THIS FORM IS PUBLIC RECORD UNDER CHAPTER 610, RSMo.**

HB 2388 imposes a categorical prohibition on “geoengineering,” “weather modification,” and related activities, enforced through criminal penalties and administrative action. As drafted, the bill presents multiple structural constitutional defects.

First, the statute relies on definitions that are not capable of consistent legal application. Terms such as “geoengineering,” “pollutant,” and “release” are defined to include an expansive and indeterminate range of physical phenomena, including electromagnetic fields, sound waves, and unspecified “physical or biological agents.” These definitions do not establish discernible boundaries for regulated conduct. A statute that fails to provide clear notice of what is prohibited, or that invites arbitrary enforcement, is constitutionally deficient.<sup>1</sup>

Second, the enforcement mechanism assigns quasi-judicial authority to an executive agency.

The department is authorized to issue cease-and-desist orders that “have the weight of a court order,” without requiring prior judicial review or a defined adjudicative process. The imposition of binding legal consequences and the triggering of criminal liability based on agency determination, absent procedural safeguards, raises substantial due process and separation-of-powers concerns.<sup>2</sup>

Third, the statute expressly applies to federal and interstate entities. To the extent the bill purports to regulate or criminalize conduct by federal actors or federally authorized activity, it directly conflicts with established principles of federal supremacy and intergovernmental immunity.<sup>3</sup>

Fourth, the bill regulates activity that is inherently interstate and transboundary in nature, including atmospheric and environmental processes. In doing so, it creates a substantial risk of impermissible burdens on interstate commerce.

These defects are not incidental. They are embedded in the structure of the bill. The combination of indeterminate definitions, criminal penalties, and broad enforcement authority without limiting standards creates a framework that cannot be applied in a predictable or constitutionally consistent manner. These constitutional defects are evident on the face of the statute and are not contingent on implementation, enforcement, or agency discretion.

**Legislative Notice:**

The General Assembly is on notice that HB 2388, as drafted, presents foreseeable constitutional challenges under vagueness, due process, Supremacy Clause, and Commerce Clause doctrines. The

**breadth of the definitions and the absence of procedural safeguards materially increase the likelihood of facial challenge, injunctive relief, and associated fee liability.**

**Footnotes:**

**Grayned v. City of Rockford, 408 U.S. 104, 108–09 (1972).**

**Mathews v. Eldridge, 424 U.S. 319, 333 (1976).**

**McCulloch v. Maryland, 17 U.S. (4 Wheat.) 316 (1819).**

**This bill combines undefined terms, criminal penalties, and agency enforcement power in a way that makes constitutional conflict not just possible, but inevitable—and the cost of that will fall on Missouri taxpayers.**
